Personal Property

Appraisal Guide

January 2026

2026 Personal Property Guide Changes

The following are notable changes:

1. PVD Directive #19-048 added to guide
2. Former Introduction section updated to Foreword
3. RV section revised
4. New exemptions added for off-road vehicles, certain trailers, any marine equipment, and watercraft
5. Tiny homes valuation section updated
6. Other guide changes may consist of dates, page numbers, formatting, and additional language for clarification

Current PVD Personal Property Staff

Sabetha Shreve, Property Appraiser: sabetha.shreve@ks.gov

Jessie Ireland, Property Appraiser: jessie.ireland@ks.gov

DIRECTIVE #19-048

TO: County Appraisers

SUBJECT: Procedures and Guidelines for Valuing Property
(This Directive Supersedes Directive #17-048)

This directive is adopted pursuant to the provisions of K.S.A. 79-505, and shall take effect and be in force from and after the Director's approval date for the 2020 valuation year and all subsequent valuation years.

The county appraiser shall follow the policies, procedures and guidelines set forth in the Division of Property Valuation's specifications, manuals, guides, schedules, memoranda, regulations, directives and other instructions, as promulgated by the Director. *See* K.S.A. 79-1456; *In re Appeal of the Director of Property Valuation*, 14 Kan.App.2d 348, 791 P.2d 1338 (1989), *rev. denied* 246 Kan. 767 (1990).

If the director of property valuation has developed and adopted methodologies to value specific types of property, the county appraiser is required to follow such methodologies. K.S.A. 2018 Supp. 79-1456(a). The following guides set forth methodologies to value specific types of property:

- 1) Personal Property Guide
- 2) Oil and Gas Appraisal Guide
- 3) Grain Elevator Appraisal Guide
- 4) Commercial Feedlot Appraisal Guide
- 5) Affordable Housing Appraisal Guide

Some guides are revised annually and may set forth the valuation year (tax year) to which they apply. If a guide is not revised annually, then the county appraiser shall utilize the most current version of the guide which precedes the valuation date. The division of property valuation will notify county appraisers of proposed changes in guides and of the adoption of new or revised guides.

In valuing personal property required to be valued at fair market value, the county appraiser may deviate from the values shown in such guides on an individual piece of personal property for just cause shown and in a manner consistent with achieving fair market value. K.S.A. 2018 Supp. 79-1456(b).

In valuing real and personal property, the county appraiser shall interpret appraisal and valuation guides in a manner consistent with statutes. “To be valid, rules or regulations of an administrative agency must be within the agency's statutory authority. Rules or regulations that go beyond that authority, violate the statute, or are inconsistent with the agency's statutory powers are void. Further, administrative rules and regulations must be appropriate, reasonable, and consistent with the law.” *In re Tax Appeal of City of Wichita*, 277 Kan. 487, 495, 86 P.3d 513 (2004); *Wagner v. State of Kansas, et al.*, 46 Kan.App.2d 858, 862, 265 P.3d 577 (2011), *rev. denied* 294 Kan. 948 (2012).

The Orion computer assisted mass appraisal system is a tool for mass appraisal intended to facilitate performance of the three generally accepted appraisal methodologies of the sales comparison approach, the cost approach, and the income approach when data to perform each approach is readily available. When using the Orion computer assisted mass appraisal system for property required to be valued at fair market value, it is the responsibility of the county appraiser or appraiser’s designee to consider all applicable valuation methodologies and any other appropriate factors and then to select the best indication of fair market value based on appraisal judgment. *See* K.S.A. 2018 Supp. 79-503a; Uniform Standards of Professional Appraisal Practice (USPAP). The county appraiser is expected to follow professionally recognized methods and techniques in order to maintain a high level of public trust in the appraisal practice.

Approved: March 24, 2019

David N. Harper
Director of Property Valuation

Foreword

The Personal Property Appraisal Guide (guide) and corresponding Personal Property Assessment Form (rendition) have been prepared by the authority of the Director of Property Valuation Division (PVD) of the Kansas Department of Revenue (KDOR) and the governing Kansas statutes.

1. All property in this state, real and personal, not expressly exempt therefrom, shall be subject to taxation per K.S.A. 79-101.

K.S.A. 79-102 defines both real and personal property as:

“Real Property’, ‘real estate’, and ‘land’... shall include not only the land itself, all buildings, fixtures, improvements, mines, minerals, quarries, mineral springs and wells, rights and privileges appertaining thereto.”

“Personal Property shall include every tangible thing which is the subject of ownership, not forming part or parcel of real property...”

2. Each parcel of real property and all tangible personal property shall be listed, classified, and appraised at fair market value annually as of January 1 in the name of the owner per K.S.A. 79-301, K.S.A. 79-303, K.S.A. 79-501, and K.S.A. 79-1459 except as provided in K.S.A. 79-1439.

K.S.A. 79-503a defines “Fair market value” as “the amount in terms of money that a well-informed buyer is justified in paying and a well-informed seller is justified in accepting for property in an open and competitive market, assuming the parties are acting without undue compulsion.” For the purposes of this definition, it will be assumed that consummation of a sale occurs as of January 1.

The appraisal process utilized in the valuation of all real and personal property for ad valorem purposes shall conform to generally accepted appraisal procedures and standards which are consistent with the definition of fair market value unless otherwise specified by law.

3. K.S.A. 75-5105a provides for the Director of Property Valuation Division (PVD) to devise and prescribe uniform assessment tools and guides to assist the county appraiser in establishing market value for real and personal property. This includes the application of the current PVD Personal Property Assessment form (rendition) which shall be utilized by county appraisers as the official valuation form for these properties.

4. The county appraiser shall first conform to the values of such property as determined by use of schedules or methods prescribed in the Personal Property Appraisal Guide and the current rendition per K.S.A. 79-1412a.

5. K.S.A. 79-1456 obliges the county appraiser to follow policies, procedures, guidelines, as well as, developed and adopted methods for specific types of property as instructed by the Director of Property Valuation. The county appraiser may then deviate from such guidelines on an **individual** item and/or property for just cause and in a manner consistent with establishing market value in accordance with the state statutes.

Thus, the county appraiser shall use the guide and the current rendition prescribed by the Director of Property Valuation. If the personal property valuation estimated by use of the guide and current rendition does not reflect market value for an individual item and/or property in the judgment of the appraiser or the taxpayer, the appraiser has the authority to review and adjust the valuation to market value. Appropriate deviation from the guide and current rendition requires (i) just cause, (ii) on an individual item and/or property, and (iii) proper documentation. Any change made in the appraisal from the prescribed guide and rendition application must be supported by proper documentation and a copy of the valuation change must be furnished to the taxpayer in a timely manner sufficient to allow the taxpayer the right to appeal the valuation. Personal property owner/taxpayer/tax representative requests for change must also be documented.

6. PVD Directive #19-048 provides for the county appraiser to follow all policies, procedures, and guidelines set forth in the five named PVD guides, including the Personal Property Appraisal guide.

7. Pursuant to KSA 75-5105a, the Kansas Department of Revenue, Division of Property Valuation prescribes and furnishes the guide and current rendition to all county appraisers. **For copies, please download from <https://www.ksrevenue.gov/pvdvaluation.html>.**

8. The administration of the ad valorem property tax is the jurisdiction of the county appraiser's office, in and for the county, in which the personal property is located. Any question or specific valuation concern should be directed to the county appraiser. Any equalization or payment under protest appeal should be scheduled with the county appraiser. For appeal information, please contact the county appraiser in which the personal property is located or download information from <https://www.ksrevenue.gov/pvdappeals.html>. Once connected to the site, scroll down to "Taxpayer Appeal Guides" then to "Property Tax Appeal Guides"

Real Property or Tangible Personal Property

It is the responsibility of the county appraiser to classify all real and personal property, taxable and exempt, per K.S.A. 79-1459. Classification for the purposes of ad valorem taxation is delineated in Article 11, Section 1 of the Kansas Constitution. Under this section, property subject to taxation is divided into two primary classes: 1) real; and 2) tangible personal property. Both classes contain several subclasses, each with its own assessment rate. Also see K.S.A. 79-1439.

Current law provides in part, "in determining the classification of property for ad valorem tax purposes, the county appraiser shall conform to the definitions of real and personal property in Kansas law and to the factors set forth in the personal property guide devised or prescribed by the Director of Property Valuation..." per K.S.A. 79-261(b)(1).

K.S.A. 79-102 defines both real and personal property as:

"'Real Property', 'real estate', and 'land'... shall include not only the land itself, all buildings, fixtures, improvements, mines, minerals, quarries, mineral springs and wells, rights and privileges appertaining thereto."

"Personal Property shall include every tangible thing which is the subject of ownership, not forming part or parcel of real property..."

It is sometimes difficult for the county appraiser to determine when property is personal property or real property, more specifically, when machinery or equipment becomes a fixture, hence real property. The Kansas Supreme Court has recognized the difficulty in separating real from personal property, particularly regarding fixtures. "It is frequently a difficult and vexatious question to ascertain the dividing line between real and personal property, and to decide on which side of the line certain property belongs." *Atchison, Topeka & Santa Fe Railroad Co. v. Morgan*, 42 Kan. 23, 21P. 809, 811 (1889).

Where the proper classification of commercial and industrial machinery and equipment is not clearly determined from the definitions of real and personal property provided in Kansas law, the appraiser shall use the three-part fixture law test as set forth in the personal property guide prescribed by the Director of Property Valuation pursuant to K.S.A. 75-5105a(b), and amendments thereto, and shall consider the following:

A. The **annexation** of the machinery and equipment to the real estate;

B. The **adaptation** to the use of the realty to which it is attached and determination whether the property at issue serves the real estate; and

C. The **intention** of the party making the annexation, based on the nature of the item affixed; the relation and situation of the party making the annexation; the structure and mode of annexation; and the purpose or use for which the annexation was made. [\[K.S.A. 79-261\(b\)\(2\)\]](#)

The answer must be “YES” to all three questions before it can be said that personal property has become a fixture and thus part of the real property.

The Kansas Court of Appeals has applied the 3-part fixture law test in a case pertaining to the value of property for ad valorem taxation purposes. In re: Equalization Appeals of Total Petroleum, Inc., 28 Kan. App. 2d 295, 16 P.3d 981 (2000). This case also illustrates a unique situation where the 3-part fixture law test was applied to determine that massive oil tanks and oil refinery towers were real property. In Total Petroleum, the court concluded that the tanks and refinery towers were real property after reviewing (1) annexation, (2) adaptability and (3) intent.

The key factors influencing the Total Petroleum court decision included:

1. The massive size of the tanks and towers, and how they were affixed to the land:
 - The tanks were built on-site by transporting huge pieces of sheet metal by semi-trucks and welding the metal into place until 3” thick.
 - The towers were 120’ tall and weighed 175,000 lbs. empty, without trays. They were installed 20’ below ground in concrete and rebar with 1 1/2” anchor pedestals and were built to withstand 100 mph winds.
2. The tanks and towers were not portable and were never moved.
3. The land on which the tanks and towers were affixed was devoted to the placement of an oil refinery. Some of the property associated therewith, including the towers and tanks at issue, were specifically constructed for placement on that particular piece of land.

Much of the property, including the tanks and towers, would have to be cut into pieces in order to be removed from the land. Furthermore, the removal would result in environmental contamination of the land, which would have to be treated.

Three-Part Fixture Law Test Examined

The determination of whether property is real or personal must be made on a case-by-case basis. The three tests that comprise the three-part fixture law test are: (1) annexation; (2) adaptation; and (3) intent.

Annexation of the machinery and equipment to the real estate: How is the item under consideration physically annexed to the real property? Would removing the item cause a reduction in the fair market value of the realty? If so, the item may tend to be viewed as part of the real property. Would the item, once removed, require a significant amount of time or cost to restore the realty to its original condition? If so, the item may tend to be viewed as part of the real property.

Adaptation to the use of the realty to which it is attached: In the adaptability test, the focus is on whether the property at issue serves the real estate or a production process. For example, a boiler that heats a building is considered real property, but a boiler that is used in the manufacturing process is considered personal property.

Intent of the party making the annexation: Intent is based on the nature of the item affixed; the relation and situation of the party making the annexation; the structure and mode of annexation; and the purpose or use for which the annexation was made. K.S.A. 79261(b)(2).

In other words, the appraiser should look at the objective data garnered from the first two tests, or from independent documents, which are documents prepared for purposes other than for a hearing on the issue of whether the property is real or personal. For example, a lease or financing agreement may reveal intent.

When classifying property for assessment purposes, the appraiser should examine all relevant factors and criteria. The information source, its applicability to the Kansas property tax laws and whether it can be used as a credible authority on appeal are all relevant factors to consider.

The basic factors for clarifying items as real or personal property are their designated use and purpose. The determination of whether property is real or personal must be made on a case-by-case basis. All three parts of the three-part fixture test must be satisfied for the item to be classified as real property per K.S.A. 79-261(b)(3).

Normally, the land and permanent structures on the land, mechanical and other features within the structure with a designed use for the safety and comfort of the occupants, and permanent land improvements added for the utilization of the land are considered real

estate.

Items directly used for, and whose primary purpose is for a manufacturing process, are normally considered personal property. Personal property, by definition, includes all machinery and equipment, furniture, and inventory.

Standard overview of improvements to land and building components. Specific listed items may vary under certain conditions.

❖ **Improvements to Land Normally Considered Real Property**

Improvements ordinarily include retaining walls, piling and mats for general improvement of the site, private roads, paved areas, culverts, bridges, viaducts, subways, tunnels, fencing, reservoirs, dikes, dams, ditches, canals, private storm and sanitary sewers, private water lines for drinking, sanitary and fire protection, fixed wharves and docks, permanent standard gauge railroad tracks, and yard lighting.

❖ **Building Components Normally Considered Real Property**

Building and structural components ordinarily include foundation, walls, floors, roof, insulation, stairways, catwalks, partitions, loading and unloading platforms and canopies, systems designed for occupant comfort such as heating, lighting, air conditioning, ventilating, sanitation, fixed fire protection, and plumbing.

What happens after the county appraiser determines whether property is real or personal?

The determination of whether property is real or personal must be made on a case-by-case basis starting with the definitions in K.S.A. 79-102 and further considering the three-part fixture test in K.S.A. 79-261. The Division of Property Valuation may be of assistance for clarification when questions or uncertainties arise.

If the county appraiser concludes that property is real, the appraiser is no longer obligated to use this guide and should follow real property valuation procedures. **If the property and/or items are considered personal, the county appraiser is required to follow the valuation procedures set forth in the personal property guide.**

The following list of miscellaneous components and improvements should be considered as a general guideline. Specific listed items may vary under certain conditions. If items are determined as personal property, the county appraiser is required to follow valuation procedures set forth in this guide.

Building Components

Air Conditioning-Central	Real
Air Conditioning-Package with Duct Work	Real

Personal Property Classification and Assessment

Kansas property tax law requires that all property be taxed uniformly and equally as to class, and unless otherwise specified, be valued at its fair market value as of January 1st. Article 11, Section 1 of the Kansas Constitution places real property and personal property into separate classes. Class 2 is tangible personal property. Tangible personal property is further classified into six subclasses and assessed at the following percentages of value.

Class/ Subclass	Property Type	Assessed %
2.01	Mobile/Manufactured Homes used for residential purposes	11.5%
2.02	Mineral Leasehold interests, <i>except</i> oil leasehold interests the average daily production from which is five barrels or less, and natural gas leasehold interests the average daily production from which is 100 mcf or less	30% 25%
2.03	Public Utility tangible personal property including inventories thereof, <i>except</i> railroad personal property including inventories thereof which shall be assessed at the average rate all other commercial and industrial property is assessed	33%
2.04	All categories of Motor Vehicles not defined and specifically valued and taxed pursuant to law enacted prior to *January 1, 1985. (*motor vehicles valued under K.S.A. 79-5100 Series)	30%
2.05	Commercial and Industrial Machinery and Equipment , which if its economic life is seven years or more shall be valued at its retail cost when new less seven-year straight-line depreciation. Or which if its economic life is less than seven years shall be valued at its retail cost	25%

Class/ Subclass	Property Type	Assessed %
	when new less straight-line depreciation over its economic life except that the value so obtained for such property, notwithstanding its economic life and as long as such property is being used shall not be less than 20% of the retail cost when new of such property.	
2.06	All Other tangible personal property not otherwise specifically classified	30%
Watercraft	Defined as: any boat or vessel designed to be propelled by machinery, oars, paddles or wind action upon a sail for navigation on the water that cannot be exempted by other provisions of law. Each watercraft may include one trailer which is designed to launch, retrieve, transport and store such watercraft and any nonelectric motor or motors which are necessary to operate such watercraft on the water.	Exempt Jan 1, 2026

Listing Personal Property: Due Date and Location (Situs)

Every person, association, company or corporation who owns, holds or controls any tangible personal property, is required to list their property for assessment with the county appraiser on or before March 15th of each year. When the due date falls on a day other than a regular business day, the listing is considered timely filed if it is filed on the next following business day. Oil and gas property must be filed on or before April 1st of each year. As a general rule, all tangible personal property is listed in the taxing district where the property is located on the first day of January, *except for*: [\[K.S.A. 79-301; 79-303; 79-306; 79-332a\]](#)

(a) Tangible personal property owned by a Kansas resident that is stationed, located, or stored on any municipal airport or airfield is listed and taxed in the taxing district where the owner resides. If the owner is not a resident of Kansas or of the county in which the property is located, then the property is listed where it is located.

- (b) Motor vehicles being used by a student attending a university or college and owned by such student or another person, are listed in the taxing district where the owner resided on January 1st.
- (c) The tangible personal property of banks, bankers, brokers, merchants, insurance or other companies (except mutual fire insurance companies) is listed in the taxing district where their business is usually done.
- (d) The tangible personal property of manufactories or mines is listed in the taxing district where the manufactories or mines are located.
- (e) Personal property in transit is listed in the taxing district where the owner resides, unless it is intended for a particular business, and then it is listed in the taxing district where the business is to be transacted. [\[K.S.A. 79-304\]](#)

IMPORTANT: Beginning January 1, 2025, there was a notable change to the filing requirements for personal property. K.S.A. 79-306 was amended to include the following: ***If a person has filed an initial statement listing property with the county appraiser pursuant to this section, no subsequent annual statement shall be required to be filed with the county appraiser regarding such property unless there is a change to report relating to the property previously listed or the statement.***

If a taxpayer has not filed an initial statement with the county, they are required to file a rendition on or before March 15. If there are any changes to report regarding their personal property, a rendition must also be filed on or before March 15. Examples of changes requiring a filing may include the sale of personal property currently on the tax roll, the purchase of new personal property, and any changes to the situs location or use of personal property currently on the tax roll. **Please note that this change does not apply to Mineral Leasehold Interests (Oil & Gas).** K.S.A. 79-332a was not amended in the same way that K.S.A. 79-306 was, meaning that any person, corporation or association owning oil and gas leases or engaged in operating for oil or gas must still list their property annually on a rendition on or before April 1. [\[K.S.A. 79-306; 79-332a\]](#)

On or before January 1, the county appraiser will make assessment forms available for the general public to list their personal property for assessment. The county appraiser shall grant the property owner an extension to file if the owner submits a request in writing on or before the March 15th deadline, stating just and adequate reasons for the extension. [\[K.S.A. 79-1457\]](#)

When personal property is not filed with the county appraiser by the filing deadline (or the extended deadline if applicable), a filing penalty is applied to the assessed value of the property.

Refer to the "Personal Property Filing Penalties" section further in this guide for more information about filing penalties. [[K.S.A. 79-1422](#)]

When filing a personal property rendition, the **taxpayer** is the owner of the personal property or the owner's parent, guardian, trustee, executor, administrator, receiver, accounting officer, partner, or agent who **is** regularly and continuously employed by the taxpayer.

The "**personal property form/tax rendition preparer**" is any person who prepares the tax statement for compensation and **is not** a person who is regularly and continuously employed by the taxpayer.

A taxpayer may not circumvent the law by merely appointing a "personal property tax rendition form preparer" as the taxpayer's agent. A "Declaration of Representative or Agent" does **NOT** alleviate the need for both signatures.

Please be advised that renditions not having both signatures when applicable are subject to penalty. [[K.S.A. 79-301](#); [79-303](#); [79-305a](#); [79-306](#); [79-1422](#)]

Please be certain to note that all renditions are to be signed by the taxpayer AND the tax rendition preparer.

Personal Property Filing Penalties

All tangible personal property subject to taxation must be listed and assessed as of the first of January each year in the name of the owner. Individuals, companies and corporations that own or have tangible personal property subject to their control on January 1st, must list the property with the county appraiser on or before March 15th if they have not made an initial filing or if there is a change to report regarding a previously filed rendition. When March 15th falls on a day other than a regular business day, the first business day following the deadline is considered timely. [[K.S.A. 79-301](#); [79-303](#); [79-306](#); [79-1457](#)]

The county appraiser shall grant the taxpayer an extension to file if the taxpayer submits a request in writing on or before the March 15th deadline, stating just and adequate reasons for the extension. When an extension is granted and the taxpayer fails to file by the extended deadline, penalties are calculated from the March 15th deadline, not the extended deadline. [[K.S.A. 79-1422](#); [79-1457](#)]

The county appraiser is required to apply a penalty to the assessed value of personal property that is not listed by the March 15th deadline. The county appraiser or the Kansas Board of Tax

Appeals (BOTA) has the authority to abate or refund filing penalties whenever excusable neglect on the part of the person required to file the statement can be shown. Whenever the taxpayers do not agree with the filing penalty applied to their personal property, the taxpayer must file a grievance application with the BOTA requesting that the penalty be abated or refunded. All grievance applications are filed in the county where the penalty was incurred. Grievance applications are available from the county appraiser’s office or the BOTA website @ <http://www.kansas.gov/bota>. [K.S.A. 79-1422]

Motor Vehicles and Other PP: Failure-to-file and late-filing penalties are applied only to personal property that is owned on January 1. Therefore, motor vehicles and other personal property that can be prorated onto and off the tax roll when they are purchased or sold during the year are not subject to filing penalties. Filing penalties are not applied to property that is not owned on January 1st. [K.S.A. 79-306d; 79-306e]

Oil and Gas: The same filing penalties apply to Oil and Gas property, except that the filing deadline is April 1st instead of March 15th. Refer to K.S.A. 79-332a for more information on oil and gas filing penalties. [K.S.A. 79-332a]

Late Filing Penalties [2% - 10%]

If **within one year following the March 15th filing deadline**, a taxpayer files a listing or an additional listing of personal property, the county appraiser is required to apply a late filing penalty to the assessed value of the property. The late filing penalty is applied *only* to that portion of the property that was filed after the March 15th deadline. The penalty for late filing is 2% per month up to a maximum of 10%. [K.S.A. 79-1422(a)]

Late filing penalties are applied as follows:

Date Rendition Filed	Penalty
March 16 through April 15	2%
April 16 through May 15	4%
May 16 through June 15	6%
June 16 through July 15	8%
July 16 through March 14 of the following year	10%

*Reminder: When March 15th falls on a day other than a regular business day, the first business day following the deadline is considered timely.

Failure to File Penalties [12.5%]

If **within one year following the March 15th filing deadline**, the county discovers personal property that a taxpayer has failed to file, or failed to file a *complete* list of, the county appraiser *must* determine the assessed value of the property and apply a 12.5% penalty for failure to file. When the taxpayer fails to file a *complete* list of personal property, the penalty is applied *only* to the omitted or underreported portion of the property. [[K.S.A. 79-1422\(b\)](#)]

If the county discovers any personal property that was omitted from the *appraisal* roll after the roll is certified to the county clerk (June 1), but prior to March 15th of the following year, the *county clerk must* place the property on the *assessment* roll as an added tax and apply a 12.5% penalty for failure to file.

When the county appraiser applies a failure to file penalty and the taxpayer later files a list of the property within one year of March 15th, the failure to file penalty is *no longer applicable* and the appropriate *late filing* penalty is applied to the assessed value of the property.

Escaped Penalties [12.5%]

If **one year after the March 15th deadline**, the county discovers personal property that was omitted from the *appraisal* roll or underreported for whatever reason, the property shall be considered to have "*escaped*" taxation. The county appraiser *must* determine the assessed value of the "*escaped*" property and apply a 12.5% penalty to assessed value of any property which was subject to taxation in any of the two years prior to January 1 of the calendar year in which the "*escaped*" property was discovered. [[K.S.A. 79-1427a](#)]

In 1998, the Kansas Court of Appeals ruled that the "*discovery date*" for escaped personal property is the date the property is placed on the tax roll and a bill is sent to the owner. [*The Board of Sedgwick County Commissioners v. Dillon Stores*]

Personal Property Calendar

- January 1** Assessment date for the tax roll. [[K.S.A. 79-301](#); [79-1455](#)]
- March 1** Deadline for IRB/Economic Development property owners to file the Annual Claim for Exemption Form with the county appraiser. [[K.S.A. 79-210](#)]
- March 15** Deadline for taxpayers to report all taxable personal property (except for oil and gas property) owned or in their possession on January 1 to avoid late filing penalties. This report or rendition must be signed by the owner or authorized agent of the property and submitted to the county appraiser's office. *A rendition must only be filed if an initial filing has not been made or there is a change to report regarding a previously filed rendition.* [[K.S.A. 79-306](#)]
- April 1** Deadline for taxpayers to report oil and gas properties owned or engaged in operation as of January 1 to avoid late filing penalties. This report, or rendition, must be signed by the owner or authorized agent of the property and submitted to the county appraiser's office. [[K.S.A. 79-332a](#)]
- May 1** Deadline for the county appraiser to notify taxpayers of the valuation and classification of personal property (including oil and gas). [[K.S.A. 79-1460](#)]
- May 15** Deadline for taxpayers to schedule an appeal of the valuation or the classification of personal property (including oil and gas). [[K.S.A. 79-1448](#)]
- June 1** Deadline for appraiser to certify personal property assessment roll to the county clerk. [[K.S.A. 79-1467](#)]
- December 1** Deadline for county treasurers to mail tax statements. [[K.S.A. 79-2001](#)]
- December 20** Deadline for full or first half property taxes to be paid to the county treasurer to avoid penalties or interest. [[K.S.A. 79-2004a](#)]
- May 10** Following Year-Deadline for second half property taxes to be paid to the county to avoid penalties or interest. [[K.S.A. 79-2004a](#)]

2.01 Mobile and Manufactured Homes

Personal property appraisers follow the same sequence of activities that real property appraisers follow. They must locate the property, inspect it, identify its use for taxation purposes, determine whether the property qualifies for any exemptions, and value the property. In addition to discovering and valuing manufactured homes, the county appraiser must also determine the ownership of the home.

A **mobile home** is defined as a structure that is transportable in one or more sections which, in its traveling mode, is at least 8 feet wide and at least 36 feet long; is built on a permanent chassis; designed to be used as a dwelling with or without a permanent foundation; connected to utilities; and includes plumbing, heating, air conditioning and electrical systems. Mobile homes built in 1976 or prior were not subject to federal manufactured home construction and safety standards. [[K.S.A. 58-4202](#)]

A **manufactured home** is defined as a structure that is transportable in one or more sections, which, in its traveling mode, is at least 8 feet wide and at least 40 feet long; is built on a permanent chassis; designed to be used as a dwelling with or without a permanent foundation; connected to utilities; and includes plumbing, heating, air conditioning and electrical systems. Manufactured homes built after 1976 are subject to federal manufactured home construction and safety standards. [[K.S.A. 58-4202](#)]

The homes being built today fall under the definition of a “manufactured home.” However, for purposes of this guide, the term “manufactured home” shall include mobile homes. Manufactured homes discussed in this guide should **not be confused with modular homes**, which are also built in modules (sections) in an environmentally controlled factory but are not built on a permanent chassis.

Owners of manufactured homes are required by law to furnish a listing of each manufactured home they own or have in their possession, to the county appraiser in the county where the home is located. In addition to the owner listing the home, any owner, lessee or operator of any manufactured home park, or the owner of any land in which one or more manufactured homes are located on, is required to furnish a listing of all manufactured homes located in the park or on the land, as of January 1st to the county appraiser. [[K.S.A. 79-335](#); [79-336](#)]

To value the home accurately, the appraiser should physically inspect the property. It will be necessary to measure the outside of the home, determine the CDU, physical condition, and the quality rating. Also make note of any special features of the home such as porches, carports, or

other buildings (sheds/garages), the type of foundation (if any), etc. If possible, the appraiser should also confirm the year, make and model of the home with the owner. Like stick-built dwellings, manufactured homes will have components, and they will be entered on the residential component page located under the manufactured home tab on the Orion CAMA tree. The counties can find guidelines for listing residential manufactured homes in the *Orion Residential/Agricultural Data Collection* manual. The Orion CAMA program is designed to list and value both real and personal property manufactured homes. There is a discussion on determining if a manufactured home is real or personal property under the “Classifying of Manufactured Homes” section of this guide.

Discovery of Manufactured Homes

The county appraiser has the duty to list and appraise all tangible personal property within the county. When the appraiser discovers, lists, and values personal property in a timely manner, it 1) promotes accurate reporting by the taxpayer thus avoiding penalties; 2) assures uniform and equal treatment of property owners and 3) also assures that all taxable personal property is placed on the tax roll to fulfill the statutory duties imposed upon the county appraiser. The discovery of personal property can be difficult for the appraiser because the property is movable. Since many personal property owners are not aware of the reporting requirements or choose not to obey them, the appraiser must rely on other methods for the discovery of personal property located in the county. [K.S.A. 79-1411b](#)]

Below is a list of primary sources used for the discovery of manufactured homes. County appraisers may be aware of other sources of information that can be used to supplement this list. Several sources are necessary to cross check and update information since personal property information becomes outdated quickly and no single source provides flawless information

- **Title and registration applications** - available through the county treasurer’s office for newly acquired manufactured homes.
- **Manufactured/Mobile home listings** - furnished by the park owner or operator. Kansas law requires park owners or operators to furnish the county appraiser with a list of all manufactured homes located in their parks each year. [\[K.S.A. 79-336; 79-337\]](#)
- **Taxpayer renditions** - required to be filed with the county appraiser by March 15th if an initial filing has not been made or there is a change to report regarding a previously listed mobile/manufactured home. This is a list of all personal property owned by, leased, or in the possession of a taxpayer as of January 1 of the year. [\[K.S.A. 79-301; 79-306\]](#)
- **Building permits** - required to locate or relocate manufactured homes within the county.

- **Data collection records** - provided by real property appraisers that contain information about manufactured homes located on privately owned county parcels.
- **Annual canvass** - one of the best ways to discover manufactured homes. An annual canvass allows the appraiser to inspect the property in order to verify the accuracy of the information the owner submits on the rendition. This on-site inspection also allows the appraiser to gather information on porches, decks, carports, sheds, or any other personal property that should be valued with the home.
- **Communication with other counties** - allows the appraiser to verify situs dates and to ensure that a manufactured home has been listed on the proper appraisal roll.
- **Video Imaging** – allows the county appraiser to retain an electronic inventory of property within the county, which can be produced for review in an appeal process.

Classifying Manufactured Homes

Kansas law states that all manufactured homes are considered to be personal property unless:

❖ The title to the home is in the same name of the person (or spouse of the person) who holds title to the land the home is located on,

AND

❖ The home is on a permanent foundation, the type not removable intact from the real property. [\[K.S.A. 79-340\]](#)

If the manufactured home is determined to be real property, it should be valued in the Orion Computer Assisted Mass Appraisal (CAMA) program. If it is determined to be personal property, it should be classed into one of the following subclasses of personal property as outlined in the Kansas Constitution and valued accordingly.

- Subclass 2.01 – Manufactured homes used for residential purposes. Homes in this subclass are valued at market value and assessed at 11.5%. Residentially classed manufactured homes are listed / valued on schedule 1 of the rendition. The value can be adjusted in a manner that is consistent with achieving market value. Also included as residential “all land and improvements whether or not contiguous to the land accommodating a dwelling or home used to store household goods and personal effects not used for the production of income.” [\[K.S.A. 79-1459\(e\)\]](#)
- Subclass 2.05 – Manufactured homes used for commercial purposes. Homes in this subclass are valued at their retail cost when new less a straight-line depreciation (the same as machinery and equipment) and assessed at 25%. Commercially classed manufactured homes are listed /

valued on schedule 5 of the rendition. The value cannot be adjusted for condition or obsolescence. Refer to the "Commercial/Industrial Machinery and Equipment" Section of this guide for valuation procedures.

- Subclass 2.06 – Manufactured homes not elsewhere classified ("Other"). Homes in this subclass are valued at market value and assessed at 30%. Manufactured homes not elsewhere classified ("Other") are listed/valued on schedule 6 of the rendition. The value can be adjusted in a manner that is consistent with achieving market value. Refer to the "Other Personal Property Not Elsewhere Classified" Section of this guide for valuation procedures.

Valuing Residential Manufactured Homes

Manufactured homes that are classified as personal property and used for residential purposes are to be valued in the same manner as real property manufactured homes. All manufactured homes used for residential purposes are valued at market value and assessed at 11.5%. Typically, market value of manufactured homes is achieved by determining the Replacement Cost New Less Depreciation (RCNLD). Residential personal property manufactured homes are valued in the Orion CAMA program or other personal property programs that use or replicate the values from the Marshall & Swift residential cost estimator. However, other appraisal methods commonly used to determine the market value of residential homes can also be used to determine market value of manufactured homes. Manually valuing manufactured homes is no longer an option. [\[K.S.A. 79-340; 79-1439\]](#)

Depreciation Options in Orion

To ensure accurate values using RCNLD, the county must apply accrued depreciation, which measures "diminished utility" of the manufactured home in its current condition and location. This is accomplished in Orion by using a single comprehensive rating of accrued depreciation which is **CDU**. The CDU assigned to a manufactured home will encompass all causes of depreciation, i.e. physical, functional and locational or economic.

Each county is responsible for developing its own depreciation for manufactured homes. The depreciation schedules are based on the sales of manufactured homes within the county. If the county does not have sufficient documented *valid* sales for an accurate depreciation study, then the county should consider these options:

- Contact neighboring counties or similar-sized counties within their region and use those counties' sales to supplement their own depreciation study **and / or**
- Test depreciation from nationally recognized manufactured housing cost guides for accuracy in your regional market.

PVD offers the course, *Orion Residential Deprecation*, to help county appraisers develop accurate depreciation.

For a more detailed discussion of depreciation within Orion, see PVD's *Orion Residential/Agricultural Data Collection Manual*.

2.02 Mineral Leasehold Interests (Oil and Gas)

For purposes of taxation, oil and gas leases, oil and gas wells, all casing, tubing and other equipment and materials used in operating oil and gas wells are considered personal property. The Kansas Constitution classifies personal property that qualifies as **Mineral Leasehold Interests** (Oil and Gas) into Class 2, Subclass 2 (2.02) for property tax purposes. [Ks. Constitution Art.11Sec. 1; [K.S.A. 79-1439\(2\)](#); [79-329](#)]

Oil and gas interests are valued at market value and assessed at 30%, *except* oil leasehold interests with an average daily production of five barrels or less and natural gas leasehold interests with an average daily production of 100 mcf or less, shall be assessed at 25%. [Ks. Constitution Art.11Sec. 1; [K.S.A. 79-1439\(2\)](#)]

Kansas law requires oil and gas property to be listed annually with the county appraiser on or before April 1st. Oil or gas property not filed with the county appraiser by the April 1st deadline must have a filing penalty applied to the assessed value. The penalty for late filing is 2% per month up to a maximum of 10%. The penalty for failure to file is 12.5%. If an extension from the filing date is needed, a written request for an extension must be filed with the county appraiser prior to the April 1st deadline. [[K.S.A. 79-332a](#)]

Oil Rendition Forms and Gas Rendition Forms, available from the county appraiser's office, are designed to allow taxpayers to provide specific information necessary for the county appraiser to determine the value of the oil and gas property. Due to the complex process for valuing oil and gas leasehold interests, the Property Valuation Division issues a *Kansas Oil and Gas Appraisal Guide* that is separate from this guide. Therefore, the oil and gas appraisal process will not be addressed in this guide. [[K.S.A. 79-1457](#)]

The *Kansas Oil and Gas Appraisal Guide* and the *Oil and Gas Rendition Forms* are available on the PVD website at <https://www.ksrevenue.gov/pvdoilgas.html>.

2.03 Public Utilities

For property tax purposes, the personal property of railroads and companies that qualify as a public utility as defined in K.S.A. 79-5a01 is classified within the **Public Utility** subclass of personal property. The Kansas Constitution classifies personal property that qualifies as **Public Utility** property into Class 2, Subclass 3 (2.03). **Public Utility** property is listed on the "Annual Rendition to the Kansas Department of Revenue Property Valuation Division". The annual rendition must be filed with the Property Valuation Division (PVD) on or before March 20 of each year. Property in the public utility subclass is valued based upon the fair market value of the "unit" and it is assessed at 33%. [Ks. Constitution Art.11Sec. 1; [K.S.A. 79-1439\(2\)](#); [Chapter 79-article5a](#)]

Personal property that is assessed in the public utility subclass includes vehicles which are registered through the county. Proof of property tax assessment by the state (PVD) is required whenever a state-assessed public utility vehicle is titled or registered through the county. The taxpayer's stamped copy of schedule 10b of the Annual Rendition or the "Declaration of State Assessment for Newly Acquired Vehicle" from PVD provides the county with evidence that the vehicle is state assessed. Vehicles with proof of state assessment will have a **State Assessed Exemption** (Public Utility) on the registration. **Whenever evidence of state assessment by PVD cannot be shown, the county should assess the vehicle(s) for property tax purposes.** [[K.S.A. 8-173\(2\)](#); [79-5a05](#)]

The Property Valuation Division (PVD) in the Kansas Department of Revenue appraises property owned by public utilities and railroads. Therefore, procedures for the valuation and assessment of property in the **Public Utility** subclass will not be addressed in this guide. For more information regarding state-appraised public utilities and railroads, contact the Property Valuation Division or visit the PVD website at <https://www.ksrevenue.gov/pvdindex.html>

2.04 Motor Vehicles

The statutory definition of a “motor vehicle” requires the vehicle to be a device that is self-propelled, in which any person or property may be transported or drawn upon a public highway. It does not include motorized bicycles, motorized wheelchairs; devices moved by human power, or devices used exclusively upon stationary rails or tracks. [[K.S.A. 8-126 \(a\)-\(uu\)](#)]

The Kansas Constitution places qualifying motor vehicles into Class 2, Subclass 4 (2.04). Motor vehicles in the “Motor Vehicle” subclass, referred to as “tax roll” motor vehicles are listed on a *tangible personal property assessment form* (rendition) pursuant to K.S.A. 79-300 series.

Tax Roll motor vehicles are registered with a tag weight of 24,000 lbs. or more or titled as a non-highway motor vehicle. Tax roll motor vehicles are reported on *schedule 4a* of the county personal property assessment form in the county where the vehicle is located on the assessment date (typically January 1). The property tax value of the vehicle is the fair market value, which can be adjusted for condition if the vehicle was damaged. The taxes are paid in arrear for the calendar year. [[K.S.A. 79-306d](#)]

Other categories of motor vehicles, which are not classified within the “Tax Roll Motor Vehicle” subclass for purposes of personal property taxation in Kansas, include:

- **Taxed When Tagged** motor vehicles are registered with a tag weight of 12,000 lbs. or less. The property tax value of the vehicle is a formula-driven value, which is not adjusted for condition, mileage, etc. The assessment rate for tax-when-tagged motor vehicles is 20%. The property taxes, which are calculated through the state Motor Vehicle Registration System (MOVRS) in the county treasurer’s office, must be paid when the vehicle is registered. [[K.S.A. 8-126; 79-5101-5107](#)]
- **16M/20M** motor vehicles have a gross vehicle weight which is greater than 12,000 lbs. but less than 20,001 lbs. The property tax value of the vehicle is a formula-driven value, which is not adjusted for condition, mileage, etc. The assessment rate for 16M/20M motor vehicles is 20%. The property taxes are paid in arrears for the calendar year. [[K.S.A. 79-5105a](#)]
- **RV-Titled Recreational Vehicles** include motor homes, campers, and travel trailers, which meet the statutory requirements for registering the vehicle with a Kansas RV Title. The property tax value of the RV-titled vehicle is based upon the age and weight of the vehicle. The property taxes, which are calculated through the state’s Motor Vehicle Registration System (MOVRS) in the county treasurer’s office, must be paid when the vehicle is registered. [[K.S.A. 79-5118-5121](#)]

- **State Assessed** vehicles include motor vehicles that belong to a railroad or public utility. State-assessed railroad and utility property is reported to the Property Valuation Division (PVD) in the Kansas Department of Revenue. [\[K.S.A. 79-5a01\]](#)
- **Rental Excise Tax** is paid in-lieu-of property taxes by rental companies that lease certain vehicles for a period of time not exceeding 28 days. The rental excise tax is 3.5 percent of the gross receipts received from the rental or lease of qualifying vehicles. Qualifying vehicles are reported to the Kansas Department of Revenue. [\[K.S.A. 79-5117\]](#)
- **Commercial Vehicle Fees** are paid for any self-propelled or towed motor vehicle engaged in commerce, is used to transport property or passengers, and has a gross weight or gross combination weight of 10,001 pounds or more. The commercial vehicle fee is collected at time of registration to the IRP/IFTA locations and covers the power unit and any trailers towed by the power unit and/or any beds, bodies, or boxes on the power unit. Farm and personal vehicles are not included. [\[K.S.A. 8-143\]](#)
- **Exempt** motor vehicles must have been granted an exemption from personal property taxation in Kansas by the appropriate granting authority. For more information on property tax exemptions refer to the "Property Tax Exemptions" section.

Valuation Summary for Taxable Vehicles

The manner in which a vehicle is registered *typically* determines how the vehicle is valued and taxed for property taxation in Kansas. Therefore, it is possible for the same motor vehicle to be valued and taxed in several different ways depending upon how it is registered.

The gross weight, now called the "declared weight" in the MOVRS program, of the vehicle is used to determine the registration weight for the vehicle tag. For motor vehicle registration purposes, "gross weight" or "declared weight" includes the *total weight* of the truck, truck cargo and the weight of the trailer and trailer cargo. For example, a motor vehicle registered with a 12M tag can pull or carry a gross weight up to 12,000 pounds. For purposes of this guide, the term "gross weight" will be used, and the letter "M" will be used to represent "thousand" when referring to a tag registration weight (12M=12,000 lbs.).

Taxed when tagged motor vehicle values, which are based on a formula presented in the Kansas statutes, are not adjusted for condition, mileage, etc. of the vehicle. The taxes, which are pre-paid at the time of registration, are payable to the county where the vehicle can be legally registered according to state motor vehicle registration statutes. "*Taxed when tagged*" motor vehicle property taxes are for a "registration year" and can be prorated through the state motor vehicle registration system (MOVRS). The registration year is determined by the first

letter of the primary owner’s last name as shown on the vehicle title. Each letter of the alphabet is assigned a specific month in which the vehicle must be registered each year. The taxes are paid in advance for a twelve-month period beginning with the first day of the month following the assigned registration month. Refer to the chart below for the registration months. [[K.S.A. 79-5100 series](#)]

First Letter of Last Name	Registration Renewal Month
A.....	February
B.....	March
C, D.....	April
E, F, G.....	May
H, I.....	June
J, K, L.....	July
M, N, O.....	August
P, Q, R.....	September
S.....	October
T, V, W.....	November
U, X, Y, Z.....	December

Tax roll motor vehicles are appraised at fair market value and the value can be adjusted for condition if the vehicle is wrecked or damaged. “Tax roll” motor vehicles are assessed at a rate of 30%. These vehicles are listed on the county personal property assessment form (rendition) pursuant to the K.S.A. 79-300 series. The property taxes, which are payable to the county in which the vehicle had its tax situs on the assessment date, are paid in arrear for the calendar year. “Tax roll” motor vehicles can be prorated onto or off of the tax roll when they are purchased or sold. [[K.S.A. 79-306d](#)]

16M/20M motor vehicle valuation and taxation is a unique process because the procedures used are combinations of those used in the valuation and taxation of both “taxed when tagged” and “tax roll” motor vehicles. Motor vehicles that are registered with a 16M or 20M tag are valued in the same manner as “taxed when tagged” motor vehicles, using the same mill levy and assessment rate. However, the tax year, situs requirements, penalties, proration rules, reporting requirements and billing procedures are the same as “tax roll” motor vehicles. [[K.S.A. 79-5105a](#)]

Truck beds for chassis cab motor vehicles are classified and valued separately from the motor vehicle. A “chassis cab” motor vehicle is a vehicle that has a frame (chassis) with wheels and a cab. Chassis cab motor vehicles are considered complete vehicles and can be driven on the

highways without a bed. Therefore, the bed values are not included in the truck values. Truck beds that are for personal use are classified within the "Other" subclass of personal property. Refer to the "Other Personal Property Not Elsewhere Classified" section of this guide for valuation procedures. Truck beds used for commercial purposes are classified within the "Commercial" subclass of personal property. Refer to the "Commercial/Industrial Machinery and Equipment" section of this guide for valuation procedures. Truck beds on "chassis cab" motor vehicles are not prorated onto or off of the tax roll when the truck they are on is purchased or sold during the year if the truck bed is Commercial/Industrial Machinery and Equipment. PVD prescribes the online *Price Digests Truck Blue Book*; this subscription includes truck body and truck beds for valuing. This resource may be used to help determine the value of a truck bed.

Truck bodies for "incomplete," "stripped," or "chassis-only" motor vehicles are considered part of the motor vehicle, and the appropriate body value is added to the chassis value when determining a class code or market value for the vehicle. Incomplete, stripped, or chassis-only vehicles have a frame (chassis) with wheels only. They cannot be driven on the highways because they are not considered "motor vehicles" in Kansas until the body is added. The most common examples of stripped, incomplete or chassis-only vehicles are step vans (UPS-type trucks), RVs and commercial cutaways (small transport buses, ambulances, or special delivery vehicles), and school buses. The vehicle identification number will indicate whether a vehicle is a chassis cab or an incomplete, stripped, or chassis-only vehicle.

Trailers used for personal use are classified within the **Other** subclass of personal property and are valued at market value and assessed at 30%. Refer to the "Other Personal Property Not Elsewhere Classified" section of this guide for valuation procedures.

Trailers used for business are classified within the **Commercial** subclass of personal property and are valued the same as other machinery and equipment and assessed at 25%. Refer to the "Commercial/Industrial Machinery and Equipment" section of this guide for valuation procedures.

Vehicle Identification Numbers

The **Vehicle Identification Number (VIN)** identifies a vehicle. Each digit or group of digits describes specific characteristics about the vehicle. Vehicles produced in 1981 and later will have seventeen (17) digits in the VIN. Prior to 1981, there was no consistency as to how the manufacturers generated vehicle identification numbers.

The VIN for a 1981 or newer model will indicate the following information.

- The 1st through 3rd digits indicates the country where the vehicle was manufactured, the manufacturer and the type of vehicle (auto, truck, incomplete or stripped chassis, etc.).
- The 4th through 8th digits are specific vehicle characteristics (coupe, sedan, number of doors, GVW, engine type, 4-wheel drive, etc.).
- The 9th digit is the “check” digit (used by manufacturers and dealers to verify the VIN is valid).
- The 10th digit is the model year of the vehicle (see chart below).
- The 11th through 17th digits indicates the serial number of the vehicle and the manufacturing plant

Example of VIN breakdown for a 2013 Ford F150, Platinum Series pickup

1 – 3	4 – 8	9	10	11 – 17
1FT	FW1ET	5	D	FA29661
USA, Ford	7001 – 8000 LBS GWV	Check Digit	2013 Model	Dearborn, MI Plant
Truck, Complete	F150, 4X4, Super Crew Eco boost 3.5L, V-6 Engine			Serial Number

VIN Model Year Codes (10th digit)

Year	Code	Year	Code	Year	Code	Year	Code	Year	Code
1980	A	1990	L	2000	Y	2010	A	2020	L
1981	B	1991	M	2001	1	2011	B	2021	M
1982	C	1992	N	2002	2	2012	C	2022	N
1983	D	1993	P	2003	3	2013	D	2023	P
1984	E	1994	R	2004	4	2014	E	2024	R
1985	F	1995	S	2005	5	2015	F	2025	S
1986	G	1996	T	2006	6	2016	G	2026	T
1987	H	1997	V	2007	7	2017	H		
1988	J	1998	W	2008	8	2018	J		
1989	K	1999	X	2009	9	2019	K		

The VINs of some manufacturers break down the description to include the series or model package. However, many do not. The Ford VIN shown in the previous example does not indicate the truck is a Platinum series truck. Therefore, it is up to the county to determine the model package when more than one choice is provided by the MOVRS program. This can be done by asking the owner, viewing the information on the owner’s paperwork from the dealership, or

by contacting the dealership directly. In most cases, if the VIN does not indicate the series or model package, it will not be listed on the title or the manufacturer's certificate of origin.

Note: The VIN will never contain the letters I, O, and Q. The model year identifier (10th digit) will never contain the number zero or the letters I, O, Q, U, or Z. Letters and numbers are occasionally switched in error. Such as the letter S and the number 5, the letter B and the number 8, the letter D and the number 0, the letter Z and the number 2, and the letters F and P. Sometimes a digit is left out completely, so make sure there are 17 digits in the VIN if the vehicle is a 1981 or newer model.

NICB The Property Valuation Division (PVD) receives information on vehicle identification numbers from the manufacturers. National Insurance Crime Bureau publishing the Passenger Vehicle Identification Manual for breaking down VINs. They also publish the Commercial Identification Manual for the Heavy-Duty truck, tractors, and some of the common trailers. For more information about ordering these publications, you may contact the National Insurance Crime Bureau at 847.544.7002.

Taxed When Tagged Motor Vehicles

The term "*taxed when tagged*" simply means the property tax must be paid whenever a motor vehicle is registered and tagged for use on Kansas highways. Motor vehicles registered with a gross weight of 12,000 lbs. or less and recreational vehicles with a Kansas RV Title are "*taxed when tagged*" motor vehicles. The "*taxed when tagged*" motor vehicles' taxes must be prepaid to the county where the motor vehicle can be legally registered. The vehicle taxes are for a "registration year," which consists of a number of months in the current calendar year and a number of months in the upcoming calendar year to equal 12 months. The registration year is determined by the first letter of the primary owner's last name as shown on the vehicle title. The property taxes are calculated through the motor vehicle registration system (MOVRS) in the county treasurer's office.

The "*taxed when tagged*" system, which was implemented in 1981, created a classification system for the property taxation of certain motor vehicles. The system classifies each motor vehicle based on the value of the vehicle when "*first offered for sale as new,*" hereafter referred to as "*trade-in value.*" Each vehicle is assigned a class code, which is determined by the value range in which the "*trade-in value*" falls (refer to the class code charts). The class code remains the same for the life of the vehicle. The "*midpoint value*" (middle) of the class code value range is depreciated 15% per year. The "*taxed when tagged*" motor vehicle value, which is based on a formula presented in the Kansas statutes, is not adjusted for condition, mileage, etc. of the vehicle. The property tax can be prorated for the number of months the vehicle is owned in the registration year.

“Taxed when tagged” motor vehicles registered with a gross weight of 12,000 lbs. include passenger cars, vans, light-duty trucks, sport utility vehicles, and motorcycles. Camping trailers, travel trailers, and motor homes that qualify for a “Kansas RV Title” are also “*taxed when tagged*” vehicles. However, the property taxes for RV-Titled vehicles are based upon the age and weight of the vehicle. Refer to the “RV-Titled Vehicles” section of this guide for more information on RV taxes. [[K.S.A. 79-5100 series; 8-129](#)]

Valuing Taxed When Tagged Motor Vehicles:

The MOVRS program establishes the “*trade-in value*” of each “taxed when tagged” motor vehicle based on the manufacturer’s suggested retail price (MSRP). The MSRP is obtained from a Price Digests data interface, which is used to establish the “*trade-in value*.” The estimated “*trade-in value*” is calculated by taking the MSRP times 85% for autos, motorcycles and Light-Duty trucks and MSRP times 70% for Medium-Duty trucks. [[K.S.A. 79-5103; 79-5104](#)]

Once the “*trade-in value*” is established and a class code is assigned to the vehicle, the MOVRS program will calculate the correct tax. The MOVRS program was developed for county treasurers to use when processing title and registration information.

The “*midpoint value*” of the assigned class code range depreciates 15% per year. To get a “*tax value*” for the vehicle, the depreciated “*midpoint value*” is multiplied by the 20% assessment rate for motor vehicles registered with a gross weight of 12,000 lb. or less. The “*tax value*” is multiplied by the “*motor vehicle county average levy*” (mill rate) to determine the property tax owed on the vehicle. Since the “*motor vehicle county average levy*” differs from county to county, the property tax for an identical vehicle will not be the same in every county. Except for taxes due on motor vehicles that meet the requirements for the “*taxed when tagged*” minimum tax set by state law. [[K.S.A. 79-5102; 79-5105](#)]

Tax When Tagged Formula in MOVRS

Step 1: MSRP X .85 = Trade-In Value Autos, Motorcycles, and Light-Duty Trucks

Step 2: Trade-In Value Determines Class Code from Taxed/Tagged & 16M/20M Class Code Table

(use lower & upper limit columns for Trade-In value range)

Step 3: Find Class Code Midpoint Value in Taxed/Tagged & 16M/20M Class Code Table

Step 4: Midpoint Value X .85ⁿ = Appraised Value

(15% depreciation per calendar year, n = vehicle age)

Step 5: Appraised Value X 20% = Assessed Value

Step 6: Assessed Value X Motor Vehicle County Average Levy = **Tax**

Minimum Tax

All model year **1980 or older** *"taxed when tagged"* motor vehicles are charged a minimum tax of \$12.00 per year, *regardless* of the class code. *Except that* all model year **1980 or older** *"taxed when tagged"* motorcycles which are charged a minimum tax of \$6.00 per year, *regardless* of the class code. *Therefore*, any 1980 or older vehicle that does not have an assigned class code can be assigned a MSRP of \$441 that yields a class code of 001 to generate the minimum tax required by law.

The property tax for model year **1981 or newer** *"taxed when tagged"* motor vehicles will eventually reach a minimum tax of \$24.00 per year. *Except that* **1981 or newer** *"taxed when tagged"* motorcycles will eventually reach a minimum tax of \$12.00 per year. The *only exception* is for certain motor vehicles that were *"grandfathered"* at the \$12.00 or \$6.00 minimum tax.

"Grandfathered" vehicles

Beginning 1996, the Kansas legislature increased minimum tax for *"taxed when tagged"* motor vehicle from \$12.00 to \$24.00 and motorcycles from \$6.00 to \$12.00. As a result, any model year **1981 or newer** *"taxed when tagged"* motor vehicle, registered for the *full 1996 registration* year, that was taxed less than the new \$12.00 or \$24.00 minimum tax was *"grandfathered"*. The property tax for *"grandfathered"* motor vehicles will eventually reach the minimum tax of \$12.00, \$6.00 for motorcycles, applicable to 1980 and older models. The *"grandfather"* exception follows the motor vehicle from county to county and owner to owner. The county treasurer's office can be contacted whenever verification is necessary.

NOTE: Beginning January 1, 2010, upon initial registration of a rebuilt salvage vehicle the class code is to be reduced by two classes. [[K.S.A. 79-5104; 8-135](#)]

Property Tax Exceptions in MOVRS

Property taxes for some vehicles are either not collected at time of registration, or they are exempt from taxation, with the exception of RV-Titled recreational vehicles. For this group of vehicles either not collecting tax at the time of registration or exempt, the MOVRS program uses selectable "property tax exemptions" even though some vehicles are **not** exempt. The taxes for "RV-Titled" recreational vehicles are collected when the vehicle is registered because they are classified under the "taxed when tagged" system. The selectable "property tax exemptions" currently in MOVRS and a brief description of each are as follows:

Exception

Description

Antique:

Any vehicle more than 35 years old. Exempt from registration but are taxable.

State Assessed:

Motor vehicles belonging to telephone, gas, Public Utility electric and railroad companies that are state assessed by the Property Valuation Division for property tax purpose

Military Exempt:

Motor Vehicles owned by non-resident full-time military

Non-Kansas Residents

personnel, **or their spouse**, who are stationed in Kansas on military orders. The vehicle cannot be exempt if used for business purposes. Exempt under the Service Members Civil Relief Act

Military Exempt:

Motor vehicles owned by **Kansas resident full-time regular** military stationed out of Kansas and vehicles maintained outside of state, stationed in Kansas, mobilized, or deployed. Additionally, motor vehicles owned by **Kansas resident full-time active guard and reservist** personnel who are "*mobilized and deployed*" or on "*Active Guard or Reserve (AGR)*" status on the date of application for motor vehicle registration. Also, any current member **in good standing** of the Kansas army or air national guard or a unit of the reserve forces of the United States military. The exemption is limited to not more than 2 motor vehicles. Exempt under K.S.A. 79-5107(e).

Exception

Description

County Assessed: 16M or

greater registration or

Non-highway titled

Motor vehicles that are registered greater than 12M or titled non-highway. The motor vehicles are assessed by the county appraiser for property tax purposes.

County Assessed (MB):
Motorized Bicycle

Motorized bicycles are assessed by the county appraiser for property tax purposes.

County Assessed: Exempt \$750 or less

Registered items with a purchase price of \$750 or less

Humanitarian Exempt:

Motor vehicles of entities specified as exempt by K.S.A. 79-201 and 79-201b. For example, coordinated transit districts, not for profit housing for the elderly, children, or the disabled, certain not for profit private and public schools, places of worship.

Government Exempt: Also,
includes 5-year registration

Motor vehicles of entities specified as exempt by K.S.A. 79-201a. Motor vehicles of political subdivisions such as townships and federal government.

Rental Excise Tax:
Gross Receipts – In
Lieu of Tax

Motor vehicles owned by rental car companies leased for a period not exceeding 28 days. Taxes are based on gross receipts in lieu of property taxes. [\[K.S.A. 79-5117\]](#)

RV-Titled
Recreational Vehicles

Motor homes, travel trailers and campers that meet the qualifications to be titled and registered as a "recreational vehicle". Taxes are based upon age and weight. [\[K.S.A. 79-5118 – 5120\]](#)

RV-Titled
Recreational Vehicles:

RVs that qualify for military exemption under the federal Service Members Civil Relief Act, or K.S.A. 79-5107(e), K.S.A. 79-5121(e)

Tax Roll Motor Vehicles

Motor vehicles registered with a tag weight of 24,000-lbs. (24M) or more and non-highway titled motor vehicles are classified within the **“Motor Vehicle”** subclass and referred to as *“tax roll”* motor vehicles. *“Tax roll”* motor vehicles must be reported to the county appraiser on schedule 4a of the Personal Property Assessment Form. Article 11 Subsection 1 of the Kansas Constitution requires that *“tax roll”* motor vehicles are annually valued at the fair market value of the vehicle, and they are assessed at a rate of 30%. Kansas law allows the county appraiser to adjust the value of *“tax roll”* motor vehicles on an individual basis *if* the vehicle has been damaged. *“Tax roll”* motor vehicles can be prorated onto and off the tax roll when they are acquired or sold during the year; refer to proration rules for guidelines. [\[K.S.A. 79-306d\]](#)

The most common types of *“tax roll”* motor vehicles are medium and heavy-duty trucks and truck-tractors (semi). Light-Duty pickups that are used for commercial or farming purposes often require a heavier tag weight. Therefore, it is not uncommon for a Light-Duty pickup to be registered with a 24M tag and classified as a *“tax roll”* motor vehicle. Non-highway titled motor vehicles are also classified as *“tax roll”* motor vehicles. Non-highway titled motor vehicles can include motorcycles, cars, or trucks that are wrecked or damaged, or classic cars that the owner has placed into storage. Micro utility trucks are non-highway titled and are classified as *“tax roll”* motor vehicles.

Valuing Tax Roll Motor Vehicles

When establishing values for property in the *“Motor Vehicle”* subclass, the county appraiser must follow the procedures and guidelines outlined in the *Personal Property Valuation Guide* prescribed by the Property Valuation Division (PVD). The county appraiser may deviate from the guide on an individual piece of property for just cause and in a manner consistent with achieving market value. [\[K.S.A.79-1412a Sixth; PVD Directive 19-048; K.S.A. 79-1456\]](#)

Specific information about the motor vehicle must be known in order to value the vehicle on the tax roll. In most cases, the **Vehicle Identification Number (VIN)** will disclose most of the information necessary to value the motor vehicle. The vehicle owner can be contacted when additional information is required. Information typically needed to value the tax roll motor vehicles includes:

Motorcycles:

Year, make and model
Model qualifier (if applicable)
Engine size: 800cc, 1200cc, etc.

Automobiles:

Year, make and model
Model qualifier: RX, EX, Z28, etc.
Two-door or four-door
Coupe, sedan, hatchback, wagon
2-wheel drive, 4x4, all-wheel drive
Turbo engine or regular engine
4-cylinder, V-6, V-8 engine

Light-Duty Trucks/ Sport Utility Vehicles:

Year, make and model
Model qualifier: XLT, Lariat, SLE, etc.
Size (1/2 ton, 3 /4 ton, or 1 ton)
2-wheel drive, 4 x 4, all-wheel drive
Cab size: regular, extended, quad, crew
Gas engine or diesel engine
4-cylinder, V-6, V-8 engine

Med/Heavy-Duty Trucks:

Year, make and model
Model qualifier or model number
Cab and Chassis or Truck Tractor
If Truck Tractor: sleeper unit and
Gas engine or diesel engine
Weight: gross vehicle weight
Air brakes or Hydraulic brakes

Non-highway Titled Vehicles (in addition to above information):

Purpose for non-highway title: storage, damage, no insurance, etc.
Condition of vehicle: average, poor, wrecked or damaged
If damaged, type of damage (to help determine market value)
No damage: refer to information above for the type of vehicle

Motorcycles (Non-highway titled motorcycles designed for use on public roads)

- **2026 & 2027 Models** – Use the MSRP from the December 1, 2025, revision date of the *Price Digests Powersport Blue Book* and multiply by 85%.
- **Alternate Method:** Use the “Sugg. List” value from the January-April 2026 edition of the *J.D. POWER Motorcycle/Snowmobile/ATV/Personal Watercraft Appraisal Guide* and multiply by 85%.
- **If no value is listed**, use 85% of the “Sugg. List” value for the same/similar previous year model to estimate market value.
- **2025 – 2005 Models** – Use the “Base Value – High” value from the December 1, 2025, revision date of the *Price Digests Powersport Blue Book* and do not factor this value.
- **Alternate Method:** Use the “Clean Trade-In W/S” value from the January-April 2026 edition of the *J.D. Power Motorcycle/Snowmobile/ATV/Personal Watercraft Appraisal Guide*. Do not factor this value.
- Use values established by a study of the local market for models that cannot be found in the J.D. POWER or Powersport guides. The procedure used must reflect the local market and be documented.

Autos & Light-Duty Trucks (Light-Duty trucks – GVW of 14,000 or less)

- **2026 & 2027 Models** – Use the MSRP given on the “Kansas Vehicle Property Tax Check” estimator, it will calculate the market value for you. Do not factor this value. That calculated value is the estimated “trade-in value” of the vehicle when it was *first offered for sale as new*. The web address for the estimator is:

•

<https://mvs2.dmv.kdor.ks.gov/VehiclePropertyTaxLookup>

- **2026 & 2027** – When not using the estimator, use the MSRP when first offered new from *J.D. POWER Official Used Car Guide* times 85% as the market value.
- **2025 – 2019 Models** – Use the “Clean Trade In” value from the January 2026 edition of the *J.D. POWER Official Used Car Guide*. Do not factor this value.
- **2018– 2009 Models** – Use the “Clean Trade In” value from the January 2026 edition of the *J.D. POWER Official Older Used Car Guide*. Do not factor this value.
- **Older Models not found in the prescribed publications** – Use the values established by a study of the local market. The procedure used must reflect the local market and be documented.

Any of the following procedures may be used to better reflect the local market:

- The “Wholesale Value” from the January 1, 2026 revision date of the Price Digests Automobile Red Book at Price Digests online. Do not factor this value.
- The “Retail” value, multiplied by 83%, from January 1, 2026 revision date in the Price Digests Truck Blue Book may be used if the values better reflect the local market.
- Chassis Cab motor vehicles – use the “Wholesale” value from the January 2026 edition of the *J.D. POWER Official Commercial Truck Guide*.
- For model years 2018 – 2009 only – multiply the 2019 “Trade In” value from the January 2026 edition of the *J.D. POWER Official Used Car Guide* by the appropriate percent good factor listed below to “estimate” market value:

Model Yr	2018	2017	2016	2015	2014	2013	2012	2011	2010	2009
% Good	75%	64%	53%	44%	35%	28%	21%	14%	8%	7%

When establishing values for personal property in the “Motor Vehicle” subclass, the county appraiser must follow the procedures and guidelines outlined in the *Personal Property Valuation Guide* prescribed by the Property Valuation Division (PVD). *However*, the county appraiser may deviate from the guide on an individual piece of property for just cause and in a manner consistent with achieving market value. [[K.S.A. 79-1412a Sixth](#); [PVD Directive 19-048](#); [K.S.A. 79-1456](#)]

Note: The values for chassis cab motor vehicles do not include the value of the truck bed.

Truck beds on chassis cab motor vehicles are classified and valued separately from the truck. Refer to the “Commercial/Industrial Machinery and Equipment” Section of this guide for valuation procedures for commercial truck beds. To value non-commercial truck beds, refer to the “All Other Personal Property Not Elsewhere Classified” section of this guide for valuation procedures. [[K.S.A. 79-1439e](#)]

Medium (GVW 14,001 or greater) & Heavy-Duty Trucks

- **2026 & 2027 Models** – Use the “MSRP” for a new model from the January 1, 2026 edition of the *Price Digests Truck Blue Book* and multiply by 70% to “estimate” the market value of the vehicle. If the new model is not listed, use the “MSRP” for the previous year’s same model from the *Price Digests Truck Blue Book* and multiply by 70% to “estimate” the market value of the vehicle.
- **2025 – 1981 Models** – Use the “Retail” value from the January 1, 2026 edition of the *Price Digests Truck Blue Book* and multiply by 83% to “estimate” market value.
- **2025 – 1981 Models not found in the Price Digests Truck Blue Book Online** – use the “RGH Wholesale” value from the Black Book Official Used Heavy-Duty Truck and Trailer Guide, January 2026 edition. Do not factor this value.

Second Option for Valuing

- If the **model does not populate or shows no value** with the *Price Digests Truck Blue Book* or the Black Book Official Used Heavy-Duty Truck and Trailer Guide, use 2016 model from the January 1, 2026 edition of the *Price Digests Truck Blue Book* and multiply by 83%. **Multiply that amount by the appropriate percent good factor listed below to “estimate” market value.**

Model Yr	2015	2014	2013	2012	2011	2010	2009	2008
% Good	85%	72%	64%	55%	46%	39%	33%	28%
Model Yr	2007	2006	2005	2004	2003	2002	2001	2000
% Good	24%	21%	18%	16%	14%	12%	11%	10%

- **Older Models** not found in the prescribed publications – Use values established by a study of the local market. The procedure used must reflect the local market and be documented.

* Counties may use the “Retail” value from the January 1, 2026 edition of the *Price Digests Truck Blue Book* and multiply by 83% to “estimate” market value, if the values produced better reflect the local market.

When establishing values for personal property in the “Motor Vehicle” subclass, the county appraiser must follow the procedures and guidelines outlined in the *Personal Property Valuation Guide* prescribed by the Property Valuation Division (PVD). However, the county appraiser may deviate from the guide on an individual piece of property for just cause and in a manner consistent with achieving market value. [[K.S.A. 79-1412a Sixth](#); [PVD Directive 19-048](#); [K.S.A. 79-1456](#)]

Note: The values for chassis cab motor vehicles do not include the value of the truck bed.

Truck beds on chassis cab motor vehicles are classified and valued separately from the truck.

Refer to the "Commercial/Industrial Machinery and Equipment" Section of this guide for valuation procedures for commercial truck beds. To value non-commercial truck beds, refer to the "All Other Personal Property Not Elsewhere Classified" section of this guide for valuation procedures

16M/20M Motor Vehicles

In 1998, the legislature passed a law that allowed motor vehicles having a gross vehicle weight of more than 12,000 lbs. but less than 20,001 lbs. to be classified and valued differently than other motor vehicles. Motor vehicles in this category are registered with a 16M or 20M tag. "16M/20M" registered motor vehicles are appraised; assessed; and the tax computed using the same appraisal method; assessment percentage; mill levy and tax minimums as "taxed when tagged" motor vehicles. However, the tax year; appraisal deadlines; penalties; pro-ration; situs requirements and billing procedures are the same as "tax roll" motor vehicles. Since the values are based on a formula, "16M/20M" vehicle *values cannot be adjusted*. "16M/20M" motor vehicles are listed on schedule 4b of the personal property assessment form and the county appraiser certifies the values to the county clerk on a separate appraisal roll for 16M/20M vehicles only. [[K.S.A. 79-5105a](#)]

Valuing 16M/20M Motor Vehicles

Step 1: Determine the class code

Class codes for 16M/20M vehicles can be found on the "Kansas Vehicle Property Tax Check" estimator. The web address for the estimator is:

<https://mvs2.dmv.kdor.ks.gov/vehiclepropertytaxlookup>

Establishing class codes for 16M/20M vehicles follows the same process as "taxed when tagged" vehicles. The MOVRS program establishes the "*trade-in value*" of each motor vehicle based on the manufacturer's suggested retail price (MSRP). The MSRP is obtained from a *Price Digests* data interface which is used to establish the "*trade-in value*". This database is updated monthly. The estimated "*trade-in value*" is calculated by taking the MSRP times 85% for Light-Duty trucks and MSRP times 70% for Medium-Duty trucks. The class codes are determined by establishing the "*trade-in value*" of the vehicle *when it is first offered for sale new*. Once the "*trade-in value*" is established, a class code is assigned to the vehicle using the class code charts. [[K.S.A. 79-5103](#); [79-5104](#)]

Note: PVD will not assign a class code to any semi-truck tractor pursuant to the February 26, 1998 memorandum from the Kansas Division of Vehicles to all county treasurers. In the memorandum, the Division of Vehicles instructed county treasurers "**It will be required that**

all semi-truck tractors be registered for a gross weight of 24,000 (24M) pounds or greater. Therefore, all semi-truck tractors, regardless of their registered tag weight, are classified as "tax roll" motor vehicles within subclass 4 where they are valued at market value and assessed at 30%.

Step 2: Determine the Appraised Value

Appraised values for 16M/20M motor vehicles can be found on the "*Appraised Value Chart*". The vehicle's appraised value is located where the row designating the class code of the vehicle intersects with the column designating the model year of the vehicle. **Except** when, the vehicle's appraised value from the "*Appraised Value Chart*" is less than the county "minimum value" from the "*Minimum Appraised Value Chart*", the "minimum value" from the "*Minimum Appraised Value Chart*" must be used. **The full year appraised value of a 16M/20M motor vehicle should never be less than the county "minimum value" listed on the "*Minimum Appraised Value Chart*".** The "minimum value" listed for each county will generate the \$12.00 or \$24.00 minimum tax required by law.

Note: Each county has a minimum appraised value for 1980 and older models and for 1981 and newer models, so that the taxes generated will meet the statutory requirements. Since 16M/20M motor vehicles are appraised, assessed and the taxes computed using the same appraisal method, assessment percentage, mill levy and tax minimums as "taxed when tagged" motor vehicles, minimum appraised values must be established for each county. Motor vehicles with a model year of 1980 and older must generate a minimum tax of \$12.00 per year. Motor vehicles with a model year of 1981 and newer will eventually reach a minimum tax of \$24.00 per year.

Step 3: Determine the Assessed Value

The assessed value of the 16M/20M vehicle is determined by multiplying the appraised value by the 20% assessment rate applicable to "taxed when tagged" motor vehicles.

16M/20M Motor Vehicle Valuation and Taxation Summary

- Indicates when 16M/20M motor vehicles follow the same rules as taxed when tagged motor vehicles.
- Indicates when 16M/20M motor vehicles follow the same rules as tax roll motor vehicles.
- PVD establishes the "*trade-in value*" of the vehicle when it is "first offered for sale new"
- A class code is assigned to the vehicle by matching the "*trade-in value*" to the appropriate class code value range (see the class code charts)

- The model year of the vehicle and its class code are used to determine the “appraised value” (see the 16M/20M appraised value chart in Appendix B)
- The “appraised value” depreciates 15% per year until the minimum value/tax is reached
- The assessment rate is 20% of the appraised value
- The average county motor vehicle levy from two years prior is used to calculate the tax amount
- The county minimum value for 1980 and older models generates a \$12.00 minimum tax
- The county minimum value for 1981 and newer models generates a \$24.00 minimum tax
- The formula-driven value of the vehicle cannot be adjusted for condition, mileage, etc.
- The property taxes are calculated for the calendar year
- The property taxes are paid to the county where the vehicle has tax situs
- The vehicle is reported to the county appraiser on the personal property assessment form (schedule 4b)
- Penalties are applied to the assessed value when the property list is filed late, or it is not filed at all
- The property taxes are due by December 20th of the tax year and the following May 10th
- The value of the vehicle can be prorated according to K.S.A. 79-306d

2026 Calendar Year 16M/20M Minimum Appraised Value Chart

Appraised values will result in an annual \$12 min/max tax for motor vehicles 1980 or older and an annual \$24 min tax for motor vehicles 1981 and newer as required by KSA 79-5105(a). Appraised values are for a full calendar year and will be less if prorated. The assessment rate for 16M/20M motor vehicles is 20%.

County	2026 Motor Vehicle Mill Levy	1980 & Older	1981 & Newer	County	2026 Motor Vehicle Mill Levy	1980 & Older	1981 & Newer

Proration of Tax Roll and 16M/20M Motor Vehicles

K.S.A. 79-306d outlines the procedures used to list and value tax roll motor vehicles for purposes of property taxation in Kansas. The same proration procedures outlined in this statute are also applied to motor vehicles registered with 16M/20M tags.

The statute distinguishes between vehicles that are traded and vehicles that are sold. A traded or “replaced” vehicle is one for which a replacement vehicle is acquired. A *sold* vehicle is one for which a replacement vehicle is not acquired. A “replacement” vehicle is one that replaces a vehicle that has been listed for assessment and taxation for the calendar year in which the replacement vehicle is acquired. *Typically*, the license plate is transferred from the replaced vehicle to the replacement vehicle.

Motor vehicles acquired or purchased after September 1 are not prorated in the year the vehicle is acquired or purchased. *Motor vehicles that are sold or become subject to taxation as “taxed when tagged” after September 1, are prorated* in the year the vehicle is sold or becomes subject to taxation as “taxed when tagged”.

In accordance with the procedures outlined in K.S.A. 79-306d, the values for tax roll motor vehicles registered 24M or greater and non-highway titled motor vehicles and 16M/20M motor vehicles are prorated in the following manner:

Vehicles that are acquired, purchased, or traded

1) When the vehicle acquired is not a replacement vehicle – the monthly value is multiplied by the number of months (or fraction of a month) remaining in the calendar year. Do not prorate if the vehicle is purchased after September 1.

Example 1: A new vehicle is purchased in May. It does not replace another vehicle. The vehicle value is prorated from May-December. [May is a fraction of a month].

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
-----	-----	-----	-----	------------	------------	------------	------------	------------	------------	------------	------------

2) When the vehicle acquired is a replacement vehicle – the **newly acquired vehicle’s** monthly value is multiplied by the number of months (or fractions thereof) remaining in the calendar year. The **replaced vehicle** is valued by multiplying the monthly value by the number of full calendar months in the calendar year that the vehicle was owned. The values of the vehicles are added together, and the sum of the values equals the total valuation of the motor vehicles for the calendar year. If the “replacement” vehicle is acquired on or after September 1, the traded (replaced) vehicle remains on the appraisal roll and is not pro-rated for taxation purposes.

Example 2: A new vehicle is purchased in March. It replaces another vehicle that is currently on the tax roll (or 16M/20M roll). The new/replacement vehicle value is prorated from March – December. [March is a fraction of a month]. The old/replaced vehicle value is prorated from January – February. [The number of full calendar months the vehicle was owned]

The values are added together for the full calendar year.

- Old/replaced vehicle: January – February.
- New/replacement vehicle: March – December.

Old Vehicle:

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
------------	------------	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----

New Vehicle:

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
-----	-----	------------	------------	------------	------------	------------	------------	------------	------------	------------	------------

Example 3: A new vehicle is purchased in September. It replaces another vehicle that is currently on the tax roll (or 16M/20M roll). The new/replacement vehicle is not prorated when it is acquired after September 1. The old/replaced vehicle remains on the appraisal roll and the vehicle is valued from January – December.

Old Vehicle:

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
------------	------------	------------	------------	------------	------------	------------	------------	------------	------------	------------	------------

New Vehicle:

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----

Vehicles that are disposed of or become subject to taxation as “taxed when tagged”.

Anytime during the tax year when a motor vehicle assessed and taxed on the tax roll (or 16M/20M roll) is sold and not replaced or becomes subject to taxation as “taxed when tagged”, the vehicle is valued by multiplying the monthly value by the number of months (or fractions thereof) in the calendar year that the vehicle was owned or **not** subject to taxation as “taxed when tagged”. Prorate if the vehicle is sold or becomes registered as “taxed when tagged” after September 1.

Example 1: A taxpayer owned a vehicle that was on the tax roll (or 16M/20M roll). He sold it in October and did not replace it. The vehicle value is prorated from January – October. [October is a fraction of a month it was owned].

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
------------	------------	------------	------------	------------	------------	------------	------------	------------	------------	-----	-----

Note: When “taxed when tagged” motor vehicles are switched to the tax roll **or** 16M/20M roll, the tax roll value is prorated starting with the first month the tax is not prepaid under “taxed when tagged”.

Example 2: A taxpayer owned a non-highway-titled vehicle that was on the tax roll. He put a 12M tag on it (taxed when tagged) in August. The vehicle taxes are prorated on the tax roll for the number of months the vehicle is **not** subject to taxation as “taxed when tagged”.

Calculating prorated values:

To calculate the prorated value of a motor vehicle according to K.S.A. 79-306d, the full year value is divided by 12 to get the monthly value. The monthly value is then multiplied by the number of calendar months in the year that the vehicle is subject to taxation to get the prorated value. The vehicle in the example below was owned for 8 months.

Example 1:

$8500 \text{ (full yr. value)} / 12 = 708.33333 \text{ (monthly value)} \times 8 = 5666.6666 \text{ or } 5667 \text{ (prorated value)}$

When the prorated value of a motor vehicle must be manually calculated, the value produced by the factors below will closely resemble the electronically generated tax roll value. This chart converts the number of taxable months into a proration factor that can be multiplied by the full year appraised value to get the prorated value. Counties may use this chart at their option. These factors and the value generated by them are not meant to replace the factors or the tax roll values that are electronically generated by the county.

Example 2:

$8500 \text{ (full yr. value)} \times .666666 \text{ (8-month proration factor)} = 5666.661 \text{ or } 5667 \text{ (prorated value)}$

Monthly Proration Chart

Number of Months On Tax Roll	Proration Factor
1	.083333
2	.166666
3	.250000
4	.333333
5	.416666

Number of Months On Tax Roll	Proration Factor
6	.500000
7	.583333
8	.666666
9	.750000
10	.833333
11	.916666
12	1.000000

Flow chart for valuation and taxation of "taxed when tagged", tax roll and 16M/20M motor vehicles.

“RV-Titled” Recreational Vehicles

Motor homes, campers, and travel trailers that meet the statutory definition of recreational vehicle are required to be titled as recreational vehicles. RV-Titled vehicles are classified under the “taxed when tagged” category. The property taxes are based on the **age and weight** of the recreational vehicle. The “age and weight” based tax value *cannot* be adjusted for condition or mileage of the vehicle.

Kansas law defines a “recreational vehicle” (RV) as a vehicular-type unit built on or for use on a chassis and designed primarily as living quarters for recreational, camping, vacation or travel use, and which has its own motive power or is mounted on or drawn by another vehicle and which has a body width not exceeding 102 inches (8 ½ ft) and a body length not exceeding 45 feet and has ALL the following features:

- an electrical system which operates above 12 volts
- provisions for plumbing
- heating
- and any other standard feature/component adopted in the uniform standards code for RVs. [[K.S.A. 79-5118](#); ANSI 119.2]

Campers recognized as slide-in, truck, pickup, or truck bed campers are not built on or for use on a chassis, so they cannot be registered as a recreational vehicle pursuant to this statute. Additionally, truck campers are not titled in Kansas, they do not typically have a VIN number, and they are not typically required to have insurance, which are all requirements for recreational vehicle registration. Motorhomes, travel trailers, and fifth-wheel travel trailers are different from truck campers because they are built on a chassis, they are titled in Kansas, they require insurance, and they are assigned VIN numbers. If they meet the other requirements under K.S.A. 79-5118, they may be registered as a recreational vehicle.

Non-traditional recreational trailers, such as horse trailers and car haulers, which are now designed and manufactured with living quarters, *may* qualify for the RV Title *if* they meet the statutory definition of a recreational vehicle. The trailer *must meet all requirements* in the statutory definition to be RV-Titled and considered a “travel trailer” as defined in K.S.A. 8-1490. [[K.S.A. 79-5118 - 5121,8-1490](#)]

Campers, travel trailers, and non-traditional recreational trailers that do not qualify for the RV Title are classified within the “Other” subclass and they are reported on Schedule 6 of the personal property rendition. Refer to the “Other Personal Property Not Elsewhere Classified” section of this guide for information on valuing campers and trailers that are not RV-Titled.

“Other” subclass values are market-based and may be adjusted for condition. As of January 1, 2023, all personal property in the “Other” subclass is prorated onto or off of the tax roll when it is purchased or sold during the year.

Note: *Travel trailers* are not exempt under K.S.A. 79-267 because travel trailers are a defined term and customarily classified differently than a “trailer”, regardless if it is registered and taxed as an RV using age and weight, or if it is listed, valued, and taxed as personal property on a rendition in Subclass 6. [[PVD Memo HB 2231 PP Exemption-Travel Trailers, November 13, 2025.](#)]

If the recreational vehicle meets ALL the criteria listed in the statute, it will be registered as an “RV-Titled” recreational vehicle. The following scale is used to calculate the taxes.

<u>Age Prior to the Calendar Year of Registration</u>	<u>Tax Calculation</u>
--------------------------------------------------------------	-------------------------------

5 years or less	\$70.00 plus	\$.90 per 100 pounds of weight
6 years to 10 years	\$50.00 plus	\$.70 per 100 pounds of weight
11 years or more	\$30.00 plus	\$.50 per 100 pounds of weight

RV-Titled vehicles, like taxed when tagged, have registration years which are based on parts of two calendar years. When an RV changes age category the calculation for taxes will be split between two age categories for the registration period. The number of months in each calendar year, will be determined by the primary owner’s name.

The weight used to calculate the taxes for RV-Titled vehicles is the “curb weight” or “shipping weight”. The Manufacturer’s Certificate of Origin (MCO) typically lists the shipping weight. The **GVW** (gross vehicle weight), **cannot be used to calculate RV-Titled vehicle taxes**. If the shipping weight is not reflected on the MCO or the title, the vehicle must be weighed on a certified scale and the taxpayer must provide a certified weight ticket showing the weight of the vehicle.

If the vehicle cannot be weighed and an accurate weight is not available, the *J.D. POWER Recreational Vehicle Appraisal Guide* may be used. The weight listed in the *J.D. POWER Guide* is the unloaded weight of the vehicle up to 9,999 lbs. Vehicles with an unloaded weight of 10,000 lbs. or more are reflected in the *J.D. POWER Guide* with an erroneous weight of 9,999 lbs. As a result, the *J.D. POWER Guide* should not be used for RVs listed with a weight of 9,999 lbs. (10,000 lbs. or more). The *J.D. POWER Recreational Appraisal Guide* also does not list weights for motor homes. Another resource that may be used to find the weight of a RV (including some motor homes) is the *Recreational Vehicle Blue Book*.

Example: 2025 Winnebago Adventurer Coach
Weight = 22,000 lbs.
\$.90 = rate per 100 lbs.
\$70.00 = flat rate for age (5 years old or less)

Step 1: $22,000 / 100$ (rate is for every 100 lbs. of weight) = 220 cwt. (factor per 100 lbs.)

Step 2: $220 \text{ cwt.} \times \0.90 (rate per 100 lbs.) = \$198.00 (taxes for weight)

Step 3: $\$198.00 + \70.00 (taxes for age**) = \$268.00 (total taxes for 1 full year)

* Round up to next even hundred weight

** Application year minus model year

Note: Motor homes that do not qualify for the RV Title and are registered at 12,000 pounds or less are classified as "taxed when tagged" motor vehicles. *If* the motor home is registered above 12,000 pounds it is classified as a 16M/20M or a tax roll motor vehicle and it is reported on schedule 4 of the personal property rendition.

RV-Titled Vehicle Exemption:

The "RV-Titled" recreational vehicles owned by military members and/or their spouse that **do not claim Kansas** as their permanent resident state may qualify for exemption under the Service Members Civil Relief Act. Military personnel owning "RV-Titled" recreational vehicles **claiming Kansas** as a permanent resident state **may** qualify for exemption pursuant to K.S.A. 79-213(l), which was amended to **no longer require** a Board of Tax Appeals order exempting "RV-Titled" recreational vehicles for military personnel qualifying for exemption per K.S.A. 79-5107(e) and K.S.A. 79-5121(e). An application for exemption should be filed with the Board of Tax Appeals if there is doubt whether the property qualifies for exemption.

Antique Titled Motor Vehicles

Kansas statutes define an antique vehicle as "any vehicle more than thirty-five (35) years old, propelled by a motor using petroleum fuel, steam or electricity or any combination thereof."

Vehicles that satisfy the statutory requirements for an antique vehicle may qualify for an antique vehicle title. Vehicles which are operational are issued a title that is branded "antique title," and the vehicle is registered for highway operation. Vehicles which are not operational are issued a title that is branded "antique title only" for non-highway use. An "antique registration only" can be applied for at a later date if the owner wishes to use the vehicle on public highways.

The method of taxing a motor vehicle does not change when it is registered as an antique. A vehicle that is issued an "antique title" and registered for highway use continues being assessed and taxed in the same manner as it was or would have been prior to being titled and registered as an antique vehicle. Vehicles that are issued an "antique title only" for non-highway use are assessed and taxed on the tax roll the same as any other non-highway titled vehicle.

"Antique Title" Vehicles registered for highway use are taxed as follows

1. "Taxed when Tagged" motor vehicles (12,000 lbs. or less):

A motor vehicle that was *"taxed when tagged"* prior to its antique title-registration should continue being taxed in the same manner. The county treasurer is responsible for notifying owners of the \$12.00 annual tax for *"taxed when tagged"* antique vehicles.

2. "16M/20M" motor vehicles (16,000 or 20,000 lbs.):

A motor vehicle that was *"16M/20M"* prior to its antique title-registration should continue being taxed on the *"16M/20M"* tax roll. A *"16M/20M"* antique vehicle is reported on a personal property rendition and valued based on the formula used to value *"taxed when tagged"* motor vehicles.

3. "Tax Roll" motor vehicles (24,000 lbs. or greater):

A motor vehicle that was a *"tax roll"* motor vehicle prior to its antique title-registration should continue being taxed on the tax roll. *"Tax roll"* antique vehicles are reported on a personal property rendition and are appraised at fair market value.

"Antique Title Only" Vehicles for non-highway use are taxed as follows:

Vehicles that are issued an "antique title only" for non-highway use are reported on a personal property rendition and they are appraised at fair market value the same as any other non-highway titled vehicle. [[K.S.A. 8-166-8-170](#); [79-306d](#); [79-5100 series](#)]

A *"non-highway titled"* or *"antique title only"* motor vehicle that is subsequently registered for highway use as an *"antique title"* vehicle is then taxed in the same manner as it was when last registered for highway use.

Note: The *market value* of some classic antique vehicles may be higher than the *market value* of other older vehicles that are not considered *"classics."*

Kit Vehicles

Kit vehicles are generally replicas of classic production vehicles. The *"kit"* is sold to an individual who must purchase other parts (engine, tires, etc.) to assemble the vehicle. The *"kit"* is sold with a title that indicates the year, make and model the *"kit"* vehicle will resemble after it is

assembled. For example, the “kit” title may indicate the vehicle is a 1966 Shelby Cobra. Upon its completion, the Kansas title for the 1966 Shelby Cobra “kit” car which was inspected and titled in the year 2012, would appear as follows:

Year: 2012 **Make:** MFGD (manufactured) **Model:** Kit66 **VIN:** KS100001

Model Year – determined by the year the kit vehicle is inspected by the highway patrol.

Make – “MFGD” is the designated make for all kit vehicles that meet the criteria.

Model – the make abbreviation and two-digit year of kit body used for the kit vehicle.

Vehicle Identification Number (VIN) – since a kit vehicle is not a “mass produced” vehicle, the Kansas VIN that begins with the letters KS is assigned by the Highway Patrol when the vehicle is inspected.

Valuing Kit Vehicles

After it is fully assembled and ready for use on public roads, the kit vehicle must pass inspection by the Kansas Highway Patrol. The year, make, model and VIN of the vehicle is determined by the Highway Patrol and documented on the “MVE-1” inspection form. The county appraiser is responsible for determining market value for tax roll vehicles. PVD determines class codes for taxed when tagged and 16M/20M kit vehicles. Since a “Manufacturers Suggested Retail Price” on which to base the class code for a kit vehicle does not exist, the appraiser must obtain the *total cost* to produce the kit vehicle. Kit vehicles built by companies that specialize in the production of kit vehicles for resale are referred to as “Turnkey” vehicles. The “turnkey” price can be used as the “total value base” when determining the class code or market value of the kit vehicle.

Taxed When Tagged and 16M/20M Vehicles (12M or less and 16M/20M)

The “Valuation of Kit or Assembled Vehicle Worksheet” can be used to collect the cost data necessary for PVD to determine the vehicle class code. Fax the completed worksheet along with the MVE-1, vehicle titles, and all invoices or cost data to the PVD Personal Property Section. PVD will notify the county once a class code is determined for the taxed when tagged or 16M/20M motor vehicle.

When the documentation provided is not sufficient to determine a class code, PVD staff will need to contact the vehicle owner for additional information. [\[K.S.A. 79-5100 series\]](#)

Tax-roll Vehicles (24M or greater and Non-highway):

The "Valuation of Kit or Assembled Vehicle Worksheet" can be a useful tool for documenting the value of a *newly assembled* kit vehicle. **If a comprehensive list of all components, labor, paint and reasonable costs for each** are provided, the "total base value" *may* represent the market value of the *newly assembled* vehicle. Once the market value is established, follow the procedures for Tax Roll Motor Vehicles found in the *Motor Vehicle* section of the guide. The county appraiser must annually determine the market value of kit vehicles on the tax roll. [[K.S.A. 79-306d](#)]

Valuation of Kit or Assembled Vehicle Worksheet

A comprehensive list of all components, labor, paint and reasonable costs for each must be listed. The actual documented retail costs to the assembler must be documented. If the costs to the assembler are not available, a supportable estimate of retail costs and their source can be documented. For assistance contact the PVD Personal Property Section.

Tax Roll Motor Vehicles: the "Total Value Base" **may** reflect the market value of the *newly assembled* vehicle **if** a comprehensive list of **costs for all** components, paint, & labor is provided.

Taxed when Tagged and 16M/20M vehicle class codes: Fax the completed worksheet along with all support documentation to the PVD Personal Property Section.

Item	Cost
Kit package	\$ _____

Estimated Labor Costs:	\$ _____
Total Value Base	\$ _____

Assembled Vehicles

Assembled vehicles are vehicles made from the parts (frame, engine, and body) of three different vehicles. Unibody vehicles are made from the parts of two different vehicles. Assembled vehicles are not mass-produced vehicles. Usually an individual builds (assembles) a vehicle from the parts of different vehicles to create a “new” vehicle. ***Simply installing a new engine in a vehicle is not considered an assembled vehicle.*** An example of an assembled vehicle would be a 1985 Ford body, 1979 Chevy frame, and a 1982 Ford engine made into one vehicle. Upon its completion, the Kansas title for this assembled vehicle, if inspected and titled in the year 2014, would appear as follows:

Year: 2014 **Make:** Asve **Model:** Ford85 **Vin:** Manuf. VIN or KS100001

Model Year – determined by the year the assembled vehicle is inspected by the highway patrol.

Make – “ASVE” is the designated make for all assembled vehicles that meet the criteria.

Model – four-letter make abbreviation and two-digit year of vehicle body used to make the assembled vehicle.

Vehicle Identification Number (VIN) – the manufacturer’s VIN from the vehicle body, if the manufacturer’s VIN has been lawfully removed, the Kansas VIN that begins with the letters KS is assigned by the Highway Patrol when the vehicle is inspected.

Valuing Assembled Vehicles

After it is fully assembled and ready for use on public roads, the assembled vehicle must pass inspection by the Kansas Highway Patrol. The year, make, model and VIN of the vehicle is determined by the Kansas Highway Patrol and documented on the “MVE-1” inspection form. The county appraiser is responsible for determining the market value of “tax roll” vehicles. PVD determines class codes for taxed when tagged and 16M/20M vehicles. Since a “Manufacturers Suggested Retail Price” on which to base the class code for an assembled vehicle does not exist, the appraiser must obtain the *total cost* to produce the assembled vehicle.

Taxed When Tagged and 16M/20M Vehicles (12M or less and 16M/20M)

The “Valuation of Kit or Assembled Vehicle Worksheet” can be used to collect the cost data necessary for PVD to determine the vehicle class code. Fax the completed worksheet along with the MVE-1, vehicle titles, and all invoices or cost data to the PVD Personal Property Section. PVD will notify the county once a class code is determined for the taxed when tagged or 16M/20M motor vehicle. When the documentation provided is not sufficient to determine a

class code, PVD staff will need to contact the vehicle owner for additional information. [[K.S.A. 79-5100 series](#)]

Tax-roll Vehicles (24M or greater and Non-highway):

The "Valuation of Kit or Assembled Vehicle Worksheet" can be a useful tool for documenting the value of a *newly assembled* vehicle. **If a comprehensive list of all components, labor, paint and reasonable costs for each** are provided, the "total base value" *may* represent the market value of the *newly assembled* vehicle. Once the market value is determined, follow the procedures for Tax Roll Motor Vehicles found in the *Motor Vehicle* section of the guide. The county appraiser must annually determine the market value of assembled vehicles on the tax roll. [[K.S.A. 79-306d](#)]

Gray Market Motor Vehicles

A "Gray Market" motor vehicle is defined for valuation purposes as "a foreign-produced motor vehicle that is imported outside regular manufacturer distribution channels." These vehicles are manufactured for sale in foreign countries only. Owners moving to this country typically bring the vehicles into the United States.

The vehicle identification number (VIN) for the gray market vehicle is slightly different than the VIN for the same model U.S.-produced vehicle. As a result, a class code cannot be found in the state motor vehicle system for a gray market vehicle that is registered taxed when tagged or 16M/20M. The PVD Personal Property Section can assist the county with taxed when tagged and 16M/20M class codes for gray market vehicles.

Gray market vehicles that are registered 24M or greater tag or are non-highway titled are classified as tax roll motor vehicles. Tax roll motor vehicles are valued at market value for property tax purposes. To determine the market value of a gray market vehicle, the county appraiser can use the "trade in" value from the *J.D. POWER Official Used Car Guide* for a similar year, make and model U.S.-produced vehicle. A similar value from another nationally recognized automobile pricing guide could also be used or the county appraiser can consult with two or more independent experts to obtain an estimate of market value. Your findings must be documented. [[K.S.A. 79-5100 series](#); [79-306d](#)]

Ambulances

Ambulances are generally categorized into three "types". PVD makes a distinction between "Type I" ambulances built on a one ton or less chassis (Light-Duty), and "Type I" ambulance built on greater than one-ton chassis (medium/Heavy-Duty) for valuation purposes.

Type I (Light-Duty): Consists of a modular unit with para-medical equipment integrally installed. The module is mounted on a small truck chassis of one ton or less.

Type I (Med. Duty): Consists of a modular unit with para-medical equipment integrally installed. The module is mounted on a Medium/Heavy-Duty truck chassis greater than one ton.

Type II: Is a van conversion that includes para-medical equipment. This type of ambulance is becoming obsolete, and few dealers are selling them.

Type III: Is similar to a Type I ambulance, but wider. The module is mounted on an RV Cutaway or widened van and has a walk-through compartment from the driver cab to the back section.

Most ambulances are valued and taxed under the **“Taxed When Tagged”** system. Use the table to determine the class code for the appropriate type of ambulance. The county appraiser cannot adjust the value of taxed when tagged motor vehicles.

Ambulances registered with a 16M/20M tag: use the “Class Codes for Ambulances Registered 12M or 16M/20M” chart to determine the class code. Once the class code is determined, refer to the “16M/20M Motor Vehicles” Section of this guide for valuation procedures. The county appraiser cannot adjust the value for 16M/20M registered motor vehicles.

Ambulances valued on the tax roll: multiply the appropriate replacement cost new value by the percent good factor for the model year of the vehicle to determine its market value. The county appraiser can adjust the value of a tax roll vehicle if the vehicle has been damaged or wrecked.

1980 and older models: if a class code has not been previously assigned to a 1980 and older model vehicle, assign a class code one to generate the \$12.00 minimum tax required by law.

Ambulance Replacement Cost New

Type:	Type I-Lt Duty	Type I-Med Duty	Type II	Type III
Gas.	\$170,999	N/A	\$97,000	\$170,999
Diesel	\$167,000	\$221,000	\$102,500	\$153,000

Ambulance Percent Good Scale

Model Yr:	2025	2024	2023	2022	2021	2020	2019	2018	2017	2016
% Good:	85%	80%	75%	70%	50%	30%	25%	20%	15%	10%

Note: Functional obsolescence may have an impact on the value of certain specialized medical-type equipment in ambulances. The county appraiser may deviate from the guide on an individual piece of property for just cause and in a manner consistent with achieving market value. [[K.S.A. 79-5100 series](#); [79-306d](#); [79-1456](#)]

School Buses

School buses that are registered to operate under a “haul for hire” authority are state assessed for property purposes. School buses that are county assessed for property tax purposes are generally valued and taxed under the **“Taxed When Tagged”** system.

Use the table to determine the class code for the school bus. Match the model year with the rated number of seats to determine the class code. The county appraiser cannot adjust the value of taxed when tagged motor vehicles.

School Buses registered with a 16M/20M tag: use the “Class Codes for School Buses Registered 12M or 16M/20M” chart to determine the class code. Once the class code is determined, follow the valuation procedures outlined in the “16M/20M Motor Vehicles” Section of this guide. The county appraiser cannot adjust the value for 16M/20M registered motor vehicles.

School Buses valued on the tax roll: multiply the appropriate replacement cost new value by the percent good factor for the model year of the vehicle to determine its market value. The county appraiser can adjust the value of a tax roll vehicle if the vehicle has been damaged or wrecked.

1980 and older models: if a class code has not been previously assigned to a 1980 and older model vehicle, assign a class code one to generate the \$12.00 minimum tax required by law.

School Bus Replacement Cost New

Small Buses

Small buses are typically built on a van chassis with a specialized conversion package added, or on a commercial/RV cutaway chassis with a specialized body added. These types of buses are commonly used as shuttle buses, medical patient transports, institutional courtesy vehicles or very small school buses.

Generally, this type of bus is registered with a 12M tag and valued and taxed under the "Taxed When Tagged" system. Use the table on the next page to determine the class code. The county appraiser cannot adjust the value for taxed when tagged motor vehicles.

Small buses registered with a 16M/20M tag: use the "Class Codes for Small Buses Registered 12M or 16M/20M" chart to determine the class code. Once the class code is determined, follow the valuation procedures outlined in the "16M/20M Motor Vehicles" Section of this guide. The county appraiser cannot adjust the value for 16M/20M registered motor vehicles.

Small buses valued on the tax roll: multiply the total replacement cost new value by the percent good factor for the model year of the vehicle to determine its market value. The county appraiser can adjust the value of a tax roll vehicle if the vehicle has been damaged or wrecked.

1980 and older models: if a class code has not been previously assigned to a 1980 and older model vehicle, assign a class code one to generate the \$12.00 minimum tax required by law.

Intermediate and Large Transit Buses

Intermediate and large transit buses have a net (empty) weight over 12,000 pounds. Therefore, they should never be registered under the **taxed when tagged** system. The title may reflect the chassis weight only, which does not include the body of the bus or the weight of the passengers.

Intermediate and large transit buses registered with a 16M/20M tag: call the PVD Personal Property Section for a class code. Once the class code is determined, follow the valuation procedures outlined in the "16M/20M Motor Vehicles" Section of this guide. The county appraiser cannot adjust the value for 16M/20M registered motor vehicles.

Intermediate and large transit buses valued on the tax roll: multiply the total replacement cost new value by the percent good factor for the model year of the vehicle to determine its market value. The county appraiser can adjust the value of a tax roll vehicle if the vehicle has been damaged or wrecked.

Intermediate & Large Transit Bus Replacement Cost New

Seats	16-25	28	35	44	65
Value	403,700	411,000	413,000	447,000	475,900

Note: Values include diesel engine, air conditioning, and wheelchair lift. **Add** 3,000 for cushion seats. **Deduct** 25,000 for no wheelchair lift. **Deduct** 20,000 for no air conditioning.

Intermediate & Large Transit Bus Percent Good Scale

Model Yr	2025	2024	2023	2022	2021	2020	2019	2018	2017	2016
% Good	75%	65%	55%	45%	35%	30%	25%	20%	15%	10%

Completely remanufactured transit buses are to be considered new as of the year of remanufacture. The new or depreciated value is factored by .667 to account for loss in value because of depreciation due to "bone structure" and functional obsolescence.

Because of the various types and quality levels of buses within this class, it is recommended that careful consideration be given to situations in which values of buses may be higher than the values claimed by taxpayers. Vehicle inspection, examination of bills of sale, and conversations with dealers or manufacturers are recommended. You may also contact PVD for assistance. [[K.S.A. 79-306d](#); [79-5105a](#)]

Inter-City Buses

Inter-city buses have a net (empty) weight over 12,000 pounds. Therefore, they should never be registered under the **taxed when tagged** system. The title may reflect the chassis weight only, which does not include the body of the bus or the weight of the passengers.

Inter-city buses registered with a 16M/20M tag: call the PVD Personal Property for a class code. Once the class code is determined, follow the valuation procedures outlined in the “16M/20M Motor Vehicles” Section of this guide. The county appraiser cannot adjust the value for 16M/20M registered motor vehicles.

Inter-city buses valued on the tax roll: multiply the total replacement cost new value by the percent good factor for the model year of the vehicle to determine its market value. The county appraiser can adjust the value of a tax roll vehicle if the vehicle has been damaged or wrecked.

Inter-City Bus Replacement Cost New

Seats	39	45	47	49	55
Value	250,000	275,000	535,000	535,000	540,000

Note: Values include diesel engine and air conditioning.

Add 33,000 for wheelchair lift with door.

72 seat bus omitted due to lack of sources.

Hearses

Most hearses are valued and taxed under the “**taxed when tagged**” system. Use the chart to determine the class code. The county appraiser cannot adjust the value for taxed when tagged motor vehicles.

Hearses registered with a 16M/20M tag: use the “Class Codes for Hearses Registered 12M or 16M/20M” chart to determine the class code. Once the class code is determined, follow the valuation procedures outlined in the “16M/20M Motor Vehicles” Section of this guide. The county appraiser cannot adjust the value for 16M/20M registered motor vehicles.

Hearses valued on the tax roll: multiply the appropriate replacement cost new value by the percent good factor for the model year of the vehicle to determine its market value. The county appraiser can adjust the value of a tax roll vehicle if the vehicle has been damaged or wrecked.

1980 and older models: if a class code has not been previously assigned to a 1980 and older model vehicle, assign a class code one to generate the \$12.00 minimum tax required by law.

Limousines

A limousine is defined as “a custom designed interior for a sedan automobile. In most cases cut and stretched to increase the seating capacity.” Limousines do not have special vehicle identification numbers to indicate what they are. Most limousines are made from Cadillac and Lincoln chassis. However, the popularity of converting sport utility vehicles, pickups and Hummers into limousines is increasing.

The automobile chassis or frame is cut in half and extensions are added to “stretch” the length of the vehicle and a limousine conversion package is then added to the stretched frame to fabricate the limousine. The cost of a conversion package can range anywhere from \$20,000 to \$50,000 or more. Converting a vehicle into a limousine significantly increases the base retail price for the completed vehicle. As a result, the class code for a limousine will be much higher than an automobile without the limousine conversion.

Contact the PVD Personal Property Section for a class code or additional valuation instructions whenever the vehicle being registered is a limousine.

Kalmar/Ottawa and Capacity Brand Yard/Terminal Tractors

Yard *tractors* are built on a medium or heavy-duty chassis and typically have a cab that holds one person. The yard *tractors* are designed to move items around in ports, container facilities, distribution centers, etc. Most yard *tractors* are used only on the business property or “yard” and are not driven on the roadways.

Some models of yard *tractors* are specifically manufactured as off-road vehicles. Off road yard tractors that are not made for use on public roads are classified within the “Commercial” subclass and valued in the same manner as other commercial and industrial machinery and equipment. Refer to the “Commercial/Industrial Machinery and Equipment” section of this guide for information on valuing equipment in the commercial subclass.

Other models of yard tractors come with a DOT automotive certified engine, they are street legal and have a 17-digit VIN. Yard tractors that are manufactured for use on public roads should be classified and valued as tax roll because they are considered truck-tractors.

Yard tractors valued on the tax roll: multiply the total replacement cost new value by the percent good factor for the model year of the vehicle to determine its market value. The county appraiser can adjust the value of a tax roll vehicle if the vehicle has been damaged or wrecked.

Model Yr	2025	2024	2023	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013	2012
% Good	76%	61%	47%	38%	32%	26%	21%	17%	14%	12%	10%	9%	8%	7%

Note: PVD will not assign a class code to any semi-truck tractor pursuant to the February 26, 1998 memorandum from the Kansas Division of Vehicles to all county treasurers. In the memorandum, the Division of Vehicles instructed county treasurers **“It will be required that all semi-truck tractors be registered for a gross weight of 24,000 (24M) pounds or greater”**. Therefore, all semi-truck tractors, regardless of their registered tag weight, are classified as “tax roll” motor vehicles within subclass 4 where they are valued at market value and assessed at 30%.

Commercial Vehicles

Beginning January 1, 2014, the commercial vehicle fee will replace the current property tax for both interstate and intrastate commercial vehicles. County appraisers will **not** be valuing the **commercial vehicles**. Commercial vehicle registration fees and commercial vehicle fees will be collected on all commercial vehicles registered in Kansas at the same time and same location.

A **commercial vehicle** is any self-propelled or towed motor vehicle engaged in commerce that is used to transport property or passengers when the vehicle:

1. Has a gross vehicle weight or gross combination vehicle weight of 10,001 pounds or more, or
2. Is designed to be used to transport 15 or more passengers, including the driver, or
3. Is used to transport hazardous materials in a quantity requiring placarding.

The term "Commercial Vehicle" does not include public utility motor vehicles. [\[K.S.A. 8-143m\(a\)\]](#)

Vehicles that meet this definition will change to a "Commercial" registration. Owners of these commercial vehicles must obtain a U.S. DOT number or verify that their DOT number has been updated within the past 12 months. To update or apply for a DOT number, they should visit the following website <https://www.fmcsa.dot.gov/registration/updating-your-registration>.

Commercial vehicle owners should contact their local county treasurer's office to verify that commercial vehicle registration is offered there or visit the www.truckingks.org website to obtain a list of county offices that are offering this service.

Additional information can be obtained at www.truckingks.org, from the Commercial Vehicle Registration section, or by calling the Commercial Motor Vehicle Office. [\[K.S.A. 8-143m\]](#)

2.05 Commercial/Industrial Machinery and Equipment

Generally speaking, commercial and industrial machinery and equipment is any taxable, tangible personal property [*except* for state assessed property and motor vehicles] that is used to produce income or is depreciated or expensed for IRS purposes. The Kansas Constitution classifies personal property that qualifies as **Commercial/Industrial Machinery and Equipment** (“Commercial”) into Class 2, Subclass 5 (2.05). “Commercial” personal property is listed on a *tangible personal property assessment form* (rendition) pursuant to K.S.A. 79-300 series. Property in the “Commercial” subclass of personal property is listed on *schedule 5* of the rendition.

Valuing Commercial/Industrial Machinery and Equipment

Property assessed in the “Commercial” subclass of personal property is not valued at its fair market value; *rather* it is valued based upon a formula laid out in the Kansas Constitution. Kansas statutes allow the appraiser to deviate from the prescribed values *only* in a manner consistent with achieving market value. Since the value of commercial and industrial machinery and equipment is not a fair market value, it cannot be adjusted for condition or obsolescence. Machinery and equipment in the “Commercial” subclass is assessed at 25% of the appraised value. [Ks. Constitution Art. 11 Sec. 1; [K.S.A. 79-1439\(2\)](#); [79-1456](#)]

In Kansas, the assessment date for all taxable personal property is January 1. Commercial and industrial machinery and equipment is *generally* not pro-rated onto or off of the tax-roll, *except for* watercraft that qualifies for this subclass and property that becomes exempt or no longer qualifies for exemption.

The Kansas Constitution states that commercial and industrial machinery and equipment, for so long as it is “being used”, must be appraised using the formula outlined below:

1. Establish the **retail cost when new** (RCWN) of the asset;
2. Apply **straight-line depreciation** to the RCWN of the asset to determine its appraised value:
 - depreciate the RCWN over the *economic life* of the asset *if* its economic life is seven years or less;
 - depreciate the RCWN over a maximum of seven years *if* the economic life of the asset is over seven years;
3. The *appraised* value cannot be less than 20% of the RCWN as long as the asset is “being used” for commercial and industrial purposes.

Note: Machinery and equipment that is fully depreciated or expensed for IRS purposes is classified and valued in the same manner as any other property in the Commercial classification.

Retail cost when new (RCWN):

The Kansas Constitution requires the valuation process for machinery and equipment in the "Commercial" subclass begin with the "retail cost when new". For purposes of personal property taxation, RCWN is the total amount a consumer would pay to acquire new property in order to use it to produce income over a period of years in a commercial or industrial setting. Retail cost when new is not the used sale price, and it is not the wholesale or manufacturer's cost. It is the dollar amount an item would cost a consumer when the item is purchased new at the retail level of trade. For purposes of personal property taxation, the term "retail cost when new" does not include sales tax or freight and installation charges that are separate and readily discernible from the set retail price.

Sales Tax, Freight and Installation:

In 1997, the Kansas Supreme Court (Board of Leavenworth County Comm'rs. V. McGraw Fertilizer Serv., Inc.), stated that for purposes of determining ad valorem values:

- sales tax is never included in the "retail cost when new";

AND

- freight and installation costs, added on after the retail price has been set, should not be included in the "retail cost when new" if the *add-on* costs are charged separately and are readily discernible from the *actual* sales price of the item.

What are add-on costs? The court states that add-on costs are those costs *incurred separately by the consumer after the retail cost has been set that have less to do with the value of the item and more to do with how and where the consumer is going to use it*. The court also states that [a]ll costs normally passed on to the consumer in setting the retail sales price are to be included in the valuation of personal property.

In terms of personal property constructed on site, the point at which the property is an item that a consumer would buy must first be determined. Which costs were necessary to build an item that a consumer could buy, without worrying about the logistics of actually installing it in a particular place? The add-on costs after that point, which *have less to do with the value of the item and more to do with how and where the item will be used*, are excluded from the retail cost when new if those add-on costs are charged separately and are readily discernible.

Economic Life:

The economic life of machinery and equipment in the "Commercial" subclass is required to determine its appraised value. The economic life is used for depreciation purposes if the asset has a seven-year life or less. Assets with economic lives that are less than seven years are depreciated over the economic life of the asset. Assets with economic lives of seven years or more are depreciated over seven years. Economic lives are also used to determine the "used factor" that is applied to the used purchase price of an asset in order to estimate its "retail cost when new".

The *Commercial & Industrial Property Economic Lives* table is used to determine economic lives of machinery and equipment in the "Commercial" subclass. The primary source for the economic lives listed in the table is IRS *Publication 946*.

Depreciation:

The Kansas Constitution also requires that the "retail cost when new" (RCWN) be depreciated straight-line over a maximum of seven years to establish the appraised value of machinery and equipment in the "Commercial" subclass. The appraised value of machinery and equipment in the "Commercial" subclass is determined by multiplying the RCWN by the appropriate "appraised factor" from the Appraised Factor Table. The "appraised factors" found on the Appraised Factor Table are percent good factors.

To calculate the *appraised* value of machinery and equipment in the "Commercial" subclass:

- choose the appropriate "*appraised factor*" from the *Appraised Factor Table*.
- multiply the RCWN by the "*appraised factor*" to determine the *appraised* value. (The *appraised* value should never be less than 20% of the RCWN.)

Example: A dentist purchased office furniture new in May of 2006 for \$2000. The PVD economic life for office furniture is 10 years. The *appraised* factor from the *Appraised Factor Table* is .200. The *appraised* value of this asset is:

Retail Cost When New X Appraised Factor = Appraised Value

$$\$2000 \quad x \quad .200 \quad = \quad \$400$$

CIME Appraised Factor Table

(Schedule 5, Column 9)

Purchase NEW	Purchase USED						
Year of Purchase	Current Age	Economic Life in Years					
		2	3	4	5	6	7 or more
2026	0.000	1.000	1.000	1.000	1.000	1.000	1.000
2025	1.000	0.500	0.667	0.750	0.800	0.833	0.857
2024	2.000	0.200	0.333	0.500	0.600	0.667	0.714
2023	3.000	0.200	0.200	0.250	0.400	0.500	0.571
2022	4.000	0.200	0.200	0.200	0.200	0.333	0.429
2021	5.000	0.200	0.200	0.200	0.200	0.200	0.286
2020	6.000	0.200	0.200	0.200	0.200	0.200	0.200
2019 & BEFORE	7 years or older	0.200	0.200	0.200	0.200	0.200	0.200

To select the appropriate *appraised* factor:

1. locate the *row* for the year the item was purchased new;
2. locate the *column* indicating the item's total economic life;
3. the appropriate factor is located where the *row* and *column* meet.

Example

An item with an economic life of 10 years that was purchased new prior to June 30, 2006 for \$2,000 would have an *appraised* factor of .200 or 20%. The "retail cost when new" of \$2,000 is multiplied by the .200 *appraised* factor to arrive at an *appraised* value of \$400.

Purchase year: 2006		RCWN		\$2,000
Purchase cost: \$2,000 [new]	x	<u>Appraised factor</u>	x	.200
PVD economic life: 10 years		Appraised value		\$400

Appraised factor: .200

The Used Factor:

The Kansas Constitution requires that the valuation process for machinery and equipment in the "Commercial" subclass begin with the "retail cost when new" (RCWN). Since the retail cost when new is not a used purchase price, the county appraiser must determine the RCWN for

machinery and equipment that is purchased used. The “used factor” can be used to estimate the RCWN of assets that are purchased used.

Whenever a better *estimate* of RCWN can be determined and documented from a reliable source, that cost should be used instead of relying on the *used* factor. Sources that may provide a reliable RCWN to alleviate reliance upon the “used factor” include:

- The current owner is able to obtain *a copy of the original invoice* from a previous owner.
- The current owner is able to obtain *a vendor's retail price catalogue*.
- The current owner is able to obtain *a letter from a retailer or the manufacturer*.
- *A prior rendition* that appears to be complete and accurate as filed by the first owner.
- Original list prices for *certain* heavy construction equipment can be found in a commercial valuation publication called the *Green Guide*. Contact the personal property section at PVD for information on older *Green Guide* prices.

The *used* factor converts a *used* purchase price into an *estimate* of retail cost when new.

The *used* factor can be determined by dividing the total economic life of the asset by the remaining economic life of the asset. Once the *used* factor is determined, it is multiplied by the used purchase price of the item to determine the *estimated* RCWN.

Example: A dentist paid \$465 for a dental chair that was 7 years old at the time of purchase. The PVD economic life for the dental chair is 10 years. The *estimated* RCWN of this asset is determined as follows:

Total Economic Life / Remaining Economic Life = Used Factor x Used Price = Estimated RCWN

$$10 \text{ years} / 3 \text{ years } (10 - 7) = 3.333 \times \$465 = \$1,550$$

The *used* factor should never be greater than 5. If an asset is purchased *used* when it is 10 years old and it has an economic life of 12 years, the “used factor” is not 6; *it is limited to 5*. The *estimated* RCWN of this asset is determined as follows:

Total Economic Life / Remaining Economic Life = Used Factor x Used Price = Estimated RCWN

$$12 \text{ years} / 2 \text{ years } (12-10) = (6) 5 \text{ (limit)} \times \$465 = \$2,325$$

The “*Used Factor*” Table can be used to determine the factor used to “*estimate*” the RCWN from a *used* purchase price.

CIME Used Factor Table

(Schedule 5, Column 7)

		ECONOMIC LIFE																			
		2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	
Age At Purchase	1	2.000	1.500	1.333	1.250	1.200	1.167	1.143	1.125	1.111	1.100	1.091	1.083	1.077	1.071	1.067	1.063	1.059	1.056	1.053	
	2	5.000	3.000	2.000	1.667	1.500	1.400	1.333	1.286	1.250	1.222	1.200	1.182	1.167	1.154	1.143	1.133	1.125	1.118	1.111	
	3		5.000	4.000	2.500	2.000	1.750	1.600	1.500	1.429	1.375	1.333	1.300	1.273	1.250	1.231	1.214	1.200	1.188	1.176	
	4			5.000	5.000	3.000	2.333	2.000	1.800	1.667	1.571	1.500	1.444	1.400	1.364	1.333	1.308	1.286	1.267	1.250	
	5					5.000	3.500	2.667	2.250	2.000	1.833	1.714	1.625	1.556	1.500	1.455	1.417	1.385	1.357	1.333	
	6						5.000	4.000	3.000	2.500	2.200	2.000	1.857	1.750	1.667	1.600	1.545	1.500	1.462	1.429	
	7							5.000	4.500	3.333	2.750	2.400	2.167	2.000	1.875	1.778	1.700	1.636	1.583	1.538	
	8								5.000	5.000	3.667	3.000	2.600	2.333	2.143	2.000	1.889	1.800	1.727	1.667	
	9										5.000	4.000	3.250	2.800	2.500	2.286	2.125	2.000	1.900	1.818	
	10											5.000	4.333	3.500	3.000	2.667	2.429	2.250	2.111	2.000	
	11													5.000	4.667	3.750	3.200	2.833	2.571	2.375	2.222
	12														5.000	5.000	4.000	3.400	3.000	2.714	2.500
	13															5.000	4.250	3.600	3.167	2.857	
	14																5.000	4.500	3.800	3.333	
	15																	5.000	4.750	4.000	
	16																		5.000	5.000	

To select the proper *used* factor:

1. locate the *row* for the age of the item when it was purchased used;
2. locate the *column* indicating the item's total economic life;
3. the appropriate *used* factor is located where the *row* and *column* meet.

Example

An item with an economic life of 10 years that was purchased used for \$1,200 when it was three years old would have a "*used* factor" of 1.429 or 142.9%. The used purchase price of \$1,200 is multiplied by the 1.429 *used* factor to arrive at an *estimated* "retail cost when new" of \$1,715.

Age at purchase: 3 years	Used cost			\$1,200
Purchase cost: \$1,200 [used]		x	<u>Used factor</u>	x 1.429
PVD economic life: 10 years			<u>Estimated RCWN</u>	\$1,715

Used factor: 1.429

"Used" for Commercial Purposes vs. "Not Used":

The Kansas Constitution states that as long as machinery and equipment in the "Commercial" subclass is being "used," its appraised value cannot be less than 20% of the "retail cost when new".

"Commercial" machinery and equipment should be considered as being "used" until its condition or use clearly indicates that the property is no longer going to be used for the

production of income. This will prevent property from being considered “used” for one tax year, not “used” for a subsequent tax year, and then “used” again at some future point in time. Whenever county appraisers must determine whether machinery or equipment is still being “used” or no longer being “used”, they may want to consider the following:

There is a greater possibility that an asset is no longer being “used” if:

- the economic life of the asset is over;
- the item has been replaced;
- the item is being held for parts and some parts have already been removed (when property can no longer be used in its present form and valuing it based on its retail cost when new no longer seems logical);
- the item appears to no longer be in use, and it is unusable (when property is poorly maintained and in poor condition, has parts missing, etc.);
- the item appears to have had no maintenance;
- it would cost more to remove the item than to leave it in place (in rare instances when the property would have been disposed of except that it is more cost effective to simply keep it on the premises)

There is a greater possibility that an asset is still being “used” if:

- the item is being held for back-up or for future use in its present form in case business demands change; or
- a service agreement is currently in effect for the property

“Commercial” machinery and equipment which is no longer being “used” for the production of income is classified within the **Other Personal Property Not Elsewhere Classified** (“Other”) subclass. Machinery and equipment in the “Other” subclass is not valued based upon the formula laid out in the Kansas Constitution for “Commercial” machinery and equipment that is being “used”. *Rather*, the value of the machinery and equipment “no longer being used” is based on its market value. Machinery and equipment in the “Other” subclass is listed on *schedule 6* of the rendition. See the “Other Personal Property Not Elsewhere Classified” section in this guide for information on valuing machinery and equipment that is no longer being “used”. [[K.S.A. 79-1439c](#); A.G. Opinion 94-52]

\$1500 Exemption for Commercial Equipment:

Commercial/industrial machinery and equipment with a “retail cost when new” (RCWN) of \$1500 or less per “item” are exempt from personal property taxation. County appraisers must determine whether the property qualifies as an “item” and the “retail cost when new” of the

"item" must be established in order to determine whether the "item" qualifies for exemption. Whenever a commercial/industrial "item" is purchased "used", the "retail cost when new" must be established in order to determine whether the "item" qualifies for the exemption. [[K.S.A. 79-201w](#)]

For purposes of the \$1500 exemption an "item" is generally going to be a single line item as it is reported on a rendition. Exceptions to this general rule are:

1. If the line item represents a group of like goods that can be used independently and they have the same or similar cost, the line item is actually several "items". The RCWN of each "item" may qualify for the exemption.
2. In that an "item" is the smallest quantity that may be used independently, one pen, one sheet of paper or one rubber band represents a material and supply "item". The RCWN of each "item" that can be independently used may qualify for the exemption. Materials and supplies are classified under the "Other" subclass of personal property. Personal property in the "Other" subclass is listed on *schedule 6* of the rendition. See the "Other Personal Property Not Elsewhere Classified" section in this guide for information on valuing materials and supplies. [PVD Directive 95-030]

Note: Taxpayers are not required to list any "item" of commercial/industrial machinery and equipment and materials and supplies with a "retail cost when new" of \$1500 or less per "item". However, if a taxpayer mistakenly considers an *item* exempt and the county appraiser later determines the property does not qualify for exemption, it may be subject to two years back taxes and penalties. [A.G. Opinion 96-7]

Commercial/Industrial Machinery and Equipment Exemption:

Effective January 1, 2007, machinery and equipment acquired by qualified purchase or lease made or entered into after June 30, 2006 as the result of a bona-fide transaction, which was not consummated for the purpose of avoiding taxation, is exempt from property taxation in Kansas. Machinery and equipment transported into the state after June 30, 2006, for the expansion of an existing business or creation of a new business, is also exempt from property taxation in Kansas. [[K.S.A. 79-223](#)]

For purposes of this exemption:

Acquired does not include the transfer of property pursuant to an exchange for stock securities, or the transfer of assets from one going concern to another due to a merger, reorganization or other consolidation.

Commercial and industrial machinery and equipment means property classified for property tax purposes within subclass 5.

Qualified lease means a lease of commercial and industrial machinery and equipment for not less than 30 days for fair and valuable consideration where such machinery and equipment is physically transferred to the lessee to be used in the lessee's business or trade.

Qualified purchase means a purchase of commercial and industrial machinery and equipment for fair and valuable consideration where such machinery and equipment is physically transferred to the purchaser to be used in the purchaser's business or trade.

Machinery and equipment that qualifies for this exemption are specifically excluded from having to obtain an exemption from the Board of Tax Appeals, *unless* the county appraiser is in doubt. Whenever the appraiser is in doubt regarding an exemption, the property must be placed on the tax roll and the owner *must* apply to the State Board of Tax Appeals for the exemption. [[K.S.A. 79-213\(l\)](#)]

Taxpayers are not required to list any commercial and industrial machinery that qualifies for this exemption. However, if a taxpayer mistakenly considers an *item* exempt and the county appraiser later determines the property does not qualify for exemption, it may be subject to two years back taxes and penalties. [A.G. Opinion 96-7]

Computer Software – Tangible vs. Intangible:

The Kansas Supreme Court has held that software programs are taxable if they are operational programs; programs the computer cannot operate without. These programs are considered an essential portion of the computer hardware and are taxable as tangible personal property in conjunction with the hardware. On the other hand, application programs, which are particularized instructions, are intangible property, which is not subject to taxation in Kansas. [[K.S.A. 79-301](#); [79-306](#)]

Operational software programs [e.g., Windows Software such as; 1998, 2000, NT, or XP; programs that compile and/or interface with the computer]:

- are an essential portion of the computer hardware
- are programs the computer cannot operate without
- are *tangible* property and are subject to the personal property tax

Application software programs [e.g., Microsoft Office, Word or Excel, Lotus applications, Word Perfect, Acrobat Reader]:

- are specialized programs that run off the *operational* software
- are programs the computer can operate without
- are *intangible* property and not subject to the personal property tax

Leased Equipment:

Machinery and equipment that is leased or in the possession, custody, or control of someone other than the owner of the property is listed in the name of the owner on schedule 7 of the rendition by the lessee or holder of the property. The owner of the property must also list the property on schedule 5 of the rendition. [\[K.S.A. 79-303-79-304\]](#)

Property that may be leased includes copiers, ice machines, postage machines, computers, trailers, etc. Property that may be in the possession, custody or control of someone other than the owner, includes vending machines, video games, coin operated washing machines in an apartment complex, etc.

Some leases have a bargain purchase option at the end of the lease period. This purchase option should not be considered as the *acquisition* cost. The *actual* "retail cost when new" should be acquired from either the lessor or the lessee. Alternate sources should always be pursued whenever the *used* purchase cost cannot be converted into a realistic *estimate* of "retail cost when new" by using the "used factor" from **The Used Factor** chart.

For example, a taxpayer decides to take advantage of the \$1 purchase option at the end of a 5-year contract for a copier he has been leasing. The following year when he reports the copier on his rendition, he states that it was purchased *used* for \$1. When the maximum "*used factor*" of five is applied to the reported *used* purchase cost of \$1; the estimated RCWN is only \$5. Thus, the county appraiser must find a better source than the "used factor" to determine a realistic estimate of RCWN for the copier.

Truck Beds & Bodies (Commercial):

A truck bed that is set behind the cab on a truck *chassis* is not considered part of the truck. For this reason, it is valued and classified separately from the truck. Truck beds on "*chassis cab*" motor vehicles are not prorated onto or off of the tax roll when the truck they are on is purchased or sold during the year.

A body that encloses the entire vehicle *chassis*, including the motor and driving compartment, of an "*incomplete*", "*stripped*" or "*chassis-only*" vehicle is considered part of the motor vehicle. For this reason, **the body is valued and classified with the vehicle**. See the "Motor Vehicle" section of this guide for information on valuing "*incomplete*", "*stripped*" or "*chassis-only*" vehicles.

Beds on “chassis cab” motor vehicles *used for commercial purposes* are classified within the “Commercial” subclass of personal property and appraised the same as other commercial and industrial machinery and equipment. Truck beds in the “Commercial” subclass are listed on *schedule 5* of the rendition.

Beds on “chassis cab” motor vehicles that are *not used for any commercial purpose* are classified within the **Other Personal Property Not Elsewhere Classified** (“Other”) subclass of personal property and appraised at market value. Truck beds in the “Other” subclass are listed on *schedule 6* of the rendition. *See* the “Other Personal Property Not Elsewhere Classified” section of this guide for information on valuing non-commercial beds on “chassis cab” motor vehicles.

Trailers (Commercial):

Trailers *used for commercial purposes* are classified within the “Commercial” subclass of personal property and valued the same as other commercial and industrial machinery and equipment. Trailers in the “Commercial” subclass are listed on *schedule 5* of the rendition.

Trailers that are *not used for any commercial purpose* are classified within the Other Personal Property Not Elsewhere Classified (“Other”) subclass of personal property and are exempt beginning January 1, 2026, per K.S.A. 79-267. *See* the “Other Personal Property Not Elsewhere Classified” section of this guide for information on non-commercial trailers.

Commercial/Industrial Machinery and Equipment Defined by Statute

Wireless Communication Towers

For all taxable years after December 31, 2002, all wireless communication towers, broadcast towers, antenna and relay sites, except public utility property, are defined as commercial and industrial machinery and equipment and shall be classified for property tax purposes as tangible personal property within subclass 5 of class 2 of section 1 of article 11 of the Kansas constitution. [[K.S.A 79-1439d](#)]

Bed, Body, or Box mounted on a motor vehicle

Effective on and after July 1, 2008, a bed, body or box that is regularly used predominantly in a business or industry and is attached to a motor vehicle, except for a bed, body or box that is attached to the motor vehicle by the vehicle manufacturer, shall be classified for property tax purposes as tangible personal property within subclass 5 of class 2 of section 1 of article 11 of the Kansas constitution. [[K.S.A. 79-1439e](#)]

Specific machinery and equipment used in manufacturing of cement, lime, or similar products

For tax years after December 31, 2013, all commercial and industrial machinery and equipment used directly in the manufacturing of cement, lime and other similar products including: kilns, pumps, lifts, process fans, bucket elevators, compressors, raw mills, hammer mills, grinders, conveyors, ball mills, mixers, storage tanks, scales, crushers, reclaimers, processing vessels, filters, electric motors, cement and clinker coolers, finish mills, separators, electric hoists, stackers, roller mills, clinker breakers, hydraulic and lubricating systems used directly in manufacturing and processing activities, analyzers, aeration systems, air pollution control equipment, bulk loading systems, material and gas flow distribution gates and handling and transport systems, shall be classified for property tax purposes as tangible personal property within subclass 5 of class 2 of section 1 of article 11 of the Kansas constitution. All such property shall be valued in accordance with the provisions of subsection (b) (2) (E) of K.S.A. 79-1439, and amendments thereto. [[K.S.A. 79-507](#)]

Summary of Key Terms

Acquisition Cost/Purchase Price is the cost [in terms of dollars] to acquire an item and place it into service; should be the amount reported on the rendition; can be *either* a used cost or a new cost.

Retail Cost When New (RCWN) is the dollar amount a new item would cost at the retail level of trade; should be the same as the purchase price if the item was purchased new; can be *estimated* by applying the "*used* factor" to the purchase price *if* the item was purchased used; does not include sales tax *or* freight and installation costs which are separate and readily discernible from the purchase price.

Appraised Value of "Commercial" Equipment is the value of a property before it is multiplied by the assessment percentage; the "retail cost when new" (RCWN) less straight-line depreciation. The *appraised* value of machinery and equipment in the "Commercial" subclass cannot be less than 20% of the RCWN as long as the asset is "being used" for commercial and industrial purposes.

Assessment Percentage [Rate] is the percentage that is multiplied times the *appraised* value of a property to determine its *assessed* value; the assessment percentage for machinery and equipment in the "Commercial" subclass is 25%.

Assessed Value is the *appraised* value of a property multiplied by the assessment percentage; the *assessed* value of machinery and equipment in the "Commercial" subclass is 25% of the *appraised* value.

Summary of Tables used to Value “Commercial” Property

The Used Factor Table is used to determine a “used factor” which can be used to convert the *used* purchase price for commercial and industrial machinery and equipment into an *estimate* of “retail cost when new” [**when the actual “retail cost when new”, or a better estimate of “retail cost when new” is not available**].

The CIME Appraised Factor Table is used to determine the appropriate factor used to determine the appraised value of commercial and industrial machinery and equipment.

The Commercial & Industrial Property Economic Lives Table is used to determine the appropriate economic life for commercial and industrial machinery and equipment.

Summary of Schedules to Report Commercial Property

Schedule 5 of the rendition is designed to allow taxpayers to provide information necessary for the county appraiser to determine the value of the commercial/industrial personal property according to the constitutional formula. See Schedule 5 example below.

Schedule 6 of the rendition is designed to allow taxpayers to list commercial machinery & equipment with a RCWN that is greater than \$1500 per “item” that is no longer “being used”.

Schedule 7 of the rendition is designed to allow taxpayers to list [in the owner’s name] any tangible personal property under the taxpayer’s control, possession or custody which is taxable to others e.g., coin operated washers and dryers in apartment complexes, vending machines, game machines, leased equipment).

SCHEDULE 5: COMMERCIAL & INDUSTRIAL MACHINERY & EQUIPMENT									
Taxpayer completes columns 1-5.					County Appraiser completes columns 6-10				
Item (1)	Year Purchase (2)	Purch ased New/ Used (3)	A Pur chase in (4)	Purch ased Price (5)	For County Use				
					Li ability (6)	U sed Fa ctor (7)	RCW Value (8)	CIME Apprais Factor (9)	Appraise d Value (10)
1. Eq	2005	Used	10	15,0	1	5	75,	0.200	15,000
2. Furnit	2005	Used	5	1,75	1	2.	3,5	0.200	700
3. Comp	March 2006	New	0	2,50	3	N	2,5	0.200	500
4. Machi	May 2006	New	0	5,00	1	N	5,0	0.200	1,000

The following is a brief description of the columns on Schedule 5:

1. A description of the property. When items are lumped together it is difficult for the taxpayer and the county appraiser to make an accurate adjustment to the "lumped sum".
2. The year the new or used item was purchased.
3. Note whether the item was purchased new ("N") or used ("U").
4. The age, in years, of the item at the time it was purchased. If purchased new the age at purchase would be 0.
5. The cost incurred to acquire the item; in terms of dollar value, not including sales tax or freight and installation costs that are charged separately and are readily discernible from the actual sale price of the item.
6. The appraiser's office assigns the total economic life of the commercial item as prescribed by the Personal Property Valuation Guide.
7. If the item was purchased used ("U"), the used factor is listed in this column.
8. The same as the column (5) if purchased new ("N"), or the purchase price times the used factor if purchased used ("U").
9. Straight line CIME appraised factor, figured over seven years or less depending on column (6), to a 20% floor.
10. Column (8) times column (9) equals the appraised value.

2.06 Other Personal Property Not Elsewhere Classified

Personal property that cannot be classified into any of the five “specific” constitutional subclasses of personal property is classified within the Other Personal Property Not Elsewhere Classified (“Other”) subclass. The Kansas Constitution classifies property that qualifies as “Other” personal property into Class 2, Subclass 6 (2.06). “Other” personal property is listed on a *tangible personal property assessment form* (rendition) pursuant to K.S.A. 79-300 series. Property in the “Other” subclass of personal property is listed on *schedule 6* of the rendition. [Ks. Constitution Art. 11, Sec. 1; [K.S.A. 79-1439\(2\)\(F\)](#)]

Classifying “Other” Personal Property

Property that may qualify for classification in the Other Personal Property Not Elsewhere Classified (“Other”) subclass includes, but is not limited to:

- **Aircraft:** airplanes, helicopters, hot air balloons, ultra-lights, drones, etc.
- **Truck Campers and Travel Trailers:** that do not meet the statutory definition of a “recreational vehicle” and are not “RV-Titled.”
- **Tiny Homes** – 0 – 500 sq ft when determined to be personal property
- **Trailers (non-commercial with GVW > 15k lbs):** utility trailers, motorcycle/snowmobile trailers, horse/livestock trailers, and any other trailer that is not used for any commercial purpose and has a gross weight of over 15,000 pounds.
- **Truck Beds (non-commercial):** beds on “chassis cab” motor vehicles that are not used for any commercial purpose, *regardless* of how the vehicle is registered.
- **Machinery & Equipment** which is no longer being “used” for the production of income. Machinery and equipment in the “Other” subclass may qualify for the \$1500 exemption for commercial equipment.

Valuation Guidelines for “Other” Personal Property

Property classified within the Other Personal Property Not Elsewhere Classified (“Other”) subclass is appraised at its fair market value as of January 1 and assessed at a rate of 30%.

When establishing values for personal property in the “Other” subclass, the county appraiser must follow the procedures and guidelines outlined in the *“Personal Property Valuation Guide”* prescribed by the Property Valuation Division (PVD). *However, the county appraiser*

may deviate from the guide on an individual piece of property for just cause and in a manner consistent with achieving market value. Any deviation from a prescribed valuation method must be documented. [[K.S.A. 79-1412a Sixth](#); [PVD Directive 19-048](#); [K.S.A. 79-1456](#)]

The "Other" section of the *Personal Property Valuation Guide* contains cost data used to appraise hot air balloons, tiny homes, and shipping containers in the "Other" subclass. Nationally recognized publications are prescribed for valuing aircraft, and non-RV-Titled travel trailers in the "Other" subclass.

The *Personal Property Valuation Guide* does not prescribe valuation guides or cost data for appraising all types of property in the "Other" subclass. When PVD does not prescribe a valuation method, the county appraiser must develop county valuation guidelines that reflect the market value of the personal property item. Valuation guidelines can be developed from known sales, replacement costs, historical costs, and other factors. The methods and logic used to develop guidelines should always be documented.

Proration: *As of January 1, 2023*, all property that is valued as "Other" in subclass 6 may be prorated onto and off of the tax roll when it is acquired or sold during the year. Please refer to proration rules for "Other" property.

Exempt Other Personal Property Not Elsewhere Classified

New for 2026: Commencing after December 31, 2025, K.S.A. 79-267 exempts the following described personal property items from all property or ad valorem taxes:

- **any off-road vehicle** that is not operated upon any highway, including all-terrain vehicles, recreational off-highway vehicles, golf carts, off-road motorcycles and snowmobiles
- **any motorized bicycle**, electric-assisted bicycle, electric-assisted scooter, electric personal assistive mobility device, and motorized wheelchair
- **any trailer** having a gross weight of 15,000 pounds or less that is used exclusively for personal use and not to produce income
- **any marine equipment**, including watercraft trailers designed to launch, retrieve, transport and store watercraft, and watercraft motors designed to operate watercraft on the water. [[K.S.A. 79-267](#)]

Existing exemptions include:

- **Aircraft** exemption for business, antique, & amateur-built (K.S.A. [79-201k](#) & [79-220](#))

- **ATVs, ROVs** exemption as farm machinery & equipment (K.S.A. [79-201j](#))
- **Pickup shells** and toppers exemption (K.S.A. [79-201c](#))
- **Antique trailer** exemption (K.S.A. [79-265](#) & [8-1,119](#))
- **Machinery & equipment** exemption retail cost when new (RCWN) item <=\$1500 (K.S.A. [79-201w](#))
- **Marine** equipment-sailboard exemption (K.S.A. [79-201c](#))

Additionally, K.S.A. 79-234 exempts all property classified as “Other” subclass 6 with a **purchase price** of **\$750 or less**.

- The exemption applies to any purchase whether new or used, and there are no limitations on when the purchase was made.
- It should also be noted that the purchase price does NOT include sales tax or any add-on costs that are charged separately and are readily discernible from the actual purchase price. These may include shipping, handling, or set-up charges.

Key point to remember: the purchase price qualifying for the exemption and how the county has or will value the property are two separate issues. [[K.S.A.79-1439\(F\)](#); [79-345](#); [79-234](#)]

Aircraft

Aircraft, including airplanes and helicopters, are classified within the “Other” subclass of personal property and are appraised at market value as of January 1. Beginning January 1, 2023, all personal property in the “Other” subclass is prorated onto or off of the tax roll when it is purchased or sold throughout the year.

Valuing aircraft in the “Other” subclass:

The Property Valuation Division prescribes the *Aircraft Bluebook (ABB)* guide for valuing airplanes and helicopters at their market value. Other appraisal techniques may be used to value aircraft that is not listed in the *Aircraft Bluebook* guide. The county appraiser can deviate from the prescribed valuation method on an individual piece of property in order to achieve market value. Any deviation must be documented. [[K.S.A. 79-1412a Sixth](#); [PVD Directive 19-048](#); [K.S.A. 79-1456](#)]

The *Aircraft Bluebook* includes price history data for each individual airplane and helicopter. The internet-based format includes all the information found in the hardcopy plus the ability to customize and save an appraisal. The *ABB* online service also provides average airframe

time for each aircraft in the database, and the “airframe hours” or “engine hours” do not need to be edited.

To use the *Aircraft Bluebook online guide*:

Step 1: Go to <https://aircraftbluebook.com/>.

Step 2: Look up the make and model for the aircraft in question.

Step 3: Locate the year for the model of the aircraft and select.

Step 4: Choose “Print Valuation” to print, make sure your ad blocker is turned off for this website, and save a copy of the appraisal report to your computer’s hard drive.

Step 5: Use the “Average Wholesale Price” of the appraisal report.

Exempting aircraft in the “Other” subclass

An aircraft may qualify for exemption from property taxation if certain conditions are met and the Kansas Board of Tax Appeals grants the exemption. Any aircraft that has not been granted an exemption by the Kansas Board of Tax Appeals is taxable. [\[PVD Directive 92-025\]](#)

The Board of Tax Appeals may grant a property tax exemption to any aircraft that satisfies the conditions for one of the following exemptions:

1. **Business Aircraft** [\[K.S.A. 79-201k\]](#) – exemption for aircraft that is “*predominately*” used to earn income for the owner in the conduct of the owner's business or industry. *Predominately* is defined to mean at least 80% of the total use of the aircraft, or utilization of the aircraft such that all costs are deductible for federal income tax purposes. Also, if the owner’s business is the leasing of the aircraft, the lessee’s use of the aircraft is not considered in determining the exemption.
2. **Antique Aircraft** [\[K.S.A. 79-220\]](#) – exemption for aircraft 30 years or older as determined by the date of manufacture that is used exclusively for recreational or display purposes, or any combination thereof.
3. **Amateur-Built Aircraft** [\[K.S.A. 79-220\]](#) – exemption for aircraft that is defined as aircraft, manned or unmanned, that the major portion of which has fabricated and assembled by a person or persons who undertook the construction project solely for their own education or recreation. This bill applies to all years after December 31, 2013.

Drones

A drone that is between 0.55 lbs. (250 grams) to 55 lbs. (25 kilograms) is considered a small, unmanned aircraft or small unmanned aircraft system by the Federal Aviation Administration

(FAA). All drones are required to be registered with the FAA on their listed website <https://faadronezone.faa.gov/#/>. Drones must be labeled with FAA registration number and must operate within FAA guidelines.

Drones are classified within the "Other" subclass of personal property and are appraised at market value as of January 1. As of January 1, 2023, all personal property in the "Other" subclass is prorated onto or off of the tax roll when it is purchased or sold during the year.

Valuing drones in the "Other" subclass:

Drone values vary greatly from recreational to commercial use drones. Both recreational and commercial use drone types consist of fixed wing, hexacopter, quadcopter, etc... and include numerous makes and models. It may be necessary to use values established by a study of the local market. The procedure used must reflect the local market and be documented. For assistance contact the PVD Personal Property Section. *The county appraiser may deviate from the prescribed valuation method on an individual piece of property in order to achieve market value. Any deviation must be documented.* [[K.S.A. 79-1412a Sixth](#); [PVD Directive 19-048](#); [K.S.A. 79-1456](#)]

Exempting drones in the "Other" subclass:

A drone may qualify for exemption from property taxation if certain conditions are met:

1. A drone may qualify as exempt "**other**" personal property with a **purchase price** of **\$750 or less**.
2. A drone used for recreational purposes may qualify as "hobby equipment used in or about the home" exemption [[K.S.A. 79-201c Second](#)] The Kansas Board of Tax Appeals grants the exemption as a qualifying aircraft:
3. A drone used for commercial purposes may qualify for a **business aircraft** exemption [[K.S.A. 79-201k](#)] - exemption for aircraft that is "*predominately*" used to earn income for the owner in the conduct of the owner's business or industry. *Predominately* is defined to mean at least 80% of the total use of the aircraft, or utilization of the aircraft such that all costs are deductible for federal income tax purposes. Also, if the owner's business is the leasing of the aircraft, the lessee's use of the aircraft is not considered in determining the exemption.
4. A drone used for recreational purposes may qualify for an **amateur-built aircraft** exemption [[K.S.A. 79-220](#)] - exemption for aircraft that is defined as aircraft, manned or unmanned, that the major portion of which has fabricated and assembled by a person or persons who undertook the construction project solely for their own education or recreation. This bill applies to all years after December 31, 2013.

Hot Air Balloons

Hot air balloons classified within the "Other" subclass of personal property are appraised at their market value as of January 1. As of January 1, 2023, all personal property in the "Other" subclass, is prorated onto or off of the tax roll when it is purchased or sold during the year.

Valuing hot air balloons in the "Other" subclass:

Step 1 - Find the *replacement cost new* that best fits the balloon being valued.

- "Low Cost" brand names include Firefly, Head and Avian.
- "High Cost" brand names include Cameron, Lindstrand and Ultra Magic.

The *replacement cost new* listed below includes the following: Envelope, skirt, deflation panel, patented vent, single burner, gondola, mounted burner controls, aluminum frame gondola with fiberglass liner, instrument panel with altimeter, standard rate of climb meter, pyrometer, and fuel tanks.

Hot Air Balloon Replacement Cost New

Size Designation	Approx. Size Cubic Ft	Low Cost	Average Cost	High Cost
5	42,000	\$19,425	\$24,255	\$26,670
6	56,000	\$22,890	\$25,410	\$27,930
7	65,000	\$23,625	\$26,250	\$28,875
7	77,000	\$24,885	\$27,720	\$30,450
8	90,000	\$25,830	\$28,770	\$31,605
8	105,000	\$28,770	\$31,920	\$35,070
9	120,000	\$30,240	\$33,600	\$36,960
9	140,000	\$32,760	\$36,435	\$40,110
10	160,000	\$35,595	\$37,065	\$40,845
10	180,000	\$35,595	\$39,480	\$43,470
10	210,000	\$37,905	\$42,105	\$46,305
11	250,000	\$45,150	\$50,190	\$55,230

Step 2 - Multiply the total [*replacement cost new*] by the percent good factor for the air time hours the balloon has accumulated as of January 1[see scale below]. The county will need to obtain the air time hours annually from the owner of the aircraft.

Percent Good Scale

Air Time Hrs	25 Hrs	50 Hrs	75 Hrs	100 Hrs	150 Hrs	200 Hrs	300 Hrs	400 Hrs
% Good	81%	73%	65%	56%	49%	41%	33%	26%

Example: Firefly 7-15 with 77,000 cubic ft. envelope and 128 air time hours.

$$\$24,885 \text{ (RCN/size 7 Low)} \times 56\% \text{ (% good based on-air time hours)} = \$13,936.$$

The county appraiser may deviate from the prescribed valuation method on an individual piece of property in order to achieve market value. Any deviation must be documented.

[\[K.S.A. 79-1412a Sixth; PVD Directive 19-048; K.S.A. 79-1456\]](#)

Golf Carts: Exempt Commencing after December 31, 2025

Golf carts (or golf cars) classified within the "Other" subclass of personal property are no longer appraised at their market value as of January 1. K.S.A. 79-267 exempts any off-road vehicle not operated upon a highway including golf carts.

ATVs, Snowmobiles, Off Road Motorcycles, ROVS, Motorized Bicycles (Mopeds): Exempt Commencing after December 31, 2025

Kansas statutes define a "motor vehicle" as every vehicle, *other than* a motorized bicycle or a motorized wheelchair, which is self-propelled. Vehicles that are not designed for operation on public roads or that qualify as "motorized bicycles" are not motor vehicles. [\[K.S.A. 8-126\(w\),\(y\); 8-1439a\]](#)

K.S.A. 8-126(y) or K.S.A 8-1439a. "Motorized bicycle" defined. "Motorized bicycle" means every device having two tandem wheels or three wheels which may be propelled by either human power or helper motor, or by both, and which has:

- (a) A motor which produces not more than 3.5 brake horsepower;
- (b) a cylinder capacity of not more than 130 cubic centimeters;
- (c) an automatic transmission; and
- (d) the capability of a maximum design speed of no more than 30 miles per hour except a low power cycle.

Off road vehicles such as snowmobiles, ATVs, off road motorcycles, ROVs (*Recreational Off-Highway Vehicles*), and motorized bicycles (mopeds) are typically not classified as motor vehicles. Vehicles that are not motor vehicles are classified within the "Other" subclass of personal property and are no longer appraised at their market value as of January 1. K.S.A. 79-

267 exempts any off-road vehicle not operated upon a highway including ATVs, ROVs, off road motorcycles, snowmobiles, and any motorized bicycle, scooter, or personal assisted mobility device.

Truck Campers and Travel Trailers (Without “RV” Title)

Truck campers and travel/camping trailers that do not meet the statutory definition of a “recreational vehicle” (RV) *and* are not “RV-Titled” are classified within the “Other” subclass of personal property. Truck campers and travel/camping trailers in the “Other” subclass are appraised at their market value as of January 1 and may be adjusted for condition. As of January 1, 2023, all personal property in the “Other” subclass is prorated onto or off of the tax roll when it is purchased or sold during the year.

Kansas law defines a “recreational vehicle” (RV) as a vehicular-type unit built on or for use on a chassis and designed primarily as living quarters for recreational, camping, vacation or travel use, and which has its own motive power or is mounted on or drawn by another vehicle and which has a body width not exceeding 102 inches (8 ½ ft) and a body length not exceeding 45 feet and has ALL the following features:

- an electrical system which operates above 12 volts
- provisions for plumbing
- heating
- any other standard feature/component adopted in the uniform standards code for RVs.

[\[K.S.A. 79-5118; ANSI 119.2\]](#)

Campers recognized as slide-in, truck, pickup, or truck bed campers are not built on or for use on a chassis, so they cannot be registered as a recreational vehicle pursuant to this statute. Additionally, truck campers are not titled in Kansas, they do not typically have a VIN number, and they are not typically required to have insurance, which are all requirements for recreational vehicle registration. Motorhomes, travel trailers, and fifth-wheel travel trailers are different from truck campers because they are built on a chassis, they are titled in Kansas, they require insurance, and they are assigned VIN numbers. If they meet the other requirements under K.S.A. 79-5118, they may be registered as a recreational vehicle.

Valuing truck campers and travel/camping trailers in the “Other” subclass:

The Property Valuation Division prescribes the 2025 edition (January – April) of the *J.D. POWER Recreation Vehicle Appraisal Guide* for valuing campers, slide-ins, and travel/camping trailers [that are not “RV-Titled”] at market value.

- **2026 & 2027 Models** - Use 85% of the "Sugg List" value from the *J.D. POWER* guide **or** if none is listed, use 85% of the "Sugg List" value for a similar 2026 model to estimate the market value.
- **2025 and Older Models** - Use the "Average Retail" value from the *J.D. POWER* guide.
- **Alternate Method** – Use the "Retail Value" from the *Price Digests Recreational Vehicle Blue Book*.
- **Use values established by a study of the local market** for models that cannot be found in the *J.D. POWER* guide. The procedure used must reflect the local market and be documented.

The county appraiser may deviate from the prescribed valuation method on an individual piece of property in order to achieve market value. Any deviation must be documented. [K.S.A. 79-1412a Sixth; PVD Directive 19-048; K.S.A. 79-1456]

Exempt Camper Shells

Pickup shells and toppers are exempt from personal property taxation pursuant to K.S.A. 79-201c. See the "Motor Vehicle" section of this guide for information on recreational vehicles that qualify for the "Kansas "RV" Title.

Note: Travel trailers are not exempt under K.S.A. 79-267 because travel trailers are a defined term and customarily classified differently than a "trailer", regardless if it is registered and taxed as an RV using age and weight, or if it is listed, valued, and taxed as personal property on a rendition in Subclass 6. [[PVD Memo HB 2231 PP Exemption-Travel Trailers, November 13, 2025.](#)]

Tiny Homes As Personal Property

Tiny homes may be considered real or personal property. The county appraiser must first conduct an on-site physical inspection to determine if the tiny home has become an improvement to the land per the definition in K.S.A. 79-102 and/or passed the three-part fixture law test in K.S.A. 79-261 to be classified real property. If the county appraiser determines the tiny home to be an improvement to the land per the definition in K.S.A. 79-102 and/or passed the three-part fixture law test in K.S.A. 79-261 to qualify as real property, it should be classified and valued as real outside of this guide. Tiny homes that are classified as personal property are valued using this guide.

Tiny Home Characteristics

Tiny homes are typically designed to maximize space. They often have clever storage solutions, built-in multi-functional furniture, and creative layouts. They generally include essential

features like built-in sleeping spaces, electrical, and plumbing to meet basic needs, and they often include additional functionality with kitchen sink, counters, shelving, and storage with a refrigerator and stove. These homes optimize every inch of space for living.

In general, tiny homes are more affordable to build and maintain compared to traditional homes. They are built using standard and new innovative construction techniques including steel and wood stud frames, treated wood, plywood, and particleboard. Many have high quality insulation, windows, and finishes built with solid craftsmanship while others use cheaper materials. Often tiny homes focus on efficiency which translates to upgrades such as better insulation, energy efficient appliances, and solar panels. They are considered a good choice for their affordability, functionality, and mobility.

Tiny Home Types

A tiny home that is constructed on a permanent trailer chassis with wheels to easily transport it is often referred to as a Tiny House on Wheels (THOW). These can be factory built, custom built, or homemade. These homes usually range in sizes up to 500 square feet. The permanent trailer chassis with wheels may indicate this tiny home should be classified and valued as personal property using this guide. However, the county appraiser must first make the real versus personal property decision.

A tiny home that is constructed in a factory setting with certification standards regulated by the Recreational Vehicle Industry Association (RVIA) is often considered a Park Model RV. The maximum size for these homes is typically capped at 400 square feet. These homes are built to be stationary once they are moved to a location, and they may be classified and valued as personal property using this guide. However, the county appraiser must first make the real versus personal property decision.

Site constructed tiny homes are built to be stationary and often affixed to the real property with a permanent foundation. These homes may be classified and valued as real property outside of this guide. However, the county appraiser must first make the real versus personal property decision

Tiny homes may be termed as Accessory Dwelling Units (ADUs), which describes its relationship to a primary dwelling. These tiny homes are usually secondary dwellings on the same primary residence property such as in the backyard. Any type tiny home may be considered an ADU. The county appraiser must first make the real versus personal property decision in order to determine valuation method.

Tiny Home Quality

Tiny homes are generally known for higher quality construction because of their customization and mobility features. However, there are cheaply built tiny homes as well.

When determining the quality for a tiny home, the county appraiser should consider multiple aspects.

1. Design and functionality play a role with the need for modern comforts filling a very small space. Many tiny homes are individually designed and completely customized to maximize space with their efficient, modern features.
2. Construction techniques are important when deciding quality. Higher quality may be emphasized by building techniques, especially those that emphasize structural integrity for tiny homes to withstand not only movement but wind.
3. Construction materials and craftsmanship help determine quality. Steel frames and treated wood hold value longer than cheaper plywood or particleboard. High quality finishes, insulation, and windows contribute to better quality ratings. Solid workmanship with detail, customization, and upgrades also add to quality.

Tiny Home Depreciation

Tiny homes usually decline annually, especially in the first five years. It is common for homes to depreciate 20% to 30% or more in that time period. Homes classified as tiny are generally influenced by RV depreciation since they are often on wheels. Park models may not depreciate as rapidly. Tiny homes have been assigned a 12 year economic life and depreciation is shown in percent good based on age and life.

Valuing Tiny Homes in the “Other” subclass:

Step 1 - Find the replacement cost new (RCN) that best fits the tiny home being valued using the following criteria:

- Size of tiny home
- Quality of tiny home

Calculate Tiny Home RCN:

$$\text{Total Square Footage} \times \text{Cost per Sq Ft} = \text{Replacement Cost New}$$

Tiny Home Replacement Cost New

100-199 Sq Ft	
Excellent	\$319.75
Very Good	\$305.75
Good	\$291.50
Average	\$277.50
Fair	\$249.25
Low	\$221.00

200-299 Sq Ft	
Excellent	\$418.00
Very Good	\$396.75
Good	\$375.50
Average	\$354.50
Fair	\$312.00
Low	\$269.75

300-399 Sq Ft	
Excellent	\$379.75
Very Good	\$349.00
Good	\$318.00
Average	\$287.25
Fair	\$256.50
Low	\$225.75

400-499 Sq Ft	
Excellent	\$384.50
Very Good	\$363.75
Good	\$343.00
Average	\$322.25
Fair	\$280.75
Low	\$239.25

Step 2 - Multiply the total replacement cost new (RCN) by the percent good factor based on age of tiny home to get tiny home value.

Tiny Home Percent Good Scale

Age-Yrs	1	2	3	4	5	6	7	8	9	10	11	12 +
% Good	92%	83%	75%	67%	58%	50%	42%	33%	25%	17%	14%	10%

Tiny Home Value Formula:

$$\text{RCN} \times \text{Percent Good (Depreciation Factor)} = \text{Value}$$

Example: 4 year old, 325 sq ft tiny home assigned average quality

1. Calculate RCN:

$$325 \text{ sq ft} \times \$287.25 = 93,356 \text{ RCN}$$

2. Calculate Tiny Home Value:

$$93,356 \times 67\% = \underline{62,549} \text{ Value for Tiny Home}$$

The county appraiser may deviate from the prescribed valuation method on an individual piece of property in order to achieve market value. Any deviation must be documented. [K.S.A. 79-1412a Sixth; PVD Directive 19-048; K.S.A. 79-1456]

Shipping Containers

Shipping/storage containers are generally considered personal property by default since they are designed specifically for the transportation industry. They should be valued using this guide unless the county appraiser makes an on-site physical inspection and concludes the shipping/storage container has become an improvement to the land per the definition in K.S.A. 79-102 and/or passed the three-part fixture law test in K.S.A. 79-261 to be classified real property. If the county appraiser determines the shipping/storage containers to be an improvement to the land per the definition in K.S.A. 79-102 and/or passed the three-part fixture law test in K.S.A. 79-261 to qualify as real property, it should be classified and valued as real outside of this guide.

Shipping containers are large storage boxes that are used to store items. They are also used to transport items, typically on trains or large watercraft. They are typically made of either weathering steel, aluminum, fiber-reinforced polymers, or any combination thereof. Containers come in many shapes and sizes but are most commonly categorized by their length and height. The most common two lengths are 20 feet and 40 feet. The most common two heights are 8.6 feet, which is usually the standard height, and 9.6 feet, which tends to be referred to as a high cube.

Shipping Container Types

There are three categories of shipping container types: One Trip, Wind/Water Tight, As Is

1. **One Trip:** Typically fabricated in Asia and complete a single trip across the ocean (hence the name). Usually in near perfect condition (**practically like new**) but may have some minor cosmetic damage such as scratches or small dents. These types of containers tend to hold their resale value and require less money and time to maintain.
2. **Wind and Water Tight:** These containers have been retired from shipping fleets and tend to be 20 years or older. These containers tend to have **low damage**, which may include rust, bigger dents, larger scratches, and possibly fading/mismatched paintjobs. They are called Wind and Water Tight because these containers have no holes, and the doors close and seal properly.
3. **As Is:** These containers tend to be older or damaged units, sold **AS IS**. These containers have much more noticeable damage (**moderate or heavy damage**) than both the One Trip

or Wind and Water Tight containers. These containers may have noticeable holes in them and/or may not close correctly, which is why they do not classify as Wind and Water Tight.

Shipping Containers are classified within the “Other” subclass of personal property if they are not part of a commercial business. They are appraised at market value as of January 1. As of January 1, 2023, all personal property in the “Other” subclass is prorated onto or off of the tax roll when it is purchased or sold during the year.

Valuing Shipping Containers in the “Other” Subclass

Shipping container values vary depending on the size and condition of the container. The following chart includes regional average market values from midwestern states for shipping containers depending on their size and condition. It may be necessary to use values established by a study of the local market. The procedure used must reflect the local market and be documented.

Shipping Container Market Value

Category/Condition	Dimensions	Market Value
One Trip	20 x 8.6	\$3,600
One Trip	20 x 9.6	\$4,100
One Trip	40 x 8.6	\$5,900
One Trip	40 x 9.6	\$6,200
WWT	20 x 8.6	\$1,900
Category/Condition	Dimensions	Market Value
WWT	40 x 8.6	\$3,100
WWT	40 x 9.6	\$3,300
As Is	20 x 8.6	\$2,100
As Is	40 x 8.6	\$2,100
As Is	40 x 9.6	\$2,300

The county appraiser may deviate from the prescribed valuation method on an individual piece of property in order to achieve market value. Any deviation must be documented. [K.S.A. 79-1412a Sixth; PVD Directive 19-048; K.S.A. 79-1456]

Trailers (Non-Business with GVW > 15k lbs)

Trailers that are *not* used for commercial purposes and have a gross vehicle weight over 15,000 pounds are classified within the "Other" subclass of personal property and appraised at their market value as of January 1. Trailers in the "Other" subclass are listed on *schedule 6* of the rendition. As of January 1, 2023, all personal property in the "Other" subclass is prorated onto or off of the tax roll when it is purchased or sold during the year.

Trailers (Commercial)

Trailers that are *used for commercial purposes* are classified within the Commercial/Industrial Machinery and Equipment ("Commercial") subclass of personal property and appraised in the same manner as other commercial and industrial machinery and equipment. Trailers in the "Commercial" subclass are listed on *schedule 5* for the rendition. See the "Commercial/Industrial Machinery and Equipment" section of this guide for information on valuing trailers used for commercial purposes.

Valuing trailers in the "Other" subclass:

County appraisers must determine the value of trailers in the "Other" subclass of personal property. Appraisers can develop valuation guidelines for trailers in the "Other" subclass from known sales, replacement costs, historical costs, and other factors. The procedure used must reflect the local market and be documented.

Note: The *Price Digests Powersport Blue Book* is available for purchase. It provides a consistent source for obtaining market values for *certain* trailers classified under the "Other" subclass. More information about the guide can be found at <https://app.pricedigests.com/>. Trailers included in the *Price Digests Truck Blue Book* are: drop frame van; electronic van; dry freight van; refrigerated van; flatbed; lowboy equipment; stainless steel tank; aluminum tank; pneumatic bulk tank; dump; grain; livestock. Trailers are included in the subscription to the *Price Digests Truck Blue Book*.

Exempt trailers in the "Other" subclass:

Antique Trailers: Commencing after December 31, 2022, an antique trailer may qualify for exemption from property taxation if certain conditions are met and the Kansas Board of Tax Appeals grants the exemption. Any antique trailer that has not been granted an exemption by

the Kansas Board of Tax Appeals is taxable. The Board of Tax Appeals may grant a property tax exemption to any antique trailer that satisfies ALL of the following requirements:

- Registered pursuant to K.S.A. 8-1, 119
- Must be used exclusively for personal use, not for the production of income
- Is 35 years or older as determined by the date of manufacture
- Has an empty weight of 2,000 pounds or less *and* a gross weight of not more than 8,000 pounds

Trailers (Non-Business with GVW <=15k lbs): Commencing after December 31, 2025, trailers that are not used for commercial purposes and have a gross vehicle weight less than or equal to 15,000 pounds are classified within the "Other" subclass of personal property and are no longer appraised at their market value as of January 1. K.S.A. 79-267 exempts any trailer with a gross weight of 15,000 or less used exclusively for personal use and not for the production of income. [[K.S.A. 79-265; 8-1, 119](#)]

Truck Beds & Bodies (Non-Business)

A truck bed that is set behind the cab on a truck chassis is not considered part of the truck. For this reason, it **is valued and classified separately from the truck**. Truck beds on "*chassis cab*" motor vehicles are prorated onto or off of the tax roll when the truck they are on is purchased or sold during the year.

A body that encloses the entire vehicle chassis, including the motor and driving compartment, of an "*incomplete*", "*stripped*" or "*chassis-only*" vehicle is considered part of the motor vehicle. For this reason, the body **is valued and classified with the vehicle**. See the "Motor Vehicle" section of this guide for information on valuing "*incomplete*", "*stripped*" or "*chassis-only*" vehicles.

Beds on "*chassis cab*" motor vehicles that are not used for commercial purposes are classified within the "Other" subclass of personal property and are appraised at their market value as of January 1. Truck beds in the "Other" subclass are listed on *schedule 6* of the rendition.

Beds on "*chassis cab*" motor vehicles that are used for commercial purposes are classified within the Commercial/Industrial Machinery and Equipment ("Commercial") subclass of personal property and appraised the same as other commercial and industrial

machinery and equipment. Truck beds in the "Commercial" subclass are listed on *schedule 5* of the rendition. See the "Commercial/Industrial Machinery and Equipment" section of this guide for information on valuing commercial use beds on "chassis cab" motor vehicles.

Valuing truck beds in the "Other" subclass:

County appraisers must determine the value of truck beds in the "Other" subclass of personal property. Appraisers can develop valuation guidelines for truck beds in the "Other" subclass from known sales, replacement costs, historical costs, and other factors. The procedure used must reflect the local market and be documented. As of January 1, 2023, all personal property in the "Other" subclass is prorated onto or off of the tax roll when it is purchased or sold during the year.

Note: The *Price Digests Truck Blue Book* is available for purchase. It provides a consistent source for obtaining market values for *certain* beds and bodies that are classified under the "Other" subclass. Beds and Bodies included in the *Price Digests Truck Blue Book* are: truck cargo van; refrigerated van; Heavy-Duty rack; concrete mixers; flatbed; steel dump; aluminum dump; snow plows; steel utility; milk tanks; petroleum truck tanks; lifts/buckets; telescopic cranes; waste packers.

Commercial Machinery & Equipment that is no longer being "used"

Commercial/industrial machinery and equipment which is no longer being "used" for the production of income is classified within the "Other" subclass of personal property. Machinery and equipment classified within the "Other" subclass is listed on *schedule 6* of the rendition and appraised at its market value as of January 1. As of January 1, 2023, all personal property in the "Other" subclass is prorated onto or off of the tax roll when it is purchased or sold during the year. [[K.S.A. 79-1439c](#); A. G. Opinion 94-52]

Commercial/industrial machinery and equipment should be considered as being "used" until its condition or use clearly indicates that the property is no longer going to be used for the production of income. This will prevent property from being considered "used" for one tax year, not "used" for a subsequent tax year, and then "used" again at some future point in time.

Whenever county appraisers must determine whether machinery or equipment is still being "used" or no longer being "used" for commercial purposes, they may want to consider the following:

There is a greater possibility that an asset is no longer being "used" if:

- the economic life of the asset is over;

- the item has been replaced;
- the item is being held for parts and some parts have already been removed (when property can no longer be used in its present form and valuing it based on its retail cost when new no longer seems logical);
- the item appears to no longer be in use, and it is unusable (when property is poorly maintained and in poor condition, has parts missing, etc.);
- the item appears to have had no maintenance;
- it would cost more to remove the item than to leave it in place (in rare instances when the property would have been disposed of except that it is more cost effective to simply keep it on the premises).

There is a greater possibility that an asset is still being “used” if:

- the item is being held for back-up or for future use in its present form in case business demands change; or
- a service agreement is currently in effect for the property.

Valuing machinery and equipment that is no longer “being used”:

County appraisers must determine the value of commercial and industrial machinery and equipment that is no longer being “used” for the production of income. Appraisers can develop valuation guidelines for machinery and equipment in the “Other” subclass from known sales, replacement costs, historical costs, and other factors. The procedure used must reflect the local market and be documented. As of January 1, 2023, all personal property in the “Other” subclass is prorated onto or off of the tax roll when it is purchased or sold during the year.

Note: Machinery and equipment in the “Other” subclass may qualify for the \$1500 exemption for commercial equipment. See \$1500 Exemption for Commercial Equipment in this section of the guide for guidelines on determining when machinery and equipment qualifies for the exemption. [[K.S.A. 79-201w](#)]

Exempting commercial machinery and equipment in the “Other” subclass:

Commercial/industrial machinery and equipment “*items*” with a “retail cost when new” of \$1500 or less are exempt from personal property taxation. County appraisers must determine whether the property qualifies as an “*item*” and the “retail cost when new” of the “*item*” must be established in order to determine whether the property qualifies for exemption. Whenever a commercial/industrial “*item*” is purchased “used”, the “retail cost when new” must be

established in order to determine whether the “item” qualifies for the exemption. [[K.S.A. 79-201w](#); PVD Directive 95-030]

For purposes of the \$1500 exemption an “item” is generally going to be a single line item as it is reported on a rendition. Exceptions to this general rule are:

1. if the line item represents a group of like goods that can be used independently and they have the same or similar cost, the line item is actually several “items”. The RCWN of each “item” may qualify for the exemption.
2. in that an “item” is the smallest quantity that may be used independently, one pen, one sheet of paper or one rubber band represents a material and supply “item”. The RCWN of each “item” that can be independently used may qualify for the exemption. [PVD Directive 95-030]

Note: Taxpayers are not required to list any “item” of commercial/industrial machinery and equipment with a “retail cost when new” of \$1500 or less per “item”. However, taxpayers that mistakenly consider their property exempt may be subject to two years back taxes and penalties if the county appraiser determines the property does not qualify for the exemption. [A.G. Opinion 96-7]

Marine Equipment: Boat Motors and Boat Trailers

For *valuation* purposes, marine equipment that does not qualify as watercraft is classified within the “Other” subclass of personal property and is no longer appraised at its market value as of January 1. K.S.A. 79-267 exempts any marine equipment including boat motors and watercraft trailers designed to launch, retrieve, transport, and store watercraft.

Note: Sailboards are exempt from personal property taxation pursuant to K.S.A. 79-201c.

Proration of “Other” Personal Property:

K.S.A. 79-345 outlines the procedures for prorating other personal property. This includes *all* properties that are part of Subclass 6 of personal property.

For the 2023 tax year and thereafter, Subclass 6 personal property can qualify for a prorated value if:

1. acquired or sold after January 1st and prior to September 1st of any taxable year **AND**,
2. the county appraiser is notified of the acquisition or sale on or before December 20th

- Other personal property acquired after September 1st are not taxable for the year they are acquired.
- Other personal property that are acquired after January 1st are not subject to filing penalties for the tax year in which they are acquired.
- Other personal property may be prorated off anytime through the tax year when timely notification of a sale is given by the owner.
- Following notification, the county appraiser shall calculate the new tax roll value and send a new notification of value, or a revised notification of value based on the number of months the property is located in the county.

In cases where the county appraiser discovers a Subclass 6 item, an attempt should be made to determine if the owner held possession on January 1st. If the owner held possession on January 1st, the item in question should have been listed with the county appraiser on or before March 15th therefore penalties would apply, and in this case K.S.A. 79-345 is not applicable.

Questions about the notification period:

1. What happens when the owner reports the disposition after December 20th?

The county appraiser should not prorate the value of a Subclass 6 item when the owner fails to notify the county of its sale within the statutory timeframe (on or before December 20th in the year of the sale). The item will remain on the tax roll at its full market value for that tax year. [[K.S.A. 79-1701](#); [79-1702](#); [79-345](#)]

2. What happens when the owner does not report the acquisition of a taxable Subclass 6 item that occurred after January 1st?

The county appraiser has the responsibility to list all taxable personal property. If a Subclass 6 item is discovered as having tax situs after January 1st, the county appraiser adds the item on the tax roll at its full market value and sends notification of value to the owner. [[K.S.A. 79-101](#); [79-1426](#); [79-1455](#); [79-1461](#)]

Prorating the Value of “Other” Personal Property

K.S.A. 79-345 specifies that the value of Subclass 6 property should be prorated under certain circumstances based upon a fraction. The numerator of the fraction is the number of months, or *major portion* thereof, such watercraft was owned. The denominator is the 12 months of the tax year. We interpret the *major portion* of a month to mean over one-half of the month.

1. Prorating the value between buyer and seller when the item is taxable for the entire tax year:

Two fractions are needed: one for the buyer, one for the seller. For the numerators of each fraction, divide the 12 months of the tax year between the buyer and seller based upon ownership. The month of the transaction is given to the party that owned the item more than one-half of the month. The total value of the watercraft is split between the buyer and seller based upon the following:

$$\text{Total Value of Item} \times (\text{Number Mos Owned} / 12 \text{ Mos in Yr}) = \text{Prorated Value}$$

Each calendar year has 7-8 months with an odd number of days. (January, March, May, July, August, October, December and February during leap years). Every odd-numbered month has one day with the same number of days on either side. To expedite matters, if a transaction occurs on the 16th day of a 31-day month, or on the 15th day of a 29-day month, **you may split the month in half** for purposes of the above calculation. Otherwise, the exact hour must be determined for when the transaction was complete to know which party owned the boat more than half the month. We believe the former approach is efficient, less intrusive, fair, and still satisfies legislative intent.

2. Prorating the value when the item is taxable for only a portion of the year:

One fraction is needed. Count the number of months the item was owned and taxable. The month of the transaction is included in the numerator **if** there is a clear sign it was owned for more than half of the month. The total value of the item is prorated for tax purposes based upon the following:

$$\text{Total Value of Item} \times (\text{Number Mos Owned} / 12 \text{ Mos in Yr}) = \text{Prorated Value}$$

Again, 7 to 8 months out of the year have an odd number of days (8 months during leap years). If a sale occurs on the 16th of a 31-day month, or on the 15th day of a 29-day month, **do not** split the month in half and include it in the numerator. When a item is taxable only a portion of the year, do not include the transaction month unless there is a clear showing the item was owned over half of the month.

3. If an item is acquired after September 1, do not list the item for taxation in the hands of the buyer for the tax year

Prorated Value Examples

Example 1 – Acquisition:

A buyer purchases a hot air balloon from a dealer on **May 17**. The balloon is taxable in the hands of the new buyer. It is exempt in the hands of the seller because it qualifies for the merchant’s inventory exemption. The balloon is taxable for a **portion of the tax year**. The balloon is worth \$6,000. Calculate the taxable value of the balloon for the tax year in the hands of the *buyer*.

$$\$6,000 \text{ (Total Value)} \times (7 \text{ Months} / 12 \text{ Months}) = \$3,500 \text{ (Taxable Portion Hot Air Balloon)}$$

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
				*	1	2	3	4	5	6	7

May is **not** counted because the buyer did not own the hot air balloon for the majority portion, or for over half of the 31-day month. The buyer owned the item for part of the day on May 17. In addition, the buyer owned the item for 14 full days from May 18, through May 31. Even if the buyer had owned the balloon for 15 full days, 15 / 31 days is only 48%, or less than half the month of May. Thus, we know the buyer owned the balloon for less than half the month.

Example 2 – Acquisition:

A buyer purchases a shipping container from a dealer on **September 15**. The container will be taxable in the hands of the new buyer. The container is exempt in the hands of the seller because it qualifies for the merchant’s inventory exemption. The item is taxable for a portion of the tax year. The container is worth \$6,000. Calculate the taxable value of the item for the tax year in the hands of the *buyer*.

\$0 – The shipping container was acquired **after** September 1 and is not taxable in the hands of the buyer for the current tax year. It will be taxable for the next.

Example 3 – Sale:

A seller sells a non-RV-Titled travel trailer to a buyer on **November 15**. The trailer is taxable in Kansas only in the hands of the seller (note “Example 4.”) for the current tax year. The trailer is worth \$6,000. Calculate the taxable value of the trailer for the current tax year in the hands of the *seller*.

$$\$6,000 \text{ (Total Value)} \times (10 \text{ Months}^* / 12 \text{ Months}) = \$5,000 \text{ (Taxable Portion of Travel Trailer)}$$

*November is **not** counted because the seller did not own the travel trailer for the majority, or for over half of the 30-day month. The trailer was owned for a partial day on November 15. In addition, the trailer was owned for 14 full days. Even assuming the trailer was owned for 15 full days (which has not been demonstrated), 15 days / 30 days = 50%. Thus, we know the travel trailer was not owned for more than half of the month.

Watercraft

Watercraft is no longer appraised at market value as of January 1 and assessed at 5%. On and after January 1, 2026, K.S.A. 79-5501 exempts all watercraft, from all property or ad valorem taxes. This includes any boat or vessel designed to be propelled by machinery, oars, paddles, or wind action upon a sail for navigation on the water that cannot be exempted by other provisions of law. The exemption also includes with watercraft one trailer which is designed to launch, retrieve, transport, and store such watercraft and any nonelectric motor or motors which are necessary to operate such watercraft on the water. Any watercraft designed to be propelled through water by human power alone shall be exempt from all property taxes. [\[K.S.A. 79-5501\]](#)

Note: K.S.A. 79-267 exempts any marine equipment including boat motors and watercraft trailers designed to launch, retrieve, transport, and store watercraft.

Sailboards are exempt from personal property taxation pursuant to K.S.A. 79-201c.

Glossary of Key Terms

Acquisition Cost: The cost to acquire property; can be either a new cost or a used cost.

Ad Valorem: *According to value.*

Appraised Value: The value of a property before the assessment rate/percent is applied.

Appraised Value of Commercial Equipment: The retail-cost-when-new multiplied by the appropriate factor from the CIME Appraised Factor Table.

Assessment: The act, process, or an instance of estimating the value of property for taxation.

Assessment Date: The date as of which the assessments for a tax year are made; the assessment date in Kansas is January 1.

Assessment Rate: The percentage the appraised value of a property is multiplied by to determine its assessed value.

Assessed Value: The value on which the tax burden to support local government services, special assessments and public schools is allocated among property owners; the appraised value multiplied by the assessment percentage.

BBC: The measurement in inches from the truck-tractor's front bumper to back of the cab.

BOTA: *Board of Tax Appeals;* state agency to which property values and taxes can be appealed.

CAMA: The *Computer Assisted Mass Appraisal* program used by county appraisers to value real property within the county.

Chassis Cab / Cab and Chassis: Includes the cab, frame, power plant, drive line, suspensions, axles, wheels, tires on a truck; does not include a bed.

CIME: *Commercial/Industrial Machinery and Equipment*

Curb Weight: The empty (dry shipping) weight of the truck without load or driver; includes standard equipment; does not include the bed on a cab & chassis motor vehicle.

GCW or Gross Combined Weight: The allowable loaded weight for a truck-tractor and trailer combined; includes the weight of both units and the cargo; applicable to truck-tractors only.

GVW or Gross Vehicle Weight: The maximum manufacturer recommended weight the axles of the truck can carry; includes the weight of the truck and its bed and any cargo weight placed upon the axles; does not consider the weight of a trailer.

Gross Weight or Declared Weight: *For Registration Purposes (K.S.A. 8-143):* means and includes the empty weight of a truck, or combination of truck or truck-tractor and any type trailer or semi-trailer, plus the maximum weight of the cargo which will be transported thereon; does not include the weight of any travel trailer used for private recreational purposes, vehicles towed by a wrecker.

Heavy-Duty Truck (Price Digests Truck Blue Book): Generally considered a truck having a GVW over 33,000 pounds; vehicles registered 24M or greater are considered a "heavy truck" for valuation and taxation purposes.

IAAO: *International Association of Assessing Officers*

ICC: *Interstate Commerce Commission*

KCC: *Kansas Corporation Commission*

KDOR: *Kansas Department of Revenue*

K.S.A.: *Kansas Statutes Annotated;* statute is another term used for law.

LESSEE: Someone who leases property from someone else.

LESSOR: Someone who leases property he/she owns to someone else.

Light-Duty Truck (Price Digests Truck Blue Book): Generally, a truck with a GVW under 14,000 pounds; vehicles on a one ton or lighter chassis are referred to as Light-Duty trucks.

Local Governing Entity: Entity with the authority to tax property within its jurisdiction based upon the amount of money necessary to provide its services. Examples: school board, water district, county, city or township.

MOVRS: *Motor Vehicle Registration System* is the state computer program used by county treasurers to process vehicle registration information.

MSO or Manufactures Statement of Origin: *a.k.a. MCO or Manufactures Certificate of Origin* is the original document received from the dealer for a brand-new motor vehicle, prior to the vehicle title being issued.

MSRP: *Manufacturer's Suggested Retail Price*

MVE-1: The *Motor Vehicle Examination* form used by the Kansas Highway Patrol for inspection of certain vehicles, such as out-of-state, assembled or kit vehicles.

Medium-Duty Truck (Price Digests Truck Blue Book): Generally considered a truck having a GVW between 14,001 and 33,000 pounds.

Mill Levy: The *tax rate* applied to the assessed value. One mill is one dollar per \$1,000 dollars of assessed value. To calculate tax dollars, divide the mill levy by 1,000 and then multiply by the assessed value. The mill levy for a local governing entity is determined by dividing its budget by the taxable assessed value in its district.

Net Weight: The dry shipping weight of the truck *only*; the same as curb weight.

Personal Property: *"...every tangible thing which is the subject of ownership, not forming part or parcel of real property"* as defined in K.S.A. 79-102.

PVD: The *Property Valuation Division* is the division within the Kansas Department of Revenue which directs and assists counties in the valuation of property, as required by Kansas law.

RCWN: The *Retail Cost When New* is the dollar amount an item would cost when it is new at the retail level of trade.

Rendition: The form used by the taxpayer to list all taxable personal property owned or in his or her control as of January 1; a rendition must be filed if an initial filing has not been made or there is a change to report regarding a previously filed rendition.

Situs: The location of property for taxation purposes.

Stripped Chassis / Chassis-only: Includes the frame, power plant, drive line, suspensions, axles, wheels, and tires for a motor vehicle; does not include a cab, body or a bed; is considered an incomplete vehicle which cannot be driven on roadways.

Taxing District: The geographic area over which a local governing entity provides services and has taxing authority.

Tax Roll: The list of taxable property within a jurisdiction; includes the name of the owner, the assessed value, the mill levy and the property tax.

Tax Unit: A geographic area within the county for which the total mill levy is the same. Truck Bed: A piece of equipment mounted behind the cab of the truck which is designed to haul or carry property. Example: flat or box bed, concrete-mixer, trash-packer, etc.

Trailer: K.S.A. 8-126(nn) defines "trailer" as every vehicle without motive power designed to carry property or passengers wholly on its own structure and to be drawn by a motor vehicle.

Travel Trailer: K.S.A. 8-126(oo) defines "travel trailer" as every vehicle without motive power designed to be towed by a motor vehicle constructed primarily for recreational purposes.

Truck Body: The outer shell of a motor vehicle, which is mounted to a stripped chassis, covers the chassis from bumper to bumper. Example: step-van body (UPS truck); bus or ambulance body, etc.

VIN: The Vehicle Identification Number which is used to identify a motor vehicle; standardized to 17 digits in 1981; usually found stamped on the driver's side corner of the dashboard and is listed on the vehicle title and registration.

Watercraft: Any boat or vessel designed to be propelled by machinery, oars, paddles or wind action upon a sail for navigation on the water that cannot be exempted by other provisions of law. Each watercraft may include one trailer which is designed to launch, retrieve, transport and store such watercraft and any nonelectric motor or motors which are necessary to operate such watercraft on the water.

I DO HEREBY CERTIFY that the attached schedules contain a true and correct list of all personal property in this county owned or held by me, which is subject to property tax under Kansas law.

I DO HEREBY CERTIFY THAT I DID NOT OWN or control any property in this county subject to personal property taxation.

By: Owner's Signature (K.S.A. 79-306) _____ Date _____ Printed Name (if not printed above) _____

By: Other's Signature (K.S.A. 79-303) _____ Date _____ Printed Name _____ Relationship to Owner _____

By: Tax Preparer's Signature (K.S.A. 79-306) _____ Date _____ Printed Name _____

NOTICE: Every person who owns or holds tangible personal property shall list said property for assessment with the county appraiser. Once an initial statement is filed, a subsequent filing is not required unless there is a change to report regarding a previously filed rendition including the sale of existing personal property, the purchase of new personal property, and any changes to the location or use of personal property. Property held but taxable to others, shall be listed in the name of the owner on Schedule 7. Filing Deadline is on or before March 15th. This statement must be signed by the property owner, or the person who is required by K.S.A. 79-303 to list personal property on behalf of the owner. In addition, if this statement is prepared by a tax preparer, this statement must also be signed by the preparer, certifying that the statement is true and correct. The penalty for late filing is 2% per month up to a maximum of 10%, the penalty for failure to file is 12.5%. This is pursuant to Kansas Statutes 79-301, 79-303, 79-306, and 79-1422.

 ** This includes any additional boat trailers and boat motors not included in Watercraft category. See instructions for more details.

INSTRUCTIONS FOR FILING KANSAS PERSONAL PROPERTY ASSESSMENT FORM

File a return in each county where taxable personal property is owned or held. Once an initial rendition is filed, no subsequent annual statement shall be required unless there is a change. Refer to the schedule summaries below for the types of personal property that are taxable. For more information contact your local county appraiser's office.

- 1) Complete the owner and address information. Provide the name of taxpayer if different from owner and provide the location of property if different from the owner's address. **Note:** If this is not a new account, please provide the county account number.
- 2) Check one of the "I DO HEREBY CERTIFY" boxes and sign the return. Both the property owner and the rendition preparer (if applicable) must sign the return. Attach any appropriate schedules.
- 3) This form must be completed, signed, and filed with the county appraiser by March 15th as an initial filing or change. A written request for an extension must be filed with the county appraiser and state just and adequate reasons on which the request shall be granted for a reasonable amount of time. The penalty for late filing is 2% per month up to a maximum of 10%, the penalty for failure to file is 12.5%.

The following is a brief description of the schedules a taxpayer should use to report taxable personal property:

SCHEDULE 1: Personal Property Mobile Homes used for Residential Housing; By law, a mobile home is considered to be personal property unless: (1) the owner (or spouse) of the mobile home also owns the land it is on and (2) the mobile home has a permanent foundation. The method used to value a residential mobile home will be the same, whether classified as real or personal.

SCHEDULE 2: Mineral Leasehold Interests, contact the county appraiser for a separate Schedule 2.

SCHEDULE 3: Public Utilities-Locally Assessed, contact the county appraiser for a separate Schedule 3.

SCHEDULE 4: Motor Vehicles are self-propelled and designed to operate on public roads. List motor vehicles that are tagged to operate at 16,000 pounds or greater or non-highway titled. Micro-utility trucks should be listed on this schedule. Vehicles not designed to operate on public roads are listed on Schedule 5 or 6. Commercial vehicles will be reported to the Commercial Motor Vehicle Office and Central Permit.

SCHEDULE 5: Commercial and Industrial Machinery and Equipment is any tangible personal property used to produce income or depreciated or expensed for IRS purposes which is not exempt, state appraised, or a motor vehicle. All tangible personal property used for commercial and industrial purposes must be listed for property tax purposes unless it is *expressly exempt*, even if the item has been fully depreciated for income tax or record keeping purposes.

The following is a brief description of the columns on Schedule 5:

- (1) A description of the property.
- (2) The year the new or used item was purchased.
- (3) Note whether the item was purchased new ("N") or used ("U").
- (4) The age, in years, of the item at the time it was purchased. If purchased new the age at purchase is 0.
- (5) The cost to acquire the item; in terms of dollar value, not including sales tax or freight and installation costs that are charged separately and readily discernible from the actual retail price of the item.
- (6) through (10) are for county use

Retail cost when new is the cost of the item when first offered new at the retail level, not including sales tax or freight and installation costs charged separately and readily discernible from the set retail price. When items are purchased used, the appraiser will use a formula prescribed by the state to estimate "retail cost when new".

An "item" functions independently, without direct physical attachment to another "part" of machinery and equipment used in the owners business. For example, a keyboard or monitor is a "part" used in conjunction with other "parts" which together form the "item" (computer).

Exemptions: Merchants and manufacturers inventories. Machinery and equipment with a "retail cost when new" of \$1500 or less. All machinery and equipment **acquired after June 30, 2006**, via a bona fide purchase or lease or is transported into the state for expansion of an existing business or creation of a new business. K.S.A. 79-201m, K.S.A. 79-201w, K.S.A. 79-223

SCHEDULE 6: Other personal property not elsewhere classified is any taxable personal property that cannot be listed on Schedules 1 through 5. Personal property that may qualify as "Other" includes non-commercial trailers over 15,000 lbs, travel trailers that are not Kansas RV-titled, Tiny Home Trailers, Aircraft, Hot Air Ballons, non-commercial truck beds, etc. **Note: The owner of record must notify the county appraiser of the sale or acquisition of any Schedule 6 item. The notification must be given on or before December 20th,** so the value can be prorated for the number of months it is owned.

Exemptions: Farm machinery and equipment "actually and regularly" used in a farming or ranching operation. **Antique and amateur built aircraft. Utility trailers** registered after December 31, 2022, as antique 35 years or older, 2,000 lbs or less empty or 8,000 lbs or less gross weight. PP NEC Other (subclass 6) whose **purchase price is \$750 or less**. Any off-road, non-highway, vehicles typically not classified as motor vehicles as provided in K.S.A. 8-126. and any trailer having a gross weight of 15,000 lbs or less, as well as marine equipment (boat trailers, boat motors). K.S.A. 79-201j, K.S.A. 79-220, K.S.A. 79-265, K.S.A. 79-234, K.S.A. 79-267

SCHEDULE 7: Tangible Personal Property Held But Taxable to Others. Anyone having in their possession or custody taxable personal property belonging to another (e.g.; leased/lease-purchase equipment, vending or game machines, etc.) must list the property in the name of the owner. Exempt entities must also list taxable personal property belonging to others. Refer to Schedule 5 for applicable exemptions.

Watercraft as of January 1st, 2026 shall be exempt per K.S.A. 79-5501. A Watercraft is defined as any boat or vessel designed to be propelled by machinery, oars, paddles, or wind action upon a sail for navigation on the water. Each watercraft may include one trailer and any nonelectric motor or motors necessary to operate such watercraft on the water. Additional trailers and motors are exempt per K.S.A. 79-267. Any boat that is designed to be **propelled through water through human power alone** shall be exempt as well. K.S.A. 79-5501

NOTE: By law, in order to promote uniform, equal and accurate assessments, all renditions filed are subject to review by the county appraiser for completeness and accuracy. For the same reason, the county appraiser will also take steps to discover non-filers.

NOTE: If additional lines are needed, attach supplemental schedules or computer printouts with the same information.

SCHEDULE 1: MOBILE HOMES USED FOR RESIDENTIAL HOUSING							County Use		
Manufacturer & Model			Model Year	Width x Length (do not include hitch)	Double or Single	Grade	Condition	Notes	
1.									
Other Additions (sheds, etc.)			Yes	No					

SCHEDULE 4: MOTOR VEHICLES DESIGNED FOR ROAD USE (Do not include Commercial Vehicles)												
Medium/Heavy Duty Trucks, Non-Highway Titled Motor Vehicles, Micro-Utility Trucks, Buses etc..												
Make	Model	Model Year	Tag Weight	Vehicle ID # (17 digits)	Gas /Dsl	Whl Pwr	Brake air/hyd	Lift Y/N	Slpr Y/N	AC Y/N	Rated Seats	County Use
1.												
2.												
3.												
4.												

Cab and chassis truck beds should be listed on Schedule 5 or 6. Motor Vehicles with a current registration tag weight of 12,000 pounds or less pay taxes when registered and should not be listed on this return.

SCHEDULE 5: COMMERCIAL & INDUSTRIAL MACHINERY & EQUIPMENT (Acquired prior to July 1, 2006)										
Refer to instructions on pg 2 for exemptions										County Use
Item (1)	Year of Purchase (2)	Purchased New/Used? (3)	Age at Purchase (4)	Purchase Price (5)	Life (6)	Used Factor (7)	RCWN (8)	Appraised Factor (9)	Appraised Value (10)	
1										
2										
3										
4										

Includes trailers, beds on chassis cab trucks, backhoes, forklifts, office furniture, etc., used for business purposes. See Schedule 7 for listing property belonging to others.

See next page for Schedule 6 and Watercraft.

SCHEDULE 7: PERSONAL PROPERTY HELD BUT TAXABLE TO OTHERS						
Refer to Schedule 5 instructions on pg 2 for exemptions						
K.S.A. 79-303 & 304: Every person, association, company or corporation having in their possession or custody any taxable personal property belonging to another has the duty to separately list the property in the name of the owner. Includes lease and lease-purchased property, ice machines, vending or game machines, etc. Exempt entities – list taxable property belonging to others here.						
Type: (copier, vending or game machine, phone system, etc.)	ID #	Make/ Model	Owner's Name	Owner's Mailing Address	Owner's Phone	County Use
1.						
2.						
3.						

Note: Include any number(s) that the lessor may use to identify lease or lease-purchase property.

NOTE: If additional lines are needed, attach supplemental schedules or computer printouts with the same information.

SCHEDULE 6: PERSONAL PROPERTY NOT ELSEWHERE CLASSIFIED Refer to instructions on pg 2 for exemptions

TRAILERS: Horse, Utility, etc. Gross weight over 15,000 lbs. Trailers for business listed on Schedule 5.

Description (horse, utility, car, etc.)	Make	Model	Model Year	Length	Purchase Price	Yr of Purchase	No. of Axles	Haul Car?	County Use
1.									
2.									

TRAVEL TRAILERS & CAMPERS THAT ARE NOT "RV" TITLED: Camping trailers, Slide-Ins (Truck Campers), etc.

Description (5 th Wheel, camp, slide in, etc.)	Make	Model	Model Year	VIN #	Sink? Y/N	Shwr? Y/N	Toilet? Y/N	Length	No. of Axles	County Use
1.										
2.										

TINY HOME TRAILERS: These will NOT be titled as an RV.

Make	Model	Model Year	VIN#	Sink? Y/N	Shwr? Y/N	Toilet? Y/N	Purchase Price	Length	Sq. Ft Living	County Use
1.										
2.										

AIRCRAFT: Airplanes, Helicopters, etc. Owner must provide documentation for engine hours upon request.

Description (plane, Ultra-light, balloon, etc.)	Make	Model	Year	No. of Engines	Horsepower Per Eng.	Rated Seats	County Use
1.							
2.							

ALL OTHER PROPERTY NOT ELSEWHERE CLASSIFIED: Machinery and equipment no longer used for commercial purposes, non-business beds on cab and chassis trucks, etc.

Description	Item Name	Make/Model	Model Year	Purchase Price	Year Purchased	Purchased New or	Material (steel/Alum)	County Use
1.								
2.								

WATERCRAFT (As of January 1st, 2026 shall be exempt)

NOTE: If additional lines are needed, attach supplemental schedules or computer printouts with the same information.

Appendix C

Commercial & Industrial Property Economic Lives Tables

COMMERCIAL & INDUSTRIAL PROPERTY ECONOMIC LIVES

Instructions: If a particular type of personal property is listed below in **PART A**, "Economic Lives of Assets Used In All Business Activities", use that economic life for the property. For all other types of property, identify the activity in which the business is engaged in and use the life indicated in **PART B**, "Economic Lives of Assets Used In Specific Activities". If the business activity cannot be found in PART B, refer to IRS Publication 946. If the business activity is still not found, use appraisal judgment to determine the economic life.

IRS Asset Class	PART A Economic Lives of Assets Used In All Business Activities	Class Life In Years
00.11	Office Furniture, Fixtures, and Equipment: Includes furniture and fixtures that are not a structural component of a building. Includes such assets as desks, files, safes, and communication equipment	10
**	Outdoor Furniture	5
00.12	<p>Information Systems: Include computers and their peripheral equipment used in administering normal business transactions and the maintenance of business records, their retrieval and analysis.</p> <p>Information systems are defined as:</p> <ol style="list-style-type: none"> 1) Computers: A computer is a programmable electronically activated device capable of accepting information, applying prescribed process to the information, and supplying the results of these processes with or without human intervention. It usually consists of a central processing unit containing extensive storage, logic, arithmetic, and control capabilities. 2) Peripheral equipment consists of the auxiliary machines which are designed to be placed under control of the central processing unit. Non limiting examples are: Card readers, card punches, magnetic tape feeds, high speed printers, optical character readers, tape cassettes, mass storage units, paper tape equipment, keypunches, data entry devices, teleprinters, terminals, tape drives, disc drives, disc files, disc packs, visual image projector tubes, card sorters, plotters, and collators. Peripheral equipment may be used on-line or off-line. Does not include equipment that is an integral part of other capital equipment that is included in other classes of economic activity, i.e., computers used primarily for process or production control, switching, channeling, and automating distributive trades and services such as point of sale (POS) computer systems. Also, does not include equipment of a kind used primarily for amusement or entertainment. 	3

IRS Asset Class	PART A Economic Lives of Assets Used In All Business Activities	Class Life In Years
00.12 Cont.	NOTE: County appraisers have the discretion to use an economic life of <i>up to 5 years</i> for computers and their peripheral equipment [except for personal computers (PCs)], <i>if</i> there is sufficient data to support the greater life.	
00.13 **	Data Handling Equipment; except Computers: Includes only typewriters, calculators, adding and accounting machines, copiers, and duplicating equipment	5
*	Cold Storage and Ice Making Equipment	18
*	Cold Storage Warehouse Equipment	10
*	Hand Tools	5
**	Trailer and Trailer-Mounted Containers	10
00.28	Vessels, Barges, Tugs, and Similar Water Transportation Equipment, except those used in marine construction	18
00.3	Land Improvements: Radio, and television transmitting towers	20

IRS Asset Class	PART B Economic Lives of Assets Used In <u>Specific</u> Business Activities	Class Life In Years
01.1	Agriculture: Includes machinery and equipment, grain bins, and fences but no other land improvements, that are used in the production of crops or plants, vines, and trees; livestock; the operation of farm dairies, nurseries, greenhouses, sod farms, mushroom cellars, apiaries, and fur farms; the performance of agriculture, animal husbandry, and horticultural services.	10
10.0	Mining: Includes assets used in the mining and quarrying of metallic and nonmetallic minerals (including sand, gravel, stone, and clay) and the milling, beneficiation and other primary preparation.	10
15.0	Construction: Includes assets used in construction by general building, special trade, heavy and marine construction contractors, operative and investment builders, real estate subdividers and developers.	6

IRS Asset Class	PART B Economic Lives of Assets Used In Specific Business Activities	Class Life In
27.0	Printing, Publishing, and Allied Industries: Includes assets used in printing by one or more processes, such as letter-press, lithography, gravure, or screen; the performance of services for the printing trade, such as bookbinding, typesetting, engraving, photo-engraving, and electrotyping; and the publication of newspapers, books; and periodicals.	11
44.0	Water Transportation: Includes assets used in the commercial and contract carrying of freight and passengers by water except the transportation assets included in classes with the prefix 00.28.	20
57.0	Distributive Trades and Services: Includes assets used in wholesale and retail trade, and personal and professional services. Includes architect and drafting, auto repair shop (except hand tools), beauty/barber shop, chiropractors, dentists, doctors, lawyers, exercise, laundry and cleaning equipment, gas pumps etc..	10
**	Commercial Laundromat Equipment	5
*	Restaurant and Bar Equipment	10
*	Restaurant Equipment, Fast Foods	7
57.1	Distributive Trades and Services-Billboard, Service Station Buildings and Petroleum Marketing Land Improvements: Includes billboards and underground fuel tanks.	20
79.0	Recreation: Includes assets used in the provision of entertainment services on payment of a fee or admission charge, as in the operation of bowling alleys, billiard and pool establishments, theaters, concert halls, batting cages and miniature golf courses. Does not include amusement and theme parks and assets which consist of specialized land improvements, such as golf courses, sports stadia, race tracks.	10
80.0	Theme and Amusement Parks: Includes assets used in the provision of rides, attractions, and amusements in activities defined as theme and amusement parks, and includes appurtenances associated with a ride, attraction, amusement or theme setting within the park such as ticket booths, facades, shop interiors, and props, special purpose structures, and buildings other than warehouses, administration buildings, hotels, and motels. Includes all support functions (e.g., food and beverage retailing, souvenir vending and other non-lodging accommodations) if owned by the park and provided exclusively for the benefit of park patrons. Includes race tracks, golf courses and sports stadia.	12

IRS Asset Class	PART B Economic Lives of Assets Used In Specific Business Activities	Class Life In
48.121	Computer-based Telephone Central Office Switching Equipment: Includes equipment whose functions are those of a computer or peripheral equipment (as defined in section 168(i) (2) (B) of the code) used in its capacity as telephone central office equipment. Includes a significant portion of cellular phone assets. Does not include private branch exchange (PBX) equipment.	10
48.2	Radio and Television Broadcasting: Includes assets used in radio and television broadcasting, except transmitting towers.	6
48.2	Telegraph, Ocean Cable, and Satellite Communications (TOCSC): includes communications-related assets used to provide domestic and International radio-telegraph, wire-telegraph, ocean-cable, satellite communications services and one way pagers also includes related land improvements.	6
48.31	TOCSC-Electric Power Generating and Distribution Systems: Includes assets used in the provision of electric power by generation, modulation, rectification, channelization, control, and distribution. Does not include these assets when they are include on customer's premises.	19
48.32	TOCSC-High Frequency Radio and Microwave Systems: Includes assets such as transmitters and receivers, antenna supporting structures, antennas, transmission lines from equipment to antenna, transmitter cooling systems, and control and amplification equipment. Does not include cable and long-line systems.	13
48.33	TOCSC-Cable and Long-line Systems: Includes assets such as transmission lines, pole lines, ocean cables, buried cable and conduit, repeaters, repeater stations, and other related assets. Does not include high frequency radio or microwave systems.	26
48.34	TOCSC-Central Office Control Equipment: Includes assets for general control, switching, and monitoring of communications signals including electromechanical switching and channeling apparatus, multiplexing equipment, patching and monitoring facilities, in-house cabling, teleprinter equipment, and associated site improvements.	16
48.35	TOCSC-Computerized Switching, Channeling, and Associated Control Equipment: Includes central office switching computers, interfacing computers, other associated specialized control equipment, and site improvements.	10
48.36	TOCSC-Satellite Ground Segment Property: Includes assets such as fixed earth station equipment, antennas, satellite communications equipment, and interface equipment used in satellite communications. Does not include general purpose equipment or equipment used in satellite space segment property.	10

IRS Asset Class	PART B Economic Lives of Assets Used In Specific Business Activities	Class Life In Years
48.37	TOCSC-Satellite Space Segment Property: Includes satellites and equipment used for telemetry, tracking, control, and monitoring when used in satellite communications.	8
48.38	TOCSC-Equipment Installed on Customer's Premises: Includes assets installed on customer's premises, such as computers, terminal equipment, power generation and distribution systems, private switching center, teleprinters, facsimile equipment, and other associated and related equipment.	10
48.39	TOCSC-Support and Service Equipment: Includes assets used to support but not engage in communications. Includes store, warehouse and shop tools, and test and laboratory assets.	13
48.39	Cable Television (CATV): Includes communications-related assets used to provide cable television community antenna television services.	13
48.41	CATV-Headend: Includes assets such as towers, antennas, preamplifiers, converters, modulation equipment, and program non-duplication systems. Does not include headend buildings and program origination assets.	11
48.42	CATV-Subscriber Connection and Distribution Systems: Includes assets such as trunk and feeder cable, connecting hardware, amplifiers, power equipment, passive devices, directional taps, pedestals, pressure taps, drop cables, matching transformers, multiple set connector equipment, and converters.	10
48.43	CATV-Program Origination: Includes assets such as cameras, film chains, video tape recorders, lighting, and remote location equipment excluding vehicles. Does not include buildings and their structural components.	9
48.44	CATV-Service and Test: Includes assets such as oscilloscopes, field strength meters, spectrum analyzers, and cable testing equipment.	8
48.45	CATV-Microwave Systems: Assets such as towers, antennas, transmitting and receiving equipment, and broad band microwave assets if used in the provision of cable television services. Also includes satellite entertainment equipment. Does not include assets used in the provision of common carrier services.	9
20.1	Manufacture of Grain and Grain Mill Products: Assets used in the production of flour, cereals, livestock feeds and other grain & grain mill products.	17
20.3	Manufacture of Vegetable Oils and Vegetable Oil Products: Includes assets used in the production of oil from vegetable materials and the manufacture of related vegetable oil products.	18

MANUFACTURING INDUSTRY:

IRS Asset Class	Economic Lives of Assets Used	Class Life In Years
20.4	Manufacture of Other Food and Kindred Products: Includes assets used in the production of foods and beverages not included in classes 20.1 and 20.3.	12
*	Manufacture of Condiments	10
20.5	Manufacture of Food and Beverages--Special Handling Devices: Includes assets defined as specialized materials handling devices such as returnable pallets, palletized containers, and fish processing equipment including boxes, baskets, carts, and flaking trays used in activities as defined in classes 20.1, 20.3 and 20.4. Does not include general purpose small tools such as wrenches and drills, both hand & power-driven, and other general purpose equipment such as conveyors, transfer equipment, & material handling devices.	4
22.1	Manufacture of Knitted Goods: Includes assets used in the production of knit & netted fabrics & lace. Assets used in yarn preparation, bleaching, dyeing, printing & other similar finish processes, texturing & packaging, are elsewhere classified.	8
22.2	Manufacture of Yarn, Thread, and Woven Fabric: Includes assets used in the production of spun yarns including the preparing, blending, spinning, and twisting of fibers into yarns and threads, the preparation of yarns such as twisting, warping and winding, the production of covered elastic yarn and thread, cordage, woven fabric, tire fabric, braided fabric, twisted jute for packaging, mattresses, pads, sheets, and industrial belts, and the processing of textile mill waste to recover fibers, flocks, and shoddies. Assets used to manufacture carpets, man-made fibers, and nonwovens, and assets used in texturing, bleaching, dyeing, printing, and other similar finishing processes, are elsewhere classified.	11

IRS Asset Class	Economic Lives of Assets Used	Class Life In Years
22.3	<p>Manufacture of Carpets and Dyeing, Finishing, and Packaging of Textile Products and Manufacture of Medical and Dental Supplies: Includes assets used in the production of carpets, rugs, mats, woven carpet backing, chenille, and other tufted products, and assets used in the joining together of backing with carpet yarn or fabric. Includes assets used in washing, bleaching, dyeing, printing, drying, and similar finishing processes applied to textile fabrics, threads, and other textile goods. Includes assets used in the production and packaging of textile products, other than apparel, by creasing, forming, trimming, cutting, and sewing, such as the preparation of carpet and fabric samples, or similar joining together processes (other than the production of scrim reinforced paper products and laminated paper products) such as the sewing and folding of hosiery and panty hose, and the creasing, folding, trimming, and cutting of fabrics to produce nonwoven products, such as disposable diapers and sanitary products. Also includes assets used in the production of medical and dental supplies other than drugs and medicine. Assets used in the manufacture of nonwoven carpet backing, & hard surface floor cover such as tile & rubber are elsewhere classified.</p>	9
22.4	<p>Manufacture of Textured Yarns: Includes assets used in the processing of yarns to impart bulk and/or stretch properties to the yarn. The principal machines involved are false-twist, draw, beam-to-beam, and stuffer box texturing equipment and related high speed twisters and winders. Assets, as described above, which are used to further process man-made fibers are elsewhere classified when located in the same plant in an integrated operation with man-made fiber producing assets. Assets used to manufacture man-made fibers and assets used in bleaching, dyeing, printing, and other similar finishing processes, are elsewhere classified.</p>	8

IRS Asset Class	Economic Lives of Assets Used	Class Life In Years
22.5	<p>Manufacture of Nonwoven Fabrics: Includes assets used in the production of nonwoven fabrics, felt goods including felt hats, padding, batting, wadding, oakum, and fillings, from new materials and from textile mill waste. Nonwoven fabrics are defined as fabrics (other than reinforced and laminated composites consisting of nonwovens and other products) manufactured by bonding natural and/or synthetic fibers and/or filaments by means of induced mechanical interlocking, fluid entanglement, chemical adhesion, thermal or solvent reaction, or by combination thereof other than natural hydration bonding as occurs with natural cellulose fibers. Such means include resin bonding, web bonding, and melt bonding. Specifically includes assets used to make flocked and needle punched products other than carpets and rugs. Assets, as described above, which are used to manufacture nonwovens are elsewhere classified when located in the same plant in an integrated operation with man-made fiber producing assets. Assets used to manufacture man-made fibers and assets used in bleaching, dyeing, printing, and other similar finishing processes, are elsewhere classified.</p>	10
23.0	<p>Manufacture of Apparel and Other Finished Products: Includes assets used in the production of clothing and fabricated textile products by the cutting and sewing of woven fabrics, other textile products, and furs; but does not include assets used in the manufacture of apparel from rubber and leather.</p>	9
24.1	<p>Cutting of Timber: Includes logging machinery and equipment and road building equipment used by logging and sawmill operators and pulp manufacturers for their own account.</p>	6
24.2	<p>Sawing of Dimensional Stock from Logs: Includes machinery and equipment installed in permanent or well established sawmills.</p>	10
24.3	<p>Sawing of Dimensional Stock from Logs: Includes machinery and equipment in sawmills characterized by temporary foundations and a lack, or minimum amount, of lumber handling, drying, and residue disposal equipment.</p>	6
24.4	<p>Manufacture of Wood Products, and Furniture: Includes assets used in the production of plywood, hardboard, flooring, veneers, furniture, and other wood products, including the treatment of poles and timber.</p>	10

IRS Asset Class	Economic Lives of Assets Used	Class Life In Years
26.1	<p>Manufacture of Pulp and Paper: Includes assets for pulp materials handling and storage, pulp mill processing, bleach processing, paper and paperboard manufacturing, and on-line finishing. Includes pollution control assets and all land improvements associated with the factory site or production process such as effluent ponds and canals, provided such improvements are depreciable but does not include buildings and structural components as defined in section 1.48-1(e)(1) of IRS regulations. Includes steam and chemical recovery boiler systems, with any rated capacity, used for the recovery and regeneration of chemicals used in manufacturing. Does not include assets used either in pulpwood logging, or in the manufacture of hardboard.</p>	13
26.2	<p>Manufacture of Converted Paper, Paperboard, and Pulp Products: Includes assets used for modification, or remanufacture of paper and pulp into converted products, such as paper coated off the paper machine, paper bags, paper boxes, cartons and envelopes. Does not include assets used for manufacture of nonwovens that are elsewhere classified.</p>	10
28.0	<p>Manufacture of Chemicals and Allied Products: Includes assets used to manufacture basic organic chemicals; chemical products to be used in further manufacture, such as synthetic fibers and plastics materials; and finished chemical products. Includes assets used to further process manmade fibers, to manufacture plastic film, and to manufacture nonwoven fabrics, when such assets are located in the same plant in an integrated operation with chemical products producing assets. Also includes assets used to manufacture photographic supplies, such as film, photographic paper, sensitized photographic paper, and developing chemicals. Includes all land improvements associated with plant site or production processes, such as effluent ponds and canals, provided such land improvements are depreciable. Does not include assets used in the manufacture of finished rubber and plastic products or in the production of natural gas products, butane, propane, and by-products of natural gas plants.</p>	9
30.1	<p>Manufacture of Rubber Products: Includes assets used for the production of products from natural, synthetic, or reclaimed rubber, gutta percha, balata, or gutta siak, such as tires, tubes, rubber footwear, mechanical rubber goods, heels and soles, flooring, and rubber sundries; and in the recapping, retreading, and rebuilding of tires.</p>	14

IRS Asset Class	Economic Lives of Assets Used	Class Life In Years
30.11	Manufacture of Rubber Products--Special Tools and Devices: Includes assets defined as special tools, such as jigs, dies, mandrels, molds, lasts, patterns, specialty containers, pallets, shells; and tire molds, and accessory parts such as rings and insert plates used in activities as defined in class 30.1. Does not include tire building drums and accessory parts and general purpose small tools such as wrenches and drills, both power and hand-driven, and other general purpose equipment such as conveyors and transfer equipment.	4
30.2	Manufacture of Finished Plastic Products: Includes assets used in the manufacture of plastics products and the molding of primary plastics for the trade. Does not include assets used in the manufacture of basic plastics materials nor the manufacture of phonograph records.	11
30.21	Manufacture of Finished Plastic Products--Special Tools: Includes assets defined as special tools, such as jigs, dies, fixtures, molds, patterns, gauges, and specialty transfer and shipping devices, used in activities as defined in class 30.2. Special tools are specifically designed for the production or processing of particular parts and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices.	3
31.0	Manufacture of Leather and Leather Products: Includes assets used in the tanning, currying, and finishing of hides and skins; the processing of fur pelts; and the manufacture of finished leather products, such as footwear, belting, apparel, and luggage.	11
32.1	Manufacture of Glass Products: Assets used in the production of flat, blown, or pressed products of glass, such as float and window glass, glass containers, glassware and fiberglass. Does not include assets used in the manufacture of lenses.	14
32.11	Manufacture of Glass Products-Special Tools: Assets defined as special tools such as molds, patterns, pallets, and specialty transfer and shipping devices such as steel racks to transport automotive glass, used in activities as defined in class 32.1. Special tools are specifically designed for the production or processing of particular parts and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches & drills, hand or power-driven, and other general purpose equipment such as conveyors, transfer equipment, & materials handling devices.	2

IRS Asset Class	Economic Lives of Assets Used	Class Life In Years
32.2	Manufacture of Cement: Includes assets used in the production of cement, but does not include any assets used in the manufacture of concrete and concrete products nor in any mining or extraction process.	20
32.3	Manufacture of Other Stone and Clay Products: Includes assets used in the manufacture of products from materials in the form of clay and stone, such as brick, tile and pipe; pottery and related products, such as vitreous-china, plumbing fixtures, earthenware and ceramic insulating materials; and also includes assets used in manufacture of concrete and concrete products. Does not include assets used in any mining or extraction processes.	15
33.2	Manufacture of Primary Nonferrous Metals: Includes assets used in the smelting, refining, and electrolysis of nonferrous metals from ore, pig, or scrap, the rolling, drawing, and alloying of nonferrous metals; the manufacture of castings, forgings, and other basic products of nonferrous metals; and the manufacture of nails, spikes, structural shapes, tubing, wire, and cable.	14
33.21	Manufacture of Primary Nonferrous Metals--Special Tools: Includes assets defined as special tools such as dies, jugs, molds, patterns, fixtures, gauges, and drawings concerning such special tools used in the activities as defined in class 33.2, Manufacture of Primary Nonferrous Metals. Special tools are specifically designed for the production or processing of particular products or parts and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and rills, hand & power-driven, & other general purpose equipment such as conveyors, transfer equipment & materials handling devices. Rolls, mandrels & refractories are not in class 33.21 but are included in class 33.2.	6
33.3	Manufacture of Foundry Products: Includes assets used in the casting of iron and steel, including related operations such as molding and coremaking. Also includes assets used in the finishing of castings and patternmaking when performed at the foundry, all special tools and related land improvements.	14
33.4	Manufacture of Primary Steel Mill Products: Includes assets used in the smelting, reduction, and refining of iron and steel from ore, pig, or scrap; the rolling, drawing and alloying of steel; the manufacture of nails, spikes, structural shapes, tubing, wire, and cable. Includes assets used by steelservice centers, ferrous metal forges, and assets used in coke production, regardless of ownership. Also includes all special tools used in the above activities.	15

IRS Asset Class	Economic Lives of Assets Used	Class Life In Years
34.0	Manufacture of Fabricated Metal Products: Assets used in the production of metal cans, tinware, fabricated structural metal products, metal stampings, and other ferrous and nonferrous metal and wire products not elsewhere classified. Does not include assets used to manufacture non-electric heating apparatus.	12
34.01	Manufacture of Fabricated Metal Products--Special Tools: Assets defined as special tools such as dies, jigs, molds, patterns, fixtures, gauges, and returnable containers and drawings concerning such special tools used in the activities as defined in class 34.0. Special tools are specifically designed for the production or processing of particular machine components, products, or parts and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches & drills, hand or power-driven, and other general purpose equipment such as conveyors, transfer & material handling devices.	3
35.0	Manufacture of Electrical and Non-Electrical Machinery and Other Mechanical Products: Includes assets used to manufacture or rebuild finished machinery and equipment and replacement parts thereof such as machine tools, general industrial and special industry machinery, electrical power generation, transmission, and distribution systems, space heating, cooling, and refrigeration systems, commercial and home appliances, farm and garden machinery, construction machinery, mining and oil field machinery, internal combustion engines (except those elsewhere classified), turbines (except those that power airborne vehicles), batteries, lamps and lighting fixtures, carbon and graphite products, and electromechanical and mechanical products including business machines, instruments, watches and clocks, vending and amusement machines, photographic equipment, medical and dental equipment and appliances, and ophthalmic goods. Does not include assets used in mining, assets used in the manufacture of primary ferrous and nonferrous metals, assets included in class 00.11 through 00.4.	10
36.0	Manufacture of Electronic Components, Products and Systems: Includes assets used in the manufacture of electronic equipment, computation, instrumentation and control systems.	6
36.1	Any Semiconductor Manufacturing Equipment: Includes equipment used in the manufacturing of semiconductors if the primary use of the semiconductors is in products and systems defined in class 36.0.	5

IRS Asset Class	Economic Lives of Assets Used	Class Life In Years
37.11	<p>Manufacture of Motor Vehicles: Includes assets used in the manufacture and assembly of finished automobiles, trucks, trailers, motor homes, and buses. Does not include assets used in mining, printing and publishing production of primary metals, electricity, or steam, or the manufacture of glass, industrial chemicals, batteries, or rubber products, which are classified elsewhere. Includes assets used in manufacturing activities elsewhere classified other than those excluded above, where such activities are incidental to and an integral part of the manufacture and assembly of finished motor vehicles such as the manufacture of parts and subassemblies of fabricated metal products , electrical equipment, textiles, plastics, leather, and foundry and forging operations. Does not include any assets not classified in manufacturing activity classes, e.g., does not include any assets classified in asset guideline classes 00.11 through 00.4. Activities will be considered incidental to the manufacture and assembly of finished motor vehicles only if 75 percent or more of the value of the products produced under one roof are used for the manufacture and assembly of finished motor vehicles. Parts that are produced as a normal replacement stock complement in connection with the manufacture and assembly of finished motor vehicles are considered used for the manufacture assembly of finished motor vehicles. Does not include assets used in the manufacture of component parts if these assets are used by taxpayers not engaged in the assembly of finished motor vehicles.</p>	12
37.12	<p>Manufacture of Motor Vehicles--Special Tools: Includes assets defined as special tools, such as jigs, dies, fixtures, molds, patterns, gauges, and specialty transfer and shipping devices, owned by manufacturers of finished motor vehicles and used in qualified activities as defined in class 37.11. Special tools are specifically designed for the production or processing of particular motor vehicle components and have no significant utilitarian value, and cannot be adapted to further or different use, and changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, hand & power driven and other general purpose equipment such as conveyors, transfer & material handling.</p>	3
37.2	<p>Manufacture of Aerospace Products: Includes assets used in the manufacture and assembly of airborne vehicles and their component parts including hydraulic, pneumatic, electrical and mechanical systems. Does not include assets used in the production of electronic airborne detection, guidance, control, radiation, computation, test, navigation and communication equipment.</p>	10

IRS Asset Class	Economic Lives of Assets Used	Class Life In Years
37.31	Ship and Boat Building Machinery and Equipment: Includes assets used in the manufacture and repair of ships, boats, caissons, marine drilling rigs and special fabrications not included in asset classes 37.32 & 37.33. Specifically includes all manufacturing and repairing machinery and equipment, including machinery and equipment used in the operation of assets included in class 37.32.	12
37.32	Ship and Boat Docks and Land Improvements: Includes assets used in the manufacture and repair of ships, boats, caissons, marine drilling rigs, and special fabrications not included in asset classes 37.31 and 37.33. Specifically includes floating and fixed dry docks, ship basins, graving docks, shipways, piers, and all other land improvements such as water, sewer, and electric systems. Excludes buildings and their structural components.	16
37.33	Ship and Boat Building--Special Tools: Includes assets defined as special tools such as dies, jigs, molds, patterns, fixtures, gauges, and drawings concerning such special tools used in the activities defined in classes 37.31 and 37.32. Special tools are specifically designed for the production or processing of particular machine components, products, or parts, and have not significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices.	6
39.0	Manufacture of Athletic, Jewelry and Other Goods: Includes assets used in the production of jewelry; musical instruments; toys and sporting goods; motion picture and television films and tapes; and pens, pencils, office and art supplies, brooms, brushes, caskets, etc.	12

Unless otherwise noted, all of the asset classes and class lives listed above are presented as set forth in IRS Publication 946. If the business activity is not listed herein, refer to IRS Publication 946. If not there, use appraisal judgment to determine the economic life and document your findings.
